EARLY ROUND RED

LITTLE MARVEL

\$1.00 Garden Seed Collection

26 Packets at Less Than 4c Each

All good standard varieties and big full packets. Seed has been tested and is of good strong germination. Enough seed to plant a big back-yard garden and produce oodles of fine vegetables.

PRICE, \$1.00, Postpaid

Bush Beans, Field's First Early
Pole Beans, Imp. Missouri Wonder
Beet, Early Eclipse
Mangel, Mammoth Long Red
Cabbage, All Head Early
Celery, Golden Self-Bleaching
Carrots, Oxheart
Cucumbers, Chicago Pickle
Cucumbers, Henderson's White Spine
Lettuce, Black Seeded Simpson
Onions, Giant Prizetaker
Parsnips, Hollow Crown
Peas, Improved Extra Early

Peas, Dwarf Champion
Muskmelon, Field's Daisy
Sweet Peppers, Ruby King
Popcorn, Japanese Hullless
Radish, Early Round Dark Red
Radish, Long Scarlet
Salsify, Mammoth Sandwich Island
Sweet Corn, White Mexican
Sweet Corn, Stowell's Evergreen
Tomato, New Stone
Spinach, Bloomsdale Savoy
Turnip, Purple Top Strap Leaf
Parsley, Moss Curled

These would cost \$1.87 at our regular prices.

Wonderful LEADING Value in Fine Quality Sheep-Lined Coat

\$6.90

Postpaid

Sizes 36 to 48, \$6.90; Sizes 50 to 54, \$8.90; Boys' 12 to 18, \$5.90

If you want a low priced coat I will guarantee that this is the best one you can buy for this price anywhere. I don't like it as well as the one below but if this is the price you want to pay buy it with the distinct understanding that you can have your money back if you wish—and no questions asked.

Extra Well Made

This coat is lined with a fine grade, Bark Tanned, full sheep pelt with long, warm, thick fleece. The cloth is a heavy grade moleskin that is wind and moisture proof. The collar is a big 7-inch roll job made of fine, soft beaverized material. Big pockets leather reinforced; generous cut, roomy sleeves lined with heavy grey blanket cloth; warm wool-knit wristlets. Full 36 in. length coat with good buttons, strong loops, good cloth, full size belt and the best coat I ever saw for this low a price. Your money back if you don't agree.

Genuine Horsehide Leather Coat

Postpaid

Zones 2 & 3

\$9.75

Our feature value in a real leather coat. Made of genuine front quarter, black horsehide, soft and pliable, hard to scuff. Is 30 inches long. Two big pockets with flaps. Lined with genuine wool blanket cloth. Sizes 36 to 48.

DeLuxe Sheep Lined Coat

\$11.95

Postpaid in Zones 2 & 3.

Sizes 38 to 48 — \$11.95
Sizes 50 to 56 — \$13.95

We had this coat made up to our order so as to get every big feature ever found in a sheep-lined coat. Here are some of the outstanding points: 1 — Heaviest olive drab twilled moleskin. 2 — Longest, softest, genuine sheep pelt lining. 3 — Muff pockets and side pockets have genuine horsehide binding on edges. 6 — Extra tough sleeve lining and horsehide arm shields. 7 — Cuffs and under arm reinforcing of horsehide. 8 — Wool knit windmuffs in sleeve cuffs. 9 — Waterproof slicker interlined bottom facings and top sleeves.

Super Quality and Extra BIG VALUE At Low Cost

Regular Sizes 36 to 48, \$8.95
Sizes 50, 52, 54, 56 — \$10.95

\$8.95

Postpaid

The popularity of this big value coat is proven every day by the orders that pile in for it, and everybody thinks it an unusual buy. There are cheaper coats on the market but if you want the most coat for a fair price here it is. Read this description and then order one on trial. If it isn't more than we claim you can have your money back.

DESCRIPTION

The wool fleece lining is of the finest long, fleecy grade and is imported from Australia. The collar is of soft beaverized material that turns up high on the neck and fastens either loose or tight as desired. The outside of the coat is extra heavy moleskin, closely woven and with satin-finish face. Sleeves are large and lined with warm woolen cloth. Wristlets are wool knit. Has four roomy pockets with leather bound corners. Coat is 36 in. long, double breasted and equipped with heavy buttons and strong loops. The Imported wool lining goes clear to the right edge and wind and cold cannot get in. This is a very fine coat and sells up to \$15.00 some places. Your money back if it isn't absolutely all I say and more.

Wool to the Edge

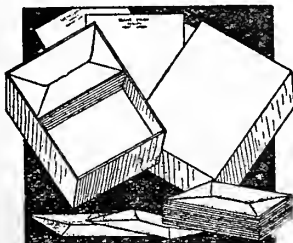

Blanket Lined Blouse

Made of tough gray moleskin with blanket cloth lining. Two big patch pockets with button down flaps. Knit bottom. Wonderful windbreaker. Sizes 36 to 48.

\$3.95

Postpaid in Zones 2 & 3

Wonderful

Personalized Stationery

We will print your name and address on sheets of stationery and on the back flap of envelopes to match. The size of the stationery is 5 7/8 x 6 7/8.

Order for your friends as well as for yourself. Everyone appreciates this personal stationery.

This makes distinctive stationery for your own use and it provides an ideal

gift. Can you get as much or as nice stationery as this is for near our price?

\$1.00

SPECIAL OFFER—6 boxes for \$5.00 if sent to one address.

If you want name printed in upper left hand corner of Envelope instead of back flap, add 50c Extra.

A Letter to All of You --- From the Boss

I have to apologize for putting this old picture in again but we have been so busy all season I just plain forgot to get another picture ready and now it is too late.

Any new picture of our place here would have to include a new Hatchery building and a new Fur House. Except for that the rest is all the way you remember it from other pictures. We are all a little older, a little wiser and thankful for being able to do a good day's work.

When this time of year rolls around I am always reminded of how time does fly. It seems only a short time since I was writing my page for our last year's Seed and Nursery Catalog and not many years since I was showing you pictures of the children. Now most of them I introduced to you as babies are grown up and have families of their own to worry about.

Only three of the children are at home now — Letty, Georgia and John Henry. And they have grown so much they object to being called children. Ruth, Faith, Hope and Phillip are in Oakland, California. Jessie and her husband are still in Chicago. Josephine is teaching school again out in Nebraska. Mary and Frank live here in Shenandoah with their families and Frank has charge of our Nursery Department.

The business has been good to us again this year and I haven't changed my mind a bit about good measure, fair prices, fine quality and friendly treatment. They are about the only rules worth knowing when it comes to running a business and no one can grow and progress as we have without practicing them every day the year 'round.

At a time when business men have been complaining and crying around our customers have gone right on increasing. Every once in a while one of them says, "How does Henry Field do it." And my answer is that Henry Field doesn't do it all. It's his customers who do it. They stay by us year after year and most of them are such good boosters we get lots of new friends right along.

By doing everything we know to deserve your confidence and good will we have come right along to the top of the heap.

It's hard work. You bet it is. Lots of work. But with lots of work to do and three meals a day and a warm place to sleep we can't complain and you won't find a happier, finer lot of folks anywhere than the folks right here filling your orders and doing their best to give you just what you want.

Come And See Us When You Can

And we like company, too, all of us do. I have always been "neighbors" to my customers and like to have you come and see us. With a big business like this

to plan for, sometimes one has something on his mind he can't drop just at that minute but if one of us is specially busy when you stop to say hello, just come back a few minutes later and see us again. We are not the fussy sort of folks, haven't got anything very fancy in the way of either buildings or manners. But we do have acres of beautiful flowers and our hospitality is known all over the country. If you get a chance, come right

along and see us. If you are looking for just common folks with a full measure of common sense and the friendliest lot you've ever seen you are sure to have a good time and sure to come again later.

Write Me a Letter

Write me a letter anyway. I like to hear from you. Enjoy every letter from my customers. It is an old fashioned habit I guess but it is a good one and I am so used to it I would get lonesome if you all didn't write occasionally.

And send your orders, too. Send them early as a favor to us. You can count on prompt service, generous

measure and the finest quality.

Plant a Big Garden This Year

Yes, I am going to repeat something I have always told you. Plant a good big garden. That's the way to beat the high cost of living and it is the only way to have the nice fresh and tasty things we all like. Of course if you are satisfied with canned vegetables and don't have to worry about expenses, I will be glad to sell you all the cases of canned goods you want to buy. Worth the money too, and almost as good as you could can yourself.

But I would rather sell you good high quality seed and see you put in a good big garden and raise plenty of fresh stuff with some left over to can.

You can live off it all spring and summer and put up enough of it to make living mighty enjoyable and inexpensive all winter. It would be good for all of our souls and our pocket books too, if we would get back to nature and practice raising all we can of what we need to eat.

You can't beat me for seeds when it comes to strong, thrifty varieties, high quality, generous measure and a good crop. I've been working with seeds all my life and have always sold only the best and will never sell an ounce of any other kind.

Now get your order made right away. Get your ambition up where it belongs and plan a garden which will be a credit to your intentions to get the most out of life that you possibly can. Mail your order to me just as early as you can.

Henry Field.

Here's part of the bunch I am working for. John Henry is on the right, then Frank, Georgia, Ruth, Mary, Mrs. Field and myself.

The Friendly Farmer Radio -- KFNF

You are missing a lot of entertainment and quite a bit of advice of one kind or another if you are not listening to KFNF. We give gardening talks and flower talks and nursery talks every day of the week and try to answer all the questions you folks want answered about these things.

We want you to listen to our sales talks, too, because we make it our business to have the finest, highest quality things at the most fair and reasonable prices. Some especially good bargains come so suddenly we can't get them in print and so mentioning them over KFNF is the best thing we can do.

We are on the air over KFNF every day during the day and part of the evening. You will find us along the middle of your dial (890 Kilocycles). If you have any trouble hearing us in the evening, try to get us at 6:00 o'clock in the morning or at noon or around supper time.

You can also hear us now over KGBZ, York, Nebraska. We have arranged to broadcast from there every day, too; noon, afternoon and evening. Look for KGBZ at 930 Kilocycles.

If you don't listen to KFNF or KGBZ you're invited to and we hope you do it soon and regular. When you become one of us we want you to help make our programs more friendly, more helpful and more entertaining. It will be your job to give us advice and suggestions just as you have done right along on other things.

A Seed Catalog For The Home Gardener

Free Seed On Early Orders

To relieve us during our spring rush we will give free with every \$1.00 purchase of vegetable or flower seed one 10¢ packet or two 5¢ packets of seed, your choice, if the order is in during January or February.

The offer does not include orders for bulbs, nursery stock, field seed or merchandise but vegetable and flower seed only. If your order amounts to \$2.00 or more you may select two 10¢ packets or four 5¢ packets, and so on, but the order must be in during January or February.

BUSH BEANS

Fresh Picked Green Beans are Tender

Yellow or Wax Podded

Plant when the ground is warm using one pound of seed to 100 feet of row. Plant at intervals until as late as July 1st and have tender green beans all season until late fall.

To have green beans at their best they should be used within three or four hours of the time they are pulled or they will become wilted and tough and will lose the fine flavor that beans from your own garden should have.

117—NEW STRINGLESS YELLOW POD. Round pods, thick tender flesh and stringless. A most delicious bean for table use, especially, when flavored with a small strip of Henry Field's bacon. One of the earliest varieties.

114—CHALLENGE BLACK WAX. Is an early, good yielding variety, pod round, and the quality fine.

115—DAVIS WHITE KIDNEY WAX. Handsome, long straight, flat pods. Stringy unless gathered early. A good market variety.

121—EARLY WONDER WAX. One of our earliest varieties. Yields a fine crop of pods, tender flesh and of fine flavor. Not a string until too old to use for snaps. Flat pods.

113—ROUND PODDED KIDNEY WAX. Long slender pods, and stringless. Not as productive under our corn-belt conditions as the earlier varieties.

116—GOLDEN WAX. A medium early flat podded bean. Somewhat stringy. Fairly productive.

120—SURE CROP WAX. Long, slender pods, very tender. Somewhat late.

Field's First Early

Green Podded BUSH BEANS

144—BOUNTIFUL. Long broad pods, flat, thick and meaty. Stringless unless full grown. Productive.

107—STRINGLESS GREEN POD. One of the best beans ever introduced; very early and productive. Pods round and stringless even when beans are full size. Delicious flavor, tender and meaty. Several pickings can be made, as it continues to bear longer than many varieties.

112—ROUND POD VALENTINE. An old standby. Best in the Valentine class. Somewhat stringy.

109—FIELD'S FIRST EARLY. The big, broad, irregular shaped pods make a most delicious snap bean. A real quality bean for home use.

"We planted Irish Cobbler Potatoes and then Field's First Early bunch beans, getting two crops off the same ground. We canned enough green beans to have plenty for our family and sold 40 quarts at 25¢ per quart and could have sold more."—Mrs. I. W. Reynolds, Slater, Mo.

Stringless Green Pod

Vegetables at their best must be fresh.

POLE BEANS

Pole Beans for Green Shell Beans and Snap Shorts

This class, as a rule, produces beans of richer quality and are not only good for snaps but especially fine for green shell beans. Nothing better in succotash than some of the pole varieties.

Pole beans are later than bush beans which works out all right as you can use the bush varieties the first part of the season and the pole beans during the last part.

130—CUTSHORT OR CORNHILL. An old-time cornfield bean. Late, small pods and used mostly for snaps.

131—DUTCH CASEKNIFE. One of the best as a green shell bean and fairly good as a snap bean. Early and prolific. White seed.

134—KENTUCKY WONDER. The tender fleshy pods make it one of the best as snap shorts and good shelled unless you object to the brown beans. The pods are tender and brittle and it is claimed by some to be the best flavored bean in existence. The pods hang in clusters. Early and follows the bush varieties in season.

132—HORTICULTURAL OR CRANBERRY. Late, yields first-rate and is used for both snaps and shell beans.

133—IMPROVED MISSOURI WONDER. I don't know of any pole bean that would suit me better than this one. It is early, fine for snaps or as a green shell bean. Stowell's Evergreen sweet corn and this bean make splendid succotash. Store the dry bean for winter use. Good in soups and stews. Yields heavy, the long pods hanging in clusters.

139—KENTUCKY WONDER WAX. Produces a very large, handsome yellow pod, brittle, meaty, and of good quality.

137—WHITE SEEDED KENTUCKY WONDER. An early tender little bean preferred by some because of its white seed.

"I just want to say you have the best snap beans, the Field's First Early, that I ever ate or cooked."—Mrs. J. T. Bradley, Harrisburg, Ark.

YELLOW POD BUSH BEANS

	Oz.	1/4 lb.	1 lb.	5 lbs.	10 lbs.
117—New Stringless Yellow Pod	\$0.05	\$0.15	\$0.45	\$1.90	\$3.50
Early, stringless; good yield. Tender, meaty pod.					
121—Early Wonder Wax.	.05	.15	.45	1.90	3.50
Prolific, early flat pod. A dandy for home use.					
115—Davis White Kidney Wax.	.05	.10	.35	1.65	3.00
A handsome bean. Long straight pods.					
113—Round Pod Kidney Wax.	.05	.15	.45	1.90	3.50
Tender and stringless. Late.					
116—Golden Wax.	.05	.10	.35	1.65	3.00
Flat pods. Quality and yield fair.					
114—Challenge Black Wax.	.05	.15	.45	1.90	3.50
Early, round pod, medium string; prolific.					
120—Sure Crop Wax.	.05	.15	.45	1.90	3.50
Stringless, late; yields fair.					

GREEN POD BUSH BEANS

	Oz.	1/4 lb.	1 lb.	5 lbs.	10 lbs.
107—Stringless Green Pod.	.05	.15	.45	1.90	3.50
Pods stringless, tender and meaty. Heavy yield. Early.					
112—Round Pod Valentine.	.05	.15	.45	1.90	3.50
Good yield, early, medium string.					
109—Field's First Early.	.05	.15	.45	1.90	3.50
A real quality bean for home use. Early, broad flat pods.					
144—Bountiful.	.05	.15	.45	1.90	3.50
Long straight flat pods. Midseason; productive.					

GREEN POD POLE BEANS

	Oz.	1/4 lb.	1 lb.	5 lbs.	10 lbs.
133—Missouri Wonder.	.05	.15	.45	1.90	3.50
Tender fleshy pods fine for snaps or shell beans. Early, productive. Fine in Succotash.					
131—Dutch Caseknife.	.05	.10	.35	1.65	3.00
Broad flat pods; seed white.					
134—Kentucky Wonder.	.05	.15	.45	1.90	3.50
Long fleshy pods, productive; early.					
132—Horticultural or Cranberry.	.05	.10	.35	1.65	3.00
Good as a shell bean or for snaps. Late.					
130—Cutshort or Cornhill.	.05	.10	.35	1.65	3.00
Small pod; late.					
137—Wh. Seeded Kentucky Wond.	.05	.10	.35	1.65	3.00
Medium early; good quality.					

Grow Your Own Boston Baked Beans

123—RED KIDNEY. Why buy Canned Beans when you can "grow your own" and also "can your own" cooking with a National Pressure Cooker and seal the cans with a National Sealer, and if you will add a little of Field's bacon you have a superior article flavored to suit your own taste. Or you can carry the Red Kidney through the winter dry.

104—GREAT NORTHERN. A white bean for winter use. Larger than the navy and rather flat in shape.

102—WHITE WONDER. The little white navy bean. Sticks to the ribs during cold winter weather. Fine cooked or in soups.

Limas

Big Fat Limas, Rich in Protein

126—FORDHOOK BUSH LIMA. Big, plump, well filled pods. Seed thick and meaty. It is as early or earlier than any other large Lima and yields well. Bush sturdy and erect.

145—BURPEE'S IMPROVED BUSH LIMA. Better than the old Burpee's Bush Lima because it is earlier and larger. Seed thick.

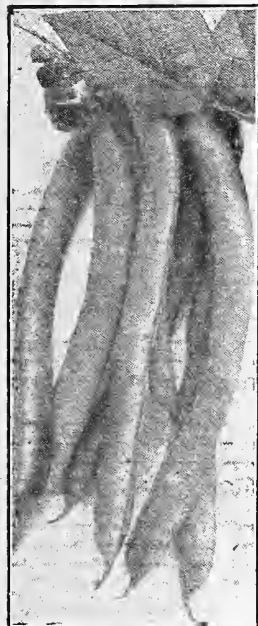

127—HENDERSON'S BUSH LIMA. A small seeded white Lima fine to use as a green shell bean or to store dry for winter use. Bears earlier than any other Lima and continues until frost. Good in succotash, or in vegetable soup.

140—EXTRA EARLY LIMA. A small white Pole Lima fine either as a green shell bean or for winter use. The beans hang in clusters and are easily gathered. Continue to bear until quite late.

142—EARLY JERSEY. The best large seeded Pole Lima for the Middle West. Most Pole Limas are too late. This one is early and productive.

"Along with a full cave of vegetables and our own meat and cream, milk and eggs, we live fine. Would you believe it if I tell you our grocery bill for the month of January amounted to only \$2.48 for groceries alone? A well cared for garden sure helps us to keep our bills down where we can reach them."—Mrs. Mildred Coffey, Russell, Iowa.

"We have all the fresh garden vegetables we want, can a large quantity and have some to sell occasionally, and also give some away each year, and also get a lot of pleasure by having a garden."—Mrs. Fred D. Barker, Mt. Ayer, Iowa.

Improved Missouri Wonder

Table Beets

Tender Half Grown Beets are Best

Plant early using about one ounce of seed to 100 feet of row. Better make several plantings so you can have them at their best.

Beets have a better flavor and are more nourishing if used before they are too large. Begin using them when quite small thinning out to make room for others. Boil these small beets, with their tops. Season with salt, pepper, lemon juice and melted butter and serve hot. You will agree that they are far better than a full grown beet.

602—CRIMSON GLOBE. A handsome appearing beet and of good quality and will suit you all right if you do not object to some white zoning.

604—DETROIT DARK RED. Flesh a deep, rich red with no light zoning. Medium sized, globe shape, crisp and sweet. They make the most beautiful dark red sweet pickles and are just about ideal for canning whole.

607—EARLY WONDER. I think this is the best real early variety to be found. A bright red with some zoning. It is rounding flat in shape, smooth, tender and sweet. When about half grown are splendid to use for creamed or buttered beets.

603—CROSBY'S EGYPTIAN. An early well-known variety. Turnip shape, bright red flesh with some zoning.

605—EXTRA EARLY ECLIPSE. Bright red, globe shape and grows to good size. Planted late a good variety for winter use.

601—BLOOD TURNIP. An old well known variety not as dark red as its name would indicate. Bright red, zoned with white.

608—LONG BLOOD. Very dark red flesh, tender and sweet. Some may object to the shape but otherwise almost a perfect table beet.

Detroit Dark Red

Stock Beets

Feed Mangels and Increase Egg Production

Use at Least 10 to 12 pounds of Seed to the Acre. Plant Early.

They make cheap feed. They increase the value of other feeds when fed with them.

They are a valuable crop, especially for dairymen and poultrymen.

They can be fed with profit to any stock that will eat them.

They keep your stock in better condition and increase the milk flow and egg production.

In feeding poultry "green feed makes greenbacks" and in winter the mangels furnish the "green feed."

A tremendous amount of feed can be grown from an acre of mangels. Records of yields are almost unbelievable.

620—GIANT SLUDSTRUP. Very large, oblong and easily pulled. The Danish Department of Agriculture reports this variety the best. Mangels are an important crop over there. They are fed mostly to dairy cows.

619—MAMMOTH LONG RED. Called by some "Gate Post" because of its large size. Grows well out of the ground and is easily harvested.

616—GIANT FEEDING SUGAR. Is a true stock beet. It grows half or two-thirds out of the ground which makes it easy to harvest.

617—GOLDEN TANKARD. A squared oval in shape, and sets entirely on top of the ground.

HENRY FIELD CO.

Cabbage

In Salids Fresh Crisp Cabbage is Best

You will have your best luck with the earliest and latest plantings of cabbage. However, you should plant to have a supply right through the season.

Cabbage is from Nature's drug store and is a tonic, food and medicine. It furnishes food elements to make bone and teeth; to keep the stomach healthy; to make good rich blood and strong muscles. Kraut juice is as healthy and refreshing as orange juice.

Early Jersey Wakefield

522—EARLY JERSEY WAKEFIELD. My strongest recommendation for this variety is its earliness. Comes ahead of anything else. Small, solid, pointed heads just the right size for one meal. Plants can stand close together which is quite an advantage in a small garden.

518—CHARLESTON or LATE WAKEFIELD. Not as early as Early Jersey Wakefield but larger.

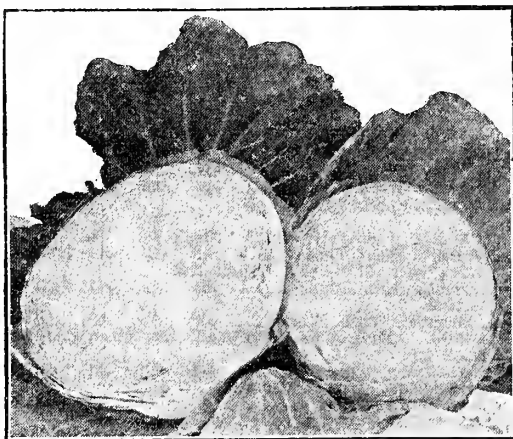

527—NORSEMAN. Valuable as an early variety and will also keep well for winter use when planted late. Crisp and sweet flavored. If I could plant only one variety I would be perfectly happy with this one. Almost if not quite as early as Early Jersey Wakefield. Heads medium size, round, very solid with leaves closely over-lapping.

521—EARLY FLAT DUTCH. A good sized flat head, rather coarse, fairly solid, second early.

516—ALL-HEAD EARLY. Fine as a midseason or summer variety. Heads firm, rounding-flat; flesh crisp and tender.

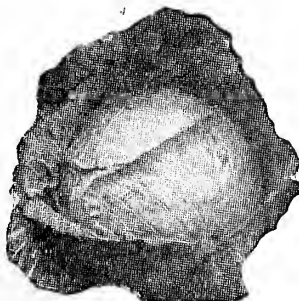

"Along one side of the garden I have 200 Asparagus plants and one dozen Rhubarb. Had enough Asparagus from the plants for the family of five and canned 15 quarts, and the Rhubarb furnished us with early pies and sauce. Asparagus and Rhubarb should be in every garden. When once established they almost take care of themselves."—Mrs. Frank Straka, Garwin, Iowa.

Late Cabbage for Storage and Kraut

Norseman

532—HOLLANDER OR DANISH BALLHEAD. The heads are round, medium to large size, solid and heavy. The flesh is fine grained, tender and mild flavored. Ours is the famous "Short Stem" strain of this variety. During the winter shipped and sold in all parts of the country.

All-Head Early

539—CHINESE CABBAGE. It can be used any way that Cabbage or Cauliflower can, or as lettuce is used. Plant same time as late turnips.

538—SUREHEAD. A medium to large winter variety. With average conditions every plant should make a head. Flesh firm, good quality.

535—PREMIUM FLAT DUTCH. A well known reliable winter variety. Heads firm, of good quality.

"I have used your Norseman cabbage seed for 8 years and have yet to find any better early cabbage, and if planted late it makes very fine cabbage for winter. Norseman is the best in this country."—Mary E. Cerveny, Scottsbluffs, Nebr.

Vegetables Contain the Valuable Vitamins you need.

Frost Proof Cabbage Plants

Good roots, fresh plants, carefully packed

Hardy outdoor grown, wintered over plants. They will stand our spring frosts and bad weather without serious setback. Sold in even one hundred lots of a variety. We will be glad to select your varieties if you wish or you can. Wakefield, Norseman, Allhead, and Early Flat Dutch. Postpaid price, 50c per 100; \$1.00 for 200; \$2.00 for 500; \$3.00 for 1,000.

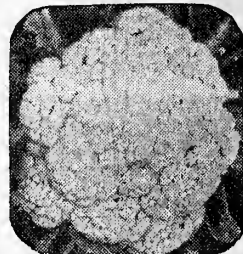

Start early in house or hot bed

A compact, snowy white head of cauliflower is as easily grown as a cabbage head if planted early and on good soil. It has a mild cabbage flavor and is very tender. Boil and serve with cream sauce or buttered. One of the best vegetables for mixed sweet pickles.

556—DRY WEATHER. The outer leaves are larger and stand more erect which protects the head from the hot sun. Large compact heads, pure white, tender and very mild flavor.

558—EARLY SNOWBALL. Beautiful snowy white heads, very early, compact, tender and of good quality.

Dry Weather

"Cabbage, the best we ever raised. They were late and just right for kraut, and to store. Stored one barrel wrapped in paper which kept fine. We use cabbage raw, cooked, in soups and a nice leaf of cabbage between slices of buttered bread makes a fine sandwich."—Mrs. T. A. Street, Humphreys, Missouri.

OUR OLD CUSTOMERS

Letters from our old customers. You'll find others scattered through the catalog. How many years have you been buying seeds of us? Just mention it when you send your order in.

"We have used Field's garden seeds for seven seasons and this will be the eighth, as we will soon send in our order. They have always been sure growers and every seed sprouts so don't plant them too thick."—Mrs. Earl Scott, Coggon, Iowa.

"I have used Henry Field's seeds for 12 years, ever since I have been a farmer's wife. We always have a big fine garden. Plenty to use all summer; plenty to store for winter and plenty to can."—Mrs. Frank Wilhams, Marysville, Kans.

"We have been buying garden seed and some plants and trees from you for 28 years or more. We have found them very satisfactory with a few exceptions."—Mrs. Mary M. Varley, Shenandoah, Iowa.

Celery

For Crisp Sweet Celery Serve Fresh From the Garden

It is not hard to grow. Detailed instructions on the back of each package of seed.

There are many ways of serving celery besides in its natural state. It is one of the best vegetables for salads, soups and for seasoning, and there are a number of ways for serving it cooked.

Golden Plume

Many people do not know what good celery tastes like, simply because they have never tasted good crisp celery, fresh from the garden.

661—GIANT PASCAL is the best for Winter use. It is a rank grower, hardy, disease resistant, but is not ready for use until stored, then it will bleach out and produce Celery of the finest quality.

662—GOLDEN SELF BLEACHING. Stalks are tender and of fine quality. Hearts are firm, crisp and delicious. A golden yellow easily bleaching to a creamy white.

660—GOLDEN PLUME. This variety will produce, in your own garden, crisp, tender celery with that good flavor that you very, very seldom find in shipped in celery. With ordinary care and good soil Golden Plume will produce large, handsome bunches, a golden yellow when bleached. Stalks crisp and tender and a good celery flavor.

For Health Use Carrots in Salads, Soups or Creamed.

Table CARROTS in greatest demand

Plant early. One packet of seed will plant about 50 feet of row. Cook them with meats or alone; serve them in salads, and use them in flavoring soups. They make as good a pumpkin pie as a pumpkin, and are easier digested. And in salads they are delicious.

626—CHANTENAY. A medium sized stump root, deep orange red, smooth and handsome. Tender and well flavored.

627—DANVERS HALF LONG. Medium large, rather pointed and makes tremendous yields. Grow a good supply of this variety for winter storage to be used in soups, stews and in other ways.

633—EARLY ORANGE. A bright orange that holds its color well when cooked. Roots large, smooth and tapering.

630—NEW CORELESS CHANTENAY. This variety has a small heart or core which will cook up as tender and sweet as the outside meaty part does. Being tender and crisp it is fine for dicing for salads and soups. The roots are medium size, smooth with a blunt or stump end. Color a deep rich orange.

629—OXHEART. Very thick, short, medium sized carrot. Plant this variety for early use, pulling the tender half-grown roots which you will find very sweet and mild.

New Coreless Chantenay

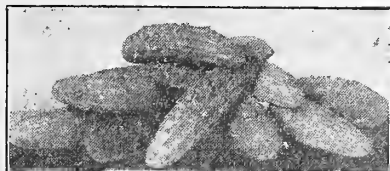

CUCUMBERS

Cucumbers Right From the Garden are Cool and Crisp.

Plant when the ground is warm. Figure about three dozen hills to a packet of seed or 100 hills to the ounce.

Cucumbers are a cooling summer vegetable and to be at their best should be served fresh. Spongy shipped in fruit can never equal the fresh fruit from your own vines, either for pickles or slicers.

You can have them in abundance, from your own garden, if you plant on rich soil where they can make quick growth. If they grow fast the bugs will not bother them as bad.

Heinz's Pickle

Resist disease to some extent. Small and well shaped fruits, suitable for small sweet pickles.

357—EVERGREEN. Dark green in color and fine for dill pickles. **358—EVERBEARING.** A short early sort used for pickles. Fairly prolific.

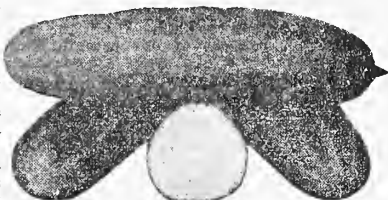

356—HEINZ'S PICKLE. This variety of cucumber is used by pickle factories and is probably the best pickle variety in existence. It sets on thick and can be cut for small pickles or will make dill pickle size. It has been carefully selected for size, quality and production, until it is just about perfect as a pickle variety.

Slicing Varieties

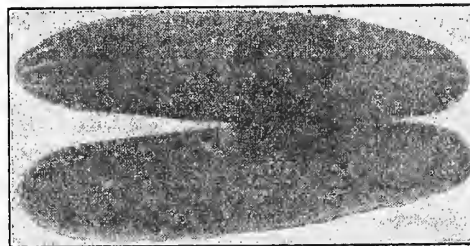

364—DARK GREEN SLICER. Handsome, smooth, straight fruits of a deep green color and "Stays Green" a long time. Flesh firm and crisp and pure white. A mighty good slicing variety.

354—EARLY CLUSTER. Like most earlies it turns yellow quickly and should be used while comparatively small.

360—HENDERSON'S PERFECTED WHITE SPINE. A medium early slicer, dark green shading to lighter green at blossom end. Flesh is firm, crisp and of good quality.

Dark Green Slicer

Improved Long Green

chickens. Still have plenty of cabbage, onions, carrots and vegetables of all kinds (February 17th).—Mrs. W. R. Hedges, Scranton, Iowa.

For EGG PLANT (See Page 14)

"I am reminded of a lady who told me that the doctor had advised her husband to join the Golf Club. She said, 'I told him it would do him just as much good to hoe in the garden and would not cost him a hundred dollars either.'—Mrs. Wm. Stegman, Hope, Kansas.

Long, slender dark green slicer.					
363—White Spine.		.05	.15	.35	1.00
Well known old-time slicer.					

Fresh Vegetables are Best

HENRY FIELD CO.

LETTUCE

Lettuce Rich in Health Giving Vitamins

One packet of seed will plant about 50 feet of row. Plant early.

Those who should know, tell us that the green loose leaf lettuce is richer in vitamins than the bleached head lettuce. And furthermore, because of our climate here in the Middle West, the loose leaf varieties are easier grown than the head varieties. However, good head lettuce can be grown here in this section if you will plant early and on rich soil.

Head Varieties

Iceberg

506—MAY KING. A small variety forming a compact cluster of leaves.

507—NEW YORK OR WONDERFUL. Used almost altogether by the commercial growers out west. Forms a compact head of good quality. It likes cool weather and rich soil.

503—CALIFORNIA CREAM BUTTER. A small early variety, smooth leaf, cabbage-head type.

"The beans were the best we ever ate, green podded, very meaty and so tender. The peas were equally as good. The great big pods and peas were so tender and sweet. It was the best garden we ever had and all the seeds came from Fields."—Mrs. O. G. Hairgrove, Coody's Bluff, Okla.

Loose Leaf Varieties

509—BLACK SEEDED SIMPSON. One of the most popular for early use. Grows a loose bunch of tender, light green or creamy leaves. It is of delicate flavor and grows very quickly.

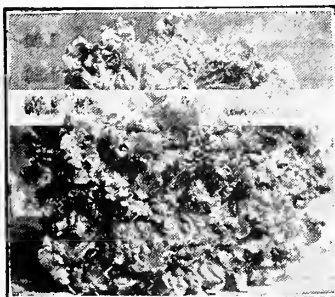

510—GRAND RAPIDS. A loose leaf variety. Leaves crinkled and fringed making an especially fine variety for garnishing. Sometimes tough.

513—EARLY CURLED SIMPSON. A quick growing hardy variety. Crisp, light green crumpled leaves of good quality. While it is not a head variety it forms a tight bunch of leaves, at the center, which are very tender and sweet.

511—PRIZEHEAD. The heart forms a tight cluster of leaves which are very crisp and tender. Leaves tinged with brown, curled and crumpled. It is sweet and mild flavored after hot weather begins, which is unusual in a lettuce.

New York or Wonderful

Early Curled Simpson

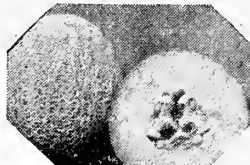

"There are six in our family and from five rows of sweet corn we used what we wanted, canned 15 pints and dried 3 quarts. Canned 8 gallons of snap beans besides what we used; had 12 quarts of beets; quite a few carrots and cauliflower; canned several peas (forgot how many); had oceans of radishes and lettuce, and Oh, my, the cabbage! I used them every way I could think of. And tomatoes! Well, I canned 10 gallons and gave away bushels."—Mrs. W. E. Hughs, Lucerne, Missouri.

Muskmelons

One for Breakfast Every Morning

Plant when ground is warm, figuring about 3 dozen hills to the packet of seed or about 100 hills to the ounce.

The wonderful fragrance and flavor of muskmelons seems to be Nature's way of coaxing us to eat more, and there is no danger that we will eat too much if the melon has ripened on the vine and is not stale. They ought to be pulled early in the morning while still cool. Such a melon is not only delicious but very healthful.

White Seeded Delicious

It is a medium sized well-netted melon; flesh firm, fine grained and a rich salmon color. It is a good cropper and carries well. The name is a good one for it describes the quality of the melon.

330—EARLY HANOVER. A new melon said to be the earliest yet. Has been known to ripen in 60 days. Green meated and a trifle larger than a Rocky Ford.

332—FIELD'S DAISY. Medium sized, thick orange colored flesh and smooth. Medium early, uniform in size and quality. Allow them to ripen on the vine and you couldn't ask for a more delicious melon.

334—GREELEY WONDER. I well remember the first one I ever sampled and I thought at the time that certainly a person could not ask for anything much better. Rich orange colored flesh, fine grained, fairly early, large, well-netted and almost round in shape.

345—HEARTS OF GOLD. Gets its name from the golden-yellow flesh, which is very sweet and fine flavored. Almost round, fairly well netted, medium early and productive. Very popular with the fancy trade in Michigan.

333—HALE'S BEST. We recommend it chiefly because of its earliness. Orange-yellow flesh.

Field's Daisy

(Muskmelon Prices Continued on next page)

337—**HONEY DEW.** Green fleshed, sweet and luscious with a different flavor from the ordinary cantaloupe.

342—**PERFECTION.** A large, well-netted, showy melon; yellow skin, orange colored flesh, sometimes a little coarse but as a rule fine grained.

343—**POLLOCK TEN-TWENTY-FIVE.** A small Rocky Ford type melon. If planted on good soil will produce a thick fleshed melon with small seed cavity, ripening close to rind, and flavor is good. Orange-yellow flesh.

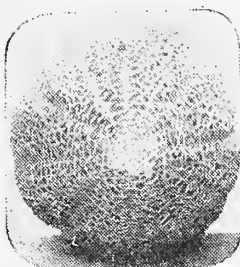

341—**OSAGE.** Medium sized with smooth fine grained flesh, of fine quality. Practically every melon is a good melon, sweet and spicy.

328—**CALIFORNIA CREAM CANTALOUPE.** Is the largest Muskmelon we list and if that is what you want, here it is. Yellow skin, yellow flesh, and big.

335—**GREEN MEATED NUTMEG.** The old-fashioned little Nutmeg Melon. Very early.

329—**EDWARDS' PERFECTO.** Flesh salmon color, and of good quality.

"We planted Greeley Wonder Muskmelons and they were a wonder. Delicious, sweet, juicy and the best that grows."—Mrs. W. H. Dennman, Des Moines, Iowa.

Hearts of Gold

See page 8 for onion sets.

Riverside Sweet Spanish

Ohio Yellow Globe is a medium sized onion, skin a pure deep yellow. Flesh firm and of good quality. **Yellow Globe Danvers** is very much like it, differing in minor points only. Both keep and ship well. While the **Giant Prizetaker** shows the same color, it is larger, a milder onion and keeps fairly well. It is not as popular a market sort as the two mentioned above but better liked for home use.

A mighty fine yellow variety that is fast coming into popularity is the **Riverside Sweet Spanish**. It is a globe shaped onion and yields heavy. Very mild in flavor. Ranks next to the **Bermuda** in that respect. A valuable characteristic is its resistance to Thrip, that tiny insect that causes "White Blight." It will remain healthy and green while other varieties are half dead. Also a splendid keeper. It is a splendid onion for home use as well as a popular market sort, a combination not often found.

In an early yellow onion we have the **Mountain Danvers**, that is a good market variety. It ripens up solid without any "thick necks," or "doubles" and keeps well. It has a good bright color. Because of its earliness it is fine for sections where the seasons are short or anywhere an early onion is needed.

In a red onion the **Mountain Red Globe** has a good globe shape, dark red, ripens evenly and keeps and ships well. It is similar to **Mountain Danvers** except in color. The **Large Red Globe** is something like it but not as early. This variety has been a good standby for a long time. Color a deep purplish-red, flesh white, fine grained and crisp. Very popular where a red onion is wanted. **Red Weathersfield** is an old standby of good quality but does not yield as well as the globes.

The **Southport White Globe** is a late maturing onion, medium size and solid. Sometimes greened by the sun. **Silverskin** or **White Portugal** is medium size, pure white, earlier than **Southport White Globe** and a good keeper. Can be used for pickles or onion sets. Another white onion, still earlier but lacks keeping quality is **Silver King**. It is also suitable for pickles if planted thick. It is medium sized and very flat. The **New Queen**, another early white onion is used quite extensively for pickles.

"I ordered a package of your **Riverside Sweet Spanish** Onion seed last year and was more than pleased with them. I planted them in March, they came up fine and when time to thin I transplanted two hundred and they all made lovely big onions, just as sweet and solid as you could ask for."—Janie Copeland, Grinnell, Ia.

BERMUDA ONION PLANTS

A Very Mild Sweet Onion

For onion sets see page 8

This is the big, mild, sweet onion that is grown in Texas and sold on the northern markets at high prices. We have found that by growing them from plants we can grow them just as large and mild and sweet as they do in Texas. They come quick and you can use them for green onions or you can allow them to reach full size, which ordinarily is 3 to 5 inches in diameter.

Order the plants early. We turn down orders every spring that reach us after we are sold out. Set them out when you make your first garden. They will stand a little frost without injury. They must be ordered in even amounts as specified below, as they come packed in no other way. Crate orders for the far west will be shipped direct from growing station.

You can order as many bunches of 300 or 800 or 1,000 as you please, but we cannot break them up in small amounts. Price 300 for 45c; 800 for \$1.00; 1,000 for \$1.25; 2,000 for \$2.40, postpaid. Crate of 6,000 for \$4.50, not prepaid.

"We do not care to raise Bermuda onions to sell. We get a thousand plants, but, my! they are too good to sell. We eat them three times a day and between meals. They are so mild and sweet. We use them in sandwiches and seasoning and what is better than cornbread and beans and Bermuda onions? We will never be without onion plants."—Mrs. F. L. Fox, Moulton, Iowa.

Parsnips

Parsnips for Winter and Early Spring

Plant early figuring an ounce to 200 feet of row.

To develop that good parsnip flavor and sweetness, and make them more tender, store them out-doors in a very shallow pit where they will freeze. They will taste so much better than they did before freezing that you will not recognize them as the same parsnips. Or you can leave them in the ground where they grow.

203—**HOLLOW CROWN OR LONG SMOOTH.** White skin, flesh fine grained and tender. Well flavored and sweet.

Like the above but a little shorter.					

Kraut Juice is
Healthy

HENRY FIELD CO.

New Potatoes and Creamed Peas

Plant smooth seeded varieties very early and others when ground is warm. Use about one pound of seed to 100 feet of row.

Those who have never used Peas fresh from the garden can hardly realize how tender and how much better the flavor is than the peas that have been carried a day or two at the store or than canned peas.

Early Varieties

146—EXTRA EARLY ALASKA. The earliest variety of Peas grown. They grow about knee high and get very full of rather small, dark green pods. This is a hardy variety, the seed is smooth and can be planted just as early in the spring as you can make garden.

143—IMPROVED EXTRA EARLY. A smooth seeded early variety that has made sensational records both as to earliness and yield. Dwarf vines and medium sized well-filled pods. Try planting this variety very early when you make your first garden and follow later with Little Marvel.

151—LAXTONIAN. The shortest vine of any with a pod as large as the largest. Very early for a wrinkled variety. Yield fair and quality very sweet and delicious.

152—LITTLE MARVEL. It is an early dwarf wrinkled pea. Its strong points are yield and quality. The vines are simply loaded. The pods are full of peas. They are tender and sweet. Use this variety when you have new potatoes and creamed peas.

161—ENGLISH EARLY. We have three large podded, dwarf varieties of which this is the earliest. They are all the wrinkled or sweet peas. Plant all three at the same time, when the ground is warm and one will follow the other, making very good succession.

147—FILLBASKET. It "fills the basket" quickly because the pods are large and there are lots of them. One of the smooth-seeded sorts that should be planted very early. It is not necessary to support the vines.

150—GRADUS. Grows a tall, slender vine which is sensitive to dry weather and heat. For this reason the yield is not certain.

MIDSEASON VARIETIES

159—DWARF CHAMPION. Plant these for your main crop and to follow a variety such as Fillbasket. A good one for home canning as it yields well. The pods are medium sized, well filled and of good quality.

160—DWARF GRAY SUGAR. The pods of the pea have a tender hull and can be broken up and cooked, pods, peas and all, just like string beans.

162—ENGLISH SECOND EARLY. Much the same as the English Early but later.

154—PREMIUM GEM OR LITTLE GEM Is a good dwarf variety.

LATE VARIETIES

167—ALDERMAN. The best among the "stick peas" or tall late varieties. It should be "brushed" or trellised. Very large dark green pods. Bears continuously for a longer time than other varieties. Quality fine.

Dwarf Champion

163—ENGLISH MAIN CROP. Late, large pod pea. Dwarf.

165—STRATAGEM. Is an old reliable, large-podded variety of very high quality. It has a dwarf vine and this is the principal difference between it and Alderman.

157—EVERBEARING. If season is favorable it will continue to bear longer than most varieties. Medium sized well filled pods and quality very good.

149—AMERICAN WONDER. An old standard variety, very dwarf and medium early.

"I canned 45 jars of peas, sold about 50 pounds, besides having peas every day for a family of five.

"I started using my sweet corn the first week in July. We ate all we wanted and I made 35 quarts of corn relish and dried about 30 pounds.

"From 19 rows of popcorn about 15 feet long, I picked a little over four bushels."—Mrs. T. A. Sugden, Syracuse, Nebr.

Extra Early Alaska

medium size and crowded full of peas. They are tender and sweet. Use this variety when you have new potatoes and creamed peas.

They are all the wrinkled or sweet peas. Plant all three at the same time, when the ground is warm and one will follow the other, making very good succession.

It "fills the basket" quickly because the pods are large and there are lots of them. One of the smooth-seeded sorts that should be planted very early. It is not necessary to support the vines.

Grows a tall, slender vine which is sensitive to dry weather and heat. For this reason the yield is not certain.

MIDSEASON VARIETIES

Plant these for your main crop and to follow a variety such as Fillbasket. A good one for home canning as it yields well. The pods are medium sized, well filled and of good quality.

The pods of the pea have a tender hull and can be broken up and cooked, pods, peas and all, just like string beans.

Much the same as the English Early but later.

Is a good dwarf variety.

LATE VARIETIES

The best among the "stick peas" or tall late varieties. It should be "brushed" or trellised. Very large dark green pods. Bears continuously for a longer time than other varieties. Quality fine.

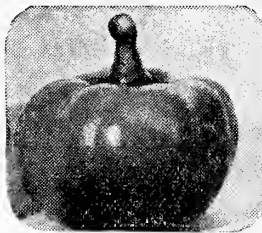

Little Marvel

Carrots will make as good a Pumpkin pie as a Pumpkin.

Sweet Peppers Mild and Sweet

They are all mild and sweet except the Cayenne, which is supposed to be hot and the Bullnose which is just a little peppery and fine for pickles. The seed is kept pure and you can feel confident that when you bite into a pepper grown from our seed you will find it as represented, mild and sweet.

Early Sweet Pimento

639—EARLY SWEET, PIMENTO. Very sweet and mild, rounding flat in shape, medium size, thick meat, bright red color when ripe and never hot or bitey. Can be used in many ways and just the variety for sandwiches and cheese salads.

641—WORLD BEATER. A medium large mango pepper, thick flesh, sweet and crisp. May be used for any purpose but especially fine for stuffing. Somewhat larger than the old Ruby King.

646—EARLY SWEET NEAPOLITAN. Flesh not as thick as that of the later varieties but is sweet and mild. Early and prolific.

SWEET PEPPERS (Continued on Next Page)

Onion Sets

Sets are grown mostly for early green or bunch onions. None above an inch and most of them much smaller. Can furnish Yellow and White.

317—YELLOW BOTTOM SETS. We like the yellow sets best of all. They are nice bright sets.

318—WHITE BOTTOM SETS. Some prefer white sets because of their appearance.

Main crop; prolific. Medium sized pod. Good quality.					
165—Stratagem.	.05	.15	.40	1.65	3.00
Large pods. Late. Good quality.					
157—Everbearing.	.05	.15	.40	1.65	3.00
Main crop, medium sized pod. Prolific.					
149—American Wonder.	.05	.10	.35	1.50	2.85
Very dwarf; early. Small pod.					
154—Premium or Little Gem.	.05	.10	.35	1.50	2.85
Second early; medium sized pod.					
160—Dwarf Gray Sugar.	.05	.10	.35	1.50	2.85
Edible pod. Use like snap beans.					
167—Alderman.	.05	.15	.40	1.65	3.00
Large pods; late, tall, long bearing; fine quality.					

SWEET PEPPERS

Postpaid Prices	Pkt.	Oz.	1 lb.
639—Early Sweet Pimento.	.10	.50	1.50
Sweet, mild, thick meat. Small to medium size.			
641—World Beater.	.10	.50	1.50
Thick flesh; sweet and crisp. Good size for stuffing.			
646—Early Sweet Neapolitan.	.05	.40	1.00
Early and prolific. Small size.			

Sweet Peppers (Continued)

647—HARRIS EARLY GIANT. An early sweet pepper that has just the qualities most people like for home use. First it is a fine size for stuffing. It is also fine to use in chopped pickles. The flesh is thick and always mild and sweet. It begins bearing early and if the peppers are gathered regularly will continue a long time.

640—CHINESE GIANT. The largest of all mango peppers but late and does not set on heavy except farther south.

645—RUBY KING. It is a medium sized Pepper, sweet and tender and medium early.

644—SPANISH PIMENTO. The well known heart-shaped or pointed variety. Not as prolific in the North as farther South where the seasons are longer.

643—BULLNOSE. It is sometimes used for mangoes, but some are a little hot for that and not quite large enough. It is best used in pickles.

636—LONG RED CAYENNE. This is the real red-hot kind; grows 3 or 4 inches long.

"I had an abundance of early peas. I canned 20 quarts besides having plenty on the table fresh. I also raised plenty of radishes, lettuce, parsnips, salsify and green beans, also sweet peppers.

"I had very nice Red Head tomatoes, canned over 100 quarts and had some to sell, all from 50 plants.

"From one ounce of White Spine and 1 packet of Heinz Pickle I raised 25 bushel of pickles, dill size. Canned 50 quarts of pickle and the rest sold at \$1.00 per bushel.

"I also raised 10 bushel of Turnips on the ground that was in early peas. This turnip seed was sowed in July and produced a fine crop.

"We can enough fruits and vegetables to last all year. The total last year was 450 quarts. So there are only a few things that we have to buy at the grocery store.

"I also had a nice flower garden. The Zinnias that I got from you were very large, some of them measuring 6 inches across."—Mrs. Frank Straka, Garwin, Iowa.

World Beater

Popcorn

Popcorn for the Boys and Girls and Everybody

197—SOUTH AMERICAN. A jumbo size when popped. Large fluffy grains a creamy yellow, with a fine flavor. A large eared yellow variety. Pops to beat the band.

195—JAPANESE HULLESS. Pops out snowy white, very tender and without the annoying hulls. Has a sharp pointed, deep grain, and a short chunky ear. If you expect to sell your crop grow this one as it is better known than any.

PUMPKINS

"When the Frost is on the Pumpkin"

You might just as well grow a few pumpkins, at least, if you live on a farm. You couldn't do it very well in town without running your neighbors out, for pumpkins are rank growers. However, you will have plenty of room on the farm. Even if you are a little crowded you can plant them along the edge of the corn. They will do fine there. Grow your own "pie timber" and plenty for your stock as well.

762—BIG TOM. Yields a heavy tonnage of mighty good stock food. Round to oblong in shape, skin a reddish-yellow; flesh a deep orange.

766—SMALL OR RED SUGAR. One of the best Pie Pumpkins. Early, small, prolific, fine grained, cooks quickly and of good quality. One grower of this variety reports 62 pumpkins from one vine, none less than two pounds in weight. Can you beat that?

761—BUFF PIE. Fine grained, flesh thick and of good quality. Rather flat in shape, grows to a good size, yields heavy and is used for stock as well as the table.

765—WINTER LUXURY. Small to medium size, fine for table use; a good keeper.

763—LARGE CHEESE. The flat, cream colored, well-known "Sweet Pumpkin." Suitable for stock or table. Used extensively for canning.

764—YANKEE FIELD OR COW PUMPKIN. An old standby used for feeding stock. Large and productive. Color a deep yellow.

769—MAMMOTH WHALE. Probably the largest pumpkin grown.

"For beets I plant Detroit Dark Red, also can these for winter as I find they are so good in color.

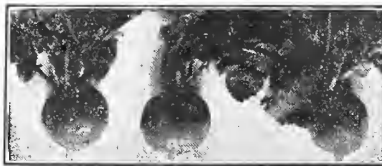

"Oh, yes, I almost forgot Parsnips! We like Hollow Crown best. They are fine when boiled until tender and browned in butter."—Mrs. Hank Bordner, Hopkins, Missouri.

RADISHES

Fresh Crisp Radishes
a Table Dainty

Plant early using about one ounce of seed to 100 feet of row.

Make several plantings, say a week or ten days apart, and use them before they are pithy and tasteless. If you like the little early sweet varieties, have them on the table often, during radish season, while they are good.

The radish is another vegetable that must be used while fresh and crisp to be at its best. Don't spoil your appetite for them by eating "out of season" radish. They are only poor imitations of fresh, crisp radishes right from the garden.

Crimson Giant

453 — ALL-SEASON MIXTURE.

A mixture that includes just about everything, both early and late, little round ones, long ones, half long and all Radish colors.

Early Round Varieties

437—CRIMSON GIANT. An early round red that will usually stand until it is almost as large as a ball and not get pithy. Snowy white flesh, crisp and sweet.

441—SCARLET TURNIP WHITE TIP. A very attractive little early radish. Color a bright scarlet with a white tip. Dainty in appearance, tender and sweet.

RADISHES (Continued on Next Page)

"With 10c worth of parsnip seed I have raised 7 bushel of parsnips, and have half the seed left, and sold the parsnips for 4c a pound, so you can see what a profit I had from a nickel's worth of seed, but I think my success is in planting Henry Field's seeds, as some of the parsnips weighed two pounds."—Mrs. Chas. W. Hundley, Clay Center, Kansas.

Solid and sweet until large. A round red.					

Creamed Asparagus
on toast is great.

HENRY FIELD CO.

Radishes, Early Varieties (Continued)

440—EARLY SCARLET GLOBE. A round bright red, tender little radish that is among the first ready to use.

441—EARLY BIRD. An early, round bright red, the same as Early Scarlet Globe.

442 — FRENCH BREAKFAST. Oblong in shape, tipped white; small, early, very quickly becomes pithy after reaching full growth.

443—Early ROUND DARK RED. The name is a very good description of it except that no idea of quality is given and that should not be overlooked. Flesh snowy white, crisp, sweet and tender.

446—SAXA. Extra early variety. Brilliant scarlet, perfectly round, small tap root, small top. Crisp, mild, flesh a snowy white, tender, sweet.

Early Round Dark Red

Long Varieties

449—LADY FINGER. A long, slender, white radish, will stand longer than early varieties and not become pithy. Agreeable snappy flavor, liked by many.

448—WHITE ICICLE. An early medium long radish, pure white and very tender. It is mild and sweet, in fact, in every way an ideal radish unless you prefer a colored radish to the pure white. We have sold it for years and years and it is more popular now than ever. I think the quality and earliness are largely responsible for its popularity.

451—LONG SCARLET. One of the earliest and most popular of the long radishes. Mild and sweet early in the season, later becoming somewhat pungent which is not objectionable to many people.

454—CHINESE ROSE WINTER. Do not do well planted in the spring but should be planted when late turnips are, during late July.

"We raised radishes all we could use until the weather was hot and used great dishes of them twice a day, also lots of peas and beans, more than we could use, and gave lots away. We also had onions, carrots, beets, cabbage and tomatoes to use all summer. I canned 150 quarts of tomatoes—gave away five hushel, and had more than two hushel for green tomato pickles. We made eight gallons of kraut and put 25 heads of cabbage in the cellar."—Mrs. Gordon Endsley, West Branch, Iowa.

White Icicle

SALSIFY Or Vegetable Oyster

After the roots have frozen and when properly prepared for the table it has a distinct oyster flavor. Instead of using milk, or milk and cream, use cream diluted with water and the flavor will be vastly improved.

It is one of the best vegetables for soups but there are a number of other ways of preparing it. Try escalloping it as you do oysters, using diluted cream as above. There is nothing finer. Store outdoors in a shallow pit right along with your parsnips.

208—MAMMOTH SANDWICH ISLAND. This is by far the best variety. Long slender roots, flesh white.

New Classification of Pumpkin and Squash

The Iowa Agricultural State Experiment Station has reclassified Pumpkins and Squashes. For fear of confusion we are listing them as we always have, but following each variety name we give the new classification if it is different from the old. If interested write the above station asking for Bulletin No. 244.

SQUASH

Use Squash Baked and Buttered or in Pies.

For most appetites Winter Squash will serve the purpose of at least two vegetables, squash and certain varieties of sweet potatoes. It is hard to say which is the better, a dry mealy winter squash, properly seasoned and buttered, or the sweet potato.

The Patty Pan or scalloped varieties may be used when no larger than a silver dollar and the more you pull from the vine the more will set on. Roll them in beaten egg and cracker crumbs, just as you do eggplant, and fry.

736—BANANA. Two feet long or more and 5 or 6 inches in diameter. Skin a grayish green and orange colored flesh of good quality. Has a tough shell but not hard like Hubbard. Keeps well.

740—DELICIOUS. Well suited to its name. Flesh a deep orange, very thick and of good quality. Keeps well through the winter. Very early.

745—GENUINE HUBBARD. Big, warty, hard shelled, dark green Winter Squash; prolific, and of fine quality. Keeps all winter.

739—CUSHAW or CROOKNECK. (Pumpkin). The neck or crook is the edible part, it being solid flesh. Slice and fry in beaten egg and cracker crumbs, or it can be prepared as other squashes or pumpkins are.

743—FORDHOOK. (Pumpkin). A small squash about the size of a big ripe cucumber. Cut in halves and bake. Early and a very good keeper.

747—EARLY WHITE BUSH SCALLOP. (Pumpkin). Most popular when used before half grown. Can be used when not more than a couple of inches in diameter. Delicious prepared something like you do Egg Plant. It is very prolific and disease resisting.

751—SUMMER BUSH CROOKNECK. (Pumpkin). A golden yellow and should be used only when immature. Very early.

753—KITCHENETTE HUBBARD. Has all the good qualities of the large Hubbard and as a rule is small enough for the average family to use at one meal with none to go to waste. A good keeper, flesh fine grained and of splendid quality. One of the best baking squashes.

750—SIBLEY OR PIKE'S PEAK. Small, light gray Squash of most excellent quality.

752—TABLE QUEEN Or DES MOINES. (Pumpkin). One of the finest little baking squashes grown. Also one of the earliest. However, it is not a baking squash alone. It will make splendid pumpkin pies. It is about the size of a quart cup, shaped like an acorn and will keep well for winter use. Said to resist insect attacks.

Kitchenette Hubbard

"I raised more garden from seed I got from you than I knew what to do with. When frost came there was garden stuff that went to waste. The New Stringless Yellow Pod beans were just fine. Had green beans all summer. The Fillbasket peas had such a rich creamy flavor. Early Curled Simpson lettuce was tender and crisp when 12 inches high."—Oscar Walker, Jarbalo, Kansas.

"We have ordered from you for many years, perhaps 20 years, and have always found them the very best. We always have a good garden and plenty of it."—Mrs. T. L. Russell, Winfield, Ia.

Small, good keeper. Said to be resistant to insect attack.					

SWEET CORN

Fresh Pulled Corn Has the Best Flavor

Even though you have only a small garden spot, plant a little Sweet Corn in order to sample freshly pulled corn. You no doubt have heard that it loses its flavor after it stands awhile, and that is true. Pull it at the right stage of growth, while in the milk and use it within an hour or so afterward, and then tell your neighbors how much better it is than stale corn.

Early Varieties

183—EARLY MAYFLOWER. It originated in the New England States where the seasons are short and is about the earliest we have. The quality is good which is not always the case with the very early sorts. The ear is not large but good sized for an early, usually 10 rows or more.

172—WHITE MEXICAN. A small eight-rowed early variety. Earliness is its chief value.

177—GOLDEN BANTAM. Early, eight rows and yellow corn. One of the most popular varieties ever introduced.

178—MT. GROWN GOLDEN BANTAM. Instead of eight rows it has ten or more. It has good quality and with all these advantages it is just as early as the true Golden Bantam. Rich creamy yellow when ready to use; sweet and tender.

174—EARLY SUNSHINE. Here is real quality in an early Sweet Corn. One of the best in the golden-yellow class. A larger ear and earlier than the Golden Bantam. Very tender and sweet and stands longer without getting hard than other varieties. Twelve rowed.

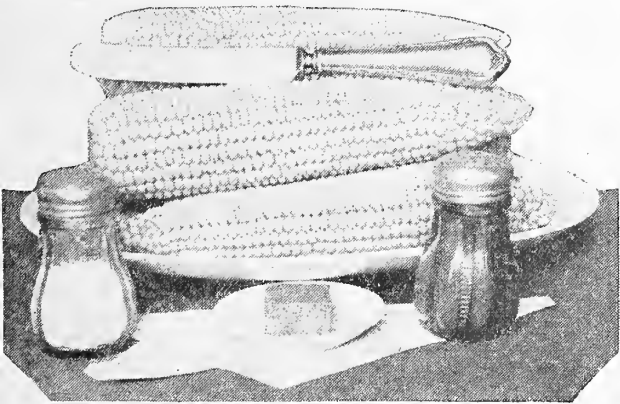

Midseason Varieties

180—EARLY CHAMPION. A good sweet corn to follow the very early varieties. Ear medium sized with not a very deep grain but real good quality.

181—EARLY EVERGREEN. Some earlier than Stowell's Evergreen and should be classed as Midseason.

Late Varieties

189—COUNTRY GENTLEMAN. Zig zag rows, long slender grains, tender and juicy. Medium sized ears not too large for serving on the cob. Hard to beat for quality.

Stowell's Evergreen

188—STOWELL'S EVERGREEN. We have an extra good strain of this variety this year. Deep pearly white grains that are sweet and juicy. It makes a better canning variety because more good corn can be cut from a deep grained ear. It is just the variety for Succotash, that old New England Dish of fresh corn and shelled beans. One of the best varieties for roasting ears. A good all-purpose sweet corn.

187—White Evergreen. Resembles very much Stowell's Evergreen. Sweet, deep grained, heavy yielding and stays tender a long time. Gather when "in the milk" and it is very tender, sweet and juicy. You will like it as a canning variety. Ears medium to large.

Fodder Sweet Corn for the Stock

A vigorous growing Sweet Corn that will furnish more and better fodder and ensilage corn than field corn. Also just the variety for the Canning Factory as it will make heavy yields. It is fine for early "hogging-down" and our price is right. Use a peck to the acre for this purpose. Good strong germination. Will be glad to furnish samples.

HOME GARDEN COLLECTION

22 vegetables, 23 packets, price \$1.50

This collection is for those who want just the ordinary good home vegetables and have no special choice of varieties. The seed is all good vigorous seed that will grow and produce a crop. The packets are all full packets with the variety marked on them.

2 Oz. Wax Beans	1 Pkt. Parsnips
2 Oz. Green Beans	2 Oz. Peas, Early
1 Oz. Pole Beans	2 Oz. Peas, Late

1 Pkt. Cucumbers	1 Pkt. Salsify
1 Pkt. Lettuce	1 Pkt. Tomatoes
1 Pkt. Muskmelons	1 Pkt. Turnips
1 Pkt. Onions	1 Pkt. Spinach

Spinach

Spinach Greens for Early Spring

Plant early. Use about one ounce of seed to 100 feet of row.

When planted early in the Spring, Spinach soon produces a crop of tender dark green leaves. It is a quick crop and can be followed by other vegetables.

One suggestion is to serve as a companion to ham, spare ribs or corned beef; also serve with melted butter, or cut small pieces of ham or bacon and fry, then pour over the greens. Spinach greens build up your resistance, stimulate growth, furnish Calcium for the bones and teeth and are a splendid iron tonic.

229—BLOOMSDALE SAVOY. Very early with dark green crumpled leaves.

230—GIANT THICK LEAF. Follows Bloomsdale and stands longer without going to seed.

231—KING OF DENMARK. A large variety, standing until quite late without seeding.

261—BIG GREEN LEAF. Large dark green leaves, tender and of good quality. One of the best varieties for the back-yard gardener.

212—NEW ZEALAND. Does not resemble the above varieties, but makes good summer greens. Pull the tender green leaves and more will grow out.

Big Green Leaf

SWEET CORN	Postpaid Prices	Oz.	1/4 lb.	1 lb.	5 lbs.	10 lbs.
183—Early Mayflower.		.05	.15	.35	1.50	2.75
Very early, ten or twelve rowed.

Tomatoes

HENRY FIELD CO.

11

TOMATOES

Use Tomatoes in Soups, Salads and Sliced

They are richest of all vegetables in vitamins. They are also rich in health acids which keep the body in a healthy condition washing away poisons that cause disease.

Tomatoes are said to be the swiftest, surest and most certain natural remedy for overweight, using either fresh or canned tomatoes.

Field's Red Bird

A NEW EARLY TOMATO

421—Field's Red Bird. Pkt. 20c.

This is in my opinion, the best of all the tomatoes we have introduced, and we have brought out some good ones.

It is best described as like the Field's Redhead only more so. It is even earlier than Redhead, an even deeper blood red color, very round and smooth, solid, meaty, a good slicer, and a good looker.

One important point is that it is a uniformly heavy early bearer of all even sized, well colored, and all marketable tomatoes. The originator made a crop of 15 tons per acre last year, and sold \$5,500.00 worth from 4 acres. That tells the story.

He made big money on them because they yielded heavily on the first set, and came on the market early in July with a big crop of smooth even sized high colored tomatoes. Just what the market wanted, and just when they wanted it.

This Red Bird (so called because of its brilliant red color) originated with a big successful market gardener customer of ours, who was working for the best early market tomato. He tried all the best earlies he could find, blended them, and selected for a type which he finally fixed.

He wanted extreme earliness, big yield early, high color, smooth even shape and size, solid meaty quality, no cracks or splits, extreme vigor and health of plant, and a tomato that would hold up well in size.

In this tomato he found and fixed all these points, and made money with it. When we saw it we bought it and contracted with him to grow the seed for us.

The seed we are offering you is grown by the originator and is very select stock. Only a limited amount of it so we are selling Pkts. only. Pkt. 20c.

Early Varieties

401—RED HEAD. This variety has made us more friends than any other we have ever sold unless it was Field's Early June. It is a deep rich red, a little flattened, never rough or wrinkled. It does not crack easily; is very solid and slices beautifully. It bears heavy and can be used for your early canning. It follows Langdon's Earliana right on its heels. A good idea would be to plant both.

402—FIELD'S EARLY JUNE. It looks like Earliana and has the same kind of vine, fruit redder, and much more solid. Very mild and sweet flavor, like the Stone for shape and color. Flesh is solid and few seeds.

411—LANGDON'S EARLIANA. This is our earliest tomato. A bright red, smooth medium size and a good slicer. With this variety in your garden you can have vine ripened early Tomatoes that are so much better than southern

Red Head

The Garden is the most valuable acre on the Farm

Tomatoes pulled green and ripened on the way to market. Our seed stock of this variety is grown in northeastern New York, way up next to the Canadian line where a tomato has to be early to mature at all. You can have plenty of real early tomatoes from this variety.

408—BONNY BEST. A second early scarlet fruited variety. Tomatoes round and medium size. Something like John Baer.

410—CHALK'S EARLY JEWEL. A scarlet second early.

407—JOHN BAER. Some like Chalk's Early Jewel and Bonny Best.

403—PINK EARLY JUNE. Same season as Field's Early June but pink instead of red.

Late Varieties

406—NORTON. There is a disease called Wilt that causes vines to wilt down. This variety resists that disease. Main crop. Red fruit.

405—MARGLOBE. Another wilt-resisting variety. Scarlet fruit. medium size, smooth, solid and globe shape.

417—LIVINGSTON'S GLOBE. A smooth second early, pink fruited variety. Solid and meaty.

415—NEW STONE. An old friend of most every gardener. A mighty good canning or main crop variety. Medium to large, smooth, solid, ripens close to the stem, and yields well. Meaty and good flavor.

414—MISSISSIPPI GIRL. It is named in honor of the Canning Club girls in Mississippi, who made a great success with it. Of the New Stone style, big, smooth, red, solid and sweet.

418—PONDEROSA. The most important characteristic of the tomato is its quality. It is very tender, meaty and sweet. It is the largest of all varieties and has few seeds. Does exceptionally well trained to a trellis of some kind. It is a good canning variety but best of all served fresh.

420—YELLOW PONDEROSA. About the same size as Ponderosa but not as solid.

419—YELLOW PEAR. A very small tomato used for preserves.

412—GOLDEN BEAUTY. Best yellow. Smooth and medium size.

416—MATCHLESS. Large, solid tomato, suitable for main crop or canning.

Ponderosa

"I had your seeds last year and they proved the best I ever had. I raised a tomato that weighed nearly 2 lbs. Many weighed over one pound. The peas and beans were also very fine."—Will H. Zaiser, Sr., Des Moines, Iowa.

"I got one package of Early June tomatoes. I didn't plant them in a hot bed, but just put them in the ground where I wanted them to grow, but we astonished the neighbors by having ripe tomatoes before any of them thought of such a thing."—E. D. Hous, Table Rock, Nebr.

TOMATOES	Postpaid Prices	Pkt.	Oz.	1-5	10z.
421—Field's Red Bird.		.20			
Early, round, solid, mild flavored.	Productive and good color. Our new early tomato.				
101—Red Head.		.10	.50	1.50	5.00
Smooth deep rich red. Early, solid, meaty and productive.

Best early pink.					
106—Norton.		.05	.40	1.25	4.50
Second early; red. Resistant to wilt.					
105—Marglobe.		.10	.45	1.50	5.00
Scarlet, medium size; solid. Resistant to Wilt.					
117—Livingston's Globe.		.05	.40	1.25	4.00
A smooth second early. Pink; good keeper.					
115—New Stone.		.10	.40	1.00	3.00
Main crop canning. Solid, meaty; yields heavy. Red.					
114—Mississippi Girl.		.05	.35	1.00	3.00
A good, late, red tomato.					
118—Ponderosa.		.10	.50	1.50	5.00
Exceptional quality. Very large. Fine for home use.					
420—Yellow Ponderosa.		.10	.50	1.50	5.00
A large late yellow.					
119—Yellow Pear.		.10	.50	1.50	5.00
Very small pear shape. Grown for preserves.					
112—Golden Beauty.		.05	.40	1.25	4.50
Medium size main crop. Suitable for the table or preserves.					
116—Matchless.		.05	.35	1.00	3.50
Medium to large red. Late.					

Use them raw and cooked

Try dicing a mild turnip to be used in a salad.

They are tender and sweet if grown in cool weather. So for the cornbelt, at least, plant early so they will mature before hot weather. For the fall crop plant "twenty-fifth of July, wet or dry," or within a week or two of that date, anyway.

Purple Top Globe

806—PURPLE TOP STRAP LEAF. Something like Purple Top Globe except is flat in shape.

805—SNOWBALL. A fine globe-shaped white Turnip, and of good quality. Good for early or late.

810—White Globe. A late white variety.

808—RUTABAGA, AMERICAN PURPLE TOP. Has smooth leaves like cabbage. Purple top with yellow flesh. Not much of a success here in southern Iowa, but in the northern states they are quite valuable.

TURNIPS

803—EXTRA EARLY MILAN. For spring planting this is good. If used before hot, dry weather it is tender and sweet. Very early, medium size and flat.

804—EARLY WHITE MILAN. No difference in this and Extra Early Milan except in color.

807—PURPLE TOP GLOBE. One of the finest, sweetest turnips we list. Fine grained, tender and flesh a snowy white. In the Central West it is used mostly for late planting but can be planted in the Spring. Is satisfactory to grow for stock as it yields big.

WATERMELONS

A Vine Ripened Melon is Best.

The perfect melon is a home grown melon. It is pulled when fully ripe and early in the morning. It is cooled by the natural flow of the sap and the night dews. It is crisp and sweet and tender. Such a melon is not only delicious but healthful.

Colorado Kleckley Sweet

I believe this is the largest melon we list, outside of Field's Jumbo.

718—IRISH GREY. One of the best shipping varieties. Flesh a bright red and quality good. Skin light gray; rind hard and firm.

721—GIANT KLECKLEY. Something like Kleckley Sweet but is much larger, has a tougher rind and carries well. Bright red flesh, crisp and sweet. A big, handsome melon that will sell well and is good to eat.

705—KLECKLEY SWEET. Skin a dark green and flesh bright red, tender and sweet. A very popular melon because of its quality. Rather long or oblong and ranges in size from 20 to 40 pounds. Not always as early as the Colorado Kleckley, but the real thing in a Kleckley.

703—HALBERT HONEY. This is a long slender melon having the Kleckley Sweet quality, and that is extra good.

Giant Kleckley

724—FIELD'S JUMBO. A very large melon, almost round, flesh red and of good quality. We exhibited three of these melons during our Jubilee week last fall. Two of them weighed 116 pounds each and the third 110 pounds.

A pile of Kleckleys from which our seed was taken.

715—ICE CREAM OR PEEPLESS. Medium early melon. Fine to come in ahead of Kleckley Sweet, which it resembles, except smaller.

717—PRINCESS. I don't know of a medium early melon that is any better or as good as this one. Perfectly round, small individual size, very thin rind, red flesh, sweet and tender.

702—GOLDEN HONEY. Flesh a sparkling golden-yellow. Considered the best of the yellow varieties. Medium size, oblong, dark green striped.

723—VOLGA or WINTER WATERMELON. Is a distinct novelty in the melon line. It will keep until Christmas or later with ordinary care. Perfectly round in shape; very sweet; small seeds.

Fresh roasted Peanuts are so far superior to stale warmed over peanuts that there is no comparison. To be sure of a liberal supply of fresh ones better grow a few.

Roast in the oven with a slow fire.

250—EARLY NORTHERN. Earliest and best for the North. The pods are small, well filled and prolific. They will produce a crop in any ordinary season in any country where corn will ripen.

TURNIPS	Postpaid Prices	Pkt.	Oz.	1/4lb.	1lb.
803—Extra Early Milan.		.10	.15	.40	1.00
Medium size, flat, purple top.

Large, long, striped; fine quality.					
708—Sweetheart.		.05	.15	.35	1.00
Medium size, round, light gray. Flesh red, quality fair.					
719—Excel		.05	.15	.35	1.00
Very large, striped; red fleshed.					
721—Giant Kleckley.		.10	.15	.40	1.25
Large, long, dark green; red flesh.					
703—Halbert Honey.		.05	.15	.35	1.00
Long, slender, dark green; red flesh; fine quality.					
724—Field's Jumbo.		.10	.15	.40	1.25
Mammoth size; almost round, striped; flesh red.					
711—Cole's Early.		.05	.15	.35	1.00
Small round. Not much good, but early.					
715—Ice Cream or Peerless.		.05	.15	.35	1.00
Mid-season, medium size. Good quality.					
713—Fordhook Early.		.05	.15	.35	1.00
Best real early melon for home use. Red flesh.					
717—Princess.		.10	.15	.40	1.25
Small individual size; very sweet. Early.					
705—Kleckley Sweet.		.05	.15	.35	1.00
Famous for quality. Red flesh, good size.					
702—Golden Honey.		.05	.15	.35	1.00
Best yellow fleshed melon. Medium size.					
710—Boy's Watermelon Collection.			.15		
A mixture of varieties early and late; little and big.					
723—Volga.		.10	.15	.40	1.25
Small. Keeps until Christmas.					
PEANUTS	Postpaid Prices	1/4lb.	1lb.	5lbs.	
250—Early Northern.		.15	.35	1.60	
Small early variety.					
258—Jumbo.		.15	.35	1.60	
Large variety.					

Boil Cauliflower and serve with cream sauce or butter.

HENRY FIELD CO.

ODDS And ENDS

- ASPARAGUS** Pkt. Oz. 1/4lb. 1lb.
201—Washington Rust Resistant. .05 .15 .45 .150
Big tender stalks, extremely hardy, prolific and disease resistant.
- 222—**SPROUTING BROCCOLI.** Start in house or hot bed like cabbage. The plant resembles cauliflower, except that it does not form a tight head and is green instead of a bleached out white. When it is cut more sprouts come out. It is hardier and surer to head than Cauliflower. It has a very mild agreeable flavor and is very tender. Pkt., 10c; oz., 50c.
- 206—**BRUSSELS SPROUTS.** Pkt., 5c; oz., 20c.
- 211—**CHICORY, Large Rooted.** A good substitute for coffee. Pkt., 5c; oz., 20c.
- 210—**CITRON, Red Seeded.** Small, striped preserving melon. Pkt., 5c; oz., 15c.
- 207—**COLLARDS.** Cabbage leaves without heads. Pkt., 5c; oz., 15c.
- 218—**ENDIVE, Broad-Leaved Batavian.** Pkt., 5c; oz., 25c.
- 213—**GARDEN LEMON or VINE PEACH.** For preserves. Pkt., 5c; oz., 15c.
- 252—**GARDEN HUCKLEBERRY.** Especially fine for pies, preserves and jams. Pkt., 5c.
- 298—**GARLIC.** Tastes like onion, only more so. 5c per bulb; 25c per lb.
- 214—**GROUND CHERRY.** Yellow. Used for preserves. Pkt., 5c; oz., 50c.
- 216—**KALE, Half Dwarf Curled.** Pkt., 5c; oz., 15c.
- 225—**KOHL RABI, White Vienna.** Looks like a cross between cabbage and turnips, and is better than either one. Grown like cabbage. Pkt., 10c; oz., 25c.
- 215—**LEEK, Large Flag.** Used in soups. Pkt., 5c; oz., 15c.
- 299—**MUSHROOM SPAWN.** Per brick, 40c; 3 for \$1.00, postpaid.
- 219—**MUSTARD, Black.** Very early. Goes to seed soon. Pkt., 5c; oz., 15c.
- 221—**MUSTARD, Chinese Curled.** Leaves curled and crumpled. Pkt., 5c; oz., 15c.
- 223—**MUSTARD, Ostrich Plume.** Well named. Pkt., 5c; oz., 15c.
- 224—**MUSTARD, White.** Grown for the seed. Pkt., 5c; oz., 15c.
- 226—**OKRA, Mixed.** Very popular in the South. Pkt., 5c; oz., 15c.
- 227—**PARSLEY, Moss Curled.** Used for garnishing and seasoning. Pkt., 10c; oz., 15c.
- 228—**RHUBARB or PIEPLANT.** Pkt., 5c; oz., 15c.
- 262—**SUNFLOWER, Mammoth Russian.** Grown for Chicken food. Pint equals one-half pound. 1/4 lb., 10c; lb., 30c.
- 263—**SWISS CHARD, LUCULUS.** Large, fleshy, crumpled leaf. Fine for greens during Summer. Pkt., 10c; oz., 15c.
- 232—**TOBACCO, White Burley.** Fine all purpose variety. Pkt., 5c; oz., 40c.

HERBS

A bed of three or four herbs, or more, is mighty nice to have. They can be used in so many foods in place of high-priced flavoring extracts. Their fragrance is pleasing and will be appreciated.

- 235—**ANISE.** Annual. Pkt., 5c.
- 239—**BALM.** Perennial. Pkt., 5c.
- 236—**BORAGE.** Annual. Pkt., 5c.
- 240—**CARAWAY.** Biennial. Pkt., 5c.
- 241—**CORIANDEr.** Annual. Pkt., 5c.
- 233—**DILL.** Annual. Pkt., 10c; oz., 20c.
- 237—**HOREHOUND.** Perennial. Pkt., 5c.
- 242—**LAVENDER.** Perennial. Pkt., 5c.
- 243—**ROSEMARY.** Perennial. Pkt., 5c.
- 234—**SAGE, Mammoth Broad Leaf.** Perennial. Pkt., 10c; oz., 35c.
- 244—**SUMMER SAVORY.** Annual. Pkt., 5c.
- 238—**SWEET MARJORAM.** Annual. Pkt., 5c.
- 245—**SWEET BASIL.** Annual. Pkt., 5c.
- 246—**THYME.** Perennial. Pkt., 5c.
- 247—**WORMWOOD.** Perennial. Pkt., 5c.

HENRY FIELD'S PLANT SPRAY

Non-poisonous to human beings, birds, animals or plants

Controls and kills such insects as are listed below:

Cabbage Worms	Leaf Hopper
Cut Worms	Red Spider
Cucumber Bugs	Thrips
Plant Lice	Potato Bug
Tomato Worms	Mealy Bug
Rose Slugs	Aster Beetles
Flea Beetle	Eggs and Larvae

Use on vegetables, flowers, small fruits, shrubs, vines and house plants.

This is a contact spray. Kills both sucking and chewing insects. Is easily mixed. Complete directions on each bottle. CAN BE MAILED.

- 8-Ounce Bottle makes 16 gallons of spray solution \$.85
16-Ounce Bottle makes 32 gallons of spray solution 1.35
1-Qt. Can makes 64 gallons of spray solution 2.25
Price includes postage and packing.

Order Your Garden Needs Early. An early garden is best.

Egg Plant

Egg Plant as Good or Better than Mushrooms

Start in house or hot bed.

656—**BLACK BEAUTY.** Produces five or six "eggs" to the plant which will average almost as large as a quart cup when ready to use. They have a rich meaty flavor. Color a purplish black.

EGG PLANT	Postpaid Prices	Pkt. Oz. 1/4lb.
656—Black Beauty.		.10 .40 1.25
Large purple fruits of a rich meaty flavor.		
658—New York Purple.		.10 .40 1.25
Pear shaped medium sized fruits.		

Hotkaps

A Plant Protector

A cone-shaped paper plant cover, a little larger than a man's hat, that is set over the young plant to protect it from frosts and cold weather in the spring. The paper is translucent, allowing the sunlight to reach the plant.

Sold in unbroken packages as follows:

- 100 Hotkaps, without Setter, \$2.00 postpaid.
250 Hotkaps and Waterproof Hotkap Setter, \$3.50, postpaid.
1,000 Hotkaps, without Setter, shipping weight 27 lbs., \$10.00, not prepaid.
Steel Hotkap Setters, with handle, each, \$2.00, postpaid.
Waterproof Hotkap Setters, each 55c, postpaid.

We strongly recommend a steel Hotkap Setter where you use a thousand Hotkaps or more.

Paper Pots For Plants

The pots come folded and all ready to open and set up. Put them in a box close together and fill with dirt and plant the seed or set in a plant. They can be had with bottoms to fold under or without bottoms. Most everybody uses them without.

250 2x2 inch size, \$1.25, postpaid; 250 2x2 inch with bottoms, \$1.50, postpaid.

Write for prices on larger amounts and on other sizes.

Watch-'Em-Grow Plant Food

Watch-'Em-Grow is a well balanced high-grade fertilizer that will produce a strong vigorous plant, healthy dark green foliage and plenty of flowers, other things being right. It is a clean odorless powder that dissolves quickly in water and can be easily applied to plants as you water them.

Big 8-Ounce Can, 50c, postpaid.

Iowa Special 85-15 Sulphur Lead Arsenate

An Insecticide and Fungicide combined. That is, it will kill chewing insects and control many plant diseases, but it will not destroy the lice.

CANNOT GO BY MAIL. Must go express not prepaid.

85-15 SULPHUR-LEAD ARSENATE

3 lbs.	\$.75
5 lbs.	1.00
10 lbs.	1.75

Iowa Special Nicotine Carrier Dust

This dust is for sucking insects such as lice.

CANNOT GO BY MAIL. Must go by express, not prepaid.

NICOTINE CARRIER DUST

3 lbs.	\$1.00
5 lbs.	1.50
10 lbs.	2.50

Bug Duster

This "Bug Duster" is inexpensive and handy. It is equipped with a long nozzle so that you will not have to stoop over when you dust your melon or cucumber vines.

Price, \$1.00 each, not prepaid.

"Sweet Corn of which I canned 40 plnts; bunch beans and pole beans of which I canned 25 quarts; tomatoes of which I canned 60 quarts; navy beans 1/2 bushel; cabbage of which I made 30 quarts of kraut; cucumbers of which I canned 50 quart of pickles; carrots 1/2 bushel in the cellar; parsnips one bushel in the cellar; stuffed mango peppers about 10 quarts; 3 pints of sweet red pimento peppers. Oh, I couldn't start to tell all of it! But can you imagine anyone being a poor cook with all that on hand to prepare a meal."—Vida Le Waugh, Pocahtontas, Iowa.

"Our Bermuda onions did extra well in 1927, fifteen hundred plants yielding about 15 bushels. Most of these were sold for \$2.00 per bushel. Thirteen of the large ones made a peck and took 1st prize at the County Fair."—Mrs. Edward Thurston, Elmdale, Kans.

Field's Flower Seeds

Mrs. Helen Field Fischer, my sister and our flower lady, is always glad to answer, by mail or by radio, your questions about culture and identification of flowers.

She gives a half hour flower talk, taking up problems of the season and reading interesting letters telling of garden experiences of others. Being a regular listener is like belonging to a great garden club.

No problem is too simple or too difficult for Mrs. Fischer for she has personally experimented with every plant hardy in the middle west and took technical training at Cornell University.

New and Valuable Varieties

We are introducing to our customers this season a number of flowers that are of special value and should be in your garden. Some of them are new and some have been grown a number of years, but are not as well known as they should be.

Asters

NEW CALIFORNIA GIANTS.

They are the giants among the asters, the flowers reaching a size 4 to 5 inches in diameter and with long stems. The petals are gracefully curled and twisted somewhat resembling a Chrysanthemum. A wonderful florists' variety. Colors: 1336—White. 1337—Peach Blossom. 1338—Light Blue. 1339—Light Purple. 1340—Deep Rose. 1341—Mixed. Pkt., 25c each, or 5 for \$1.00.

AMERICAN BEAUTY. A well rounded bush, branching close to the ground, with long side branches. Large flower, invaluable for cutting. Colors: 1352—Azure Blue. 1353—Black-blue. 1354—Crimson. 1355—Rose. 1356—White. 1357—Mixed. Packet, 10c each.

New California Giants

1351—CALIFORNIA SUNSHINE. It is a double flower although the outer petals extend out much longer than the center quilled shaped petals and you are reminded of a single flowered aster. The crested or cushioned center shows contrasting color. The stems are long. It is a wonderfully beautiful flower. Packet, 5 Mixed Colors, 15c.

1346—CASTOR BEAN, Red Spire. A bushy shaped plant standing about 6 feet tall, foliage a bronzy green. The spikes a brilliant crimson standing well above the foliage. This is a beautiful and valuable plant that should be in every garden. Pkt., 10c.

1358—ANNUAL GAILLARDIA, Double Mixed. The annuals are profuse bloomers, beginning early and continuing until frost. Long stems, very double. Colors run to reds, orange, brown and yellow in many shades. Pkt., 10c.

1360—LARKSPUR, Empress Rose. A double, everblooming, super-branching larkspur. Specimens have grown as high as six feet. Mammoth florets well placed on the stem. A rich deep pink. Pkt., 15c.

1359—HOLLYHOCK, Exquisite. Very large flowers curled and fringed. Various shades of red with petals white margined. Pkt., 15c.

1342—MARIGOLD, Little Brownie or Legion of Honor. A compact bush 9 or 10 inches high. Blooms early and continuously until frost. Flowers single, a golden yellow with a velvety brown spot in the center. Pkt., 10c.

1343—MARGOLD, Gold Striped. About the same height as Little Brownie. Very double, a velvety dark brown striped with gold. A little beauty. Pkt., 10c.

1344—PETUNIA, Rose of Heaven. A brilliant rose with white throat. Darker than Rosy Morn. A small compact bush. Pkt., 15c.

1345—PETUNIA, Giant Fluffy Ruffles. A large flower, beautifully fringed and ruffled. Bright showy colors mottled and blotched with an occasional flower showing a solid color. Makes a wonderful house plant. Packet containing about 300 seeds. 25c.

1347—SALVIA, Farinacea. Stands 20 to 30 inches high and produces an abundance of tall spikes of silvery blue flowers. Fine for cutting. Pkt., 15c.

1349—VERBENA, Royal. Individual florets very large. Color a rich deep royal blue with a creamy yellow eye. Pkt., 15c.

1350—ZINNIA, Lilliput. Very small perfectly shaped flowers growing on a low compact bush. Fine for borders or can be used as a cut flower. Pkt., Mixed Colors, 10c.

ZINNIA, Giant Mammoth. These new giants will stand from 3 to 4 feet tall in good soil and the bush two to three feet in diameter. Flowers of enormous size, twice the size of the ordinary Giant Zinnias. Flowers attractive from the time they open until full grown. A splendid cut flower as well as for bedding. Colors:

1362—Light Rose. 1363—Lemon-Orange. 1364—Burnt Orange. 1365—Glowing Scarlet. 1361—All Colors Mixed. Your choice, pkt., 15c; 5 packets, 50c.

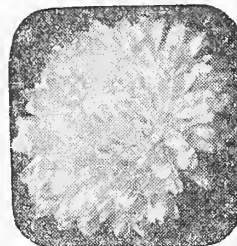

Asters, Queen of the Annuals

The colors are bright and attractive; the flowers very double, stand a long time and keep well as a cut flower. All our seed is American grown, which is far superior to imported seed. All full double; no yellow centers.

AMERICAN BRANCHING. These you must have for your main crop. Give them plenty of space, as they have long stems and gorgeous big blooms.

1011—Azure Blue. 1012—Crimson. 1013—Lavender. 1014—Peerless, Pink. 1015—Perfection, white. 1016—Purple. 1017—Mixed Colors. Per packet, 10c.

1019—CHRYSANTHEMUM-FLOWERED. All the feathery, shaggy varieties, including Mikado, Giant Comet, Ostrich Feather and Giant Poodle. Mixed. Pkt., 10c.

American Branching

1018—GIANT BRANCHING. Same as American Branching but still larger. A new strain. Mixed colors. Pkt., 10c.

1020—QUEEN OF THE MARKET. Blooms during July and August. Plant plenty of it. Mixed. Pkt., 10c.

1024—HEART OF FRANCE. A pure red Aster, red as the ruby and strikingly beautiful. Pkt., 10c.

FLORISTS' MIXTURES. Assorted varieties grouped by colors. 1025—White Mixed. 1026—Pink Mixed. 1027—Blue Mixed. 1028—Red Mixed. 1029—All Colors Mixed. 1030—Mixture of Extra Early. Your choice, per packet, 5c.

1942—SPECIAL ASTER OFFER. One packet each of American Branching, Azure Blue, Crimson, Lavender, Pink, White and Purple, 50c.

"I had tried to raise garden flowers for ten or twelve years and had began to think it all my fault when I was asked to try Henry Field's seeds. I did, and I could hardly believe my eyes. Seems as though every seed grew and such extra good quality. I am a great lover of flowers and I surely had oceans of them last year."—Mrs. E. C. Huling, Prairie Home, Missouri.

Seeds of Annual Flowers

1001—ALYSSUM, Sweet. The best white border plant in existence. Lacy and fragrant. Pkt., 10c.

1002—ACROCLINUM, Everlasting. Pkt., 5c.

1003—AGERATUM, Blue Perfection. A charming annual, entirely covered with a solid fluff of bloom until very late fall. 10 or 12 inches tall. Pkt., 10c.

1004—AMARANTHUS, Sunrise or Molten Fire. Loses color if planted in rich ground. Pkt., 10c.

1005—TRICOLOR or JOSEPH'S COAT. Gorgeous foliage that can be clipped if desired. Pkt., 5c.

1006—LOVE-LIES-BLEEDING. Pkt., 5c.

LAWN GRASS

When your lawn is covered with a smooth, velvety, dark green coat of grass, flowers will have a better background for display and your home will appear at its best. The house, alone, may be unpretentious but when there is a smooth lawn, well placed shrubbery and flowers, the place is homelike and attractive.

A well blended Lawn Grass Mixture, or Kentucky Blue Grass. Prices: 45c per lb., 10 lbs., \$4.00; postpaid in Zones 2 and 3.

Antirrhinum or Snapdragon

Snapdragons are a favorite with most everyone. Their beautiful colors and fragrance are wonderfully pleasing. They are easily grown and are fine for cut flowers as well as good bedding plants.

1007—Bonfire. Glorious shades of yellow, henna and flame. Pkt., 10c.

1008—Delicata. Pink. An exquisite shade. Pkt., 10c.

1009—White. Pure as snow. Pkt., 10c.

1010—Mixed Colors. Pkt., 10c.

Make a Border of Flowers around that garden of yours

Snapdragon

HENRY FIELD CO.

Balsam or Touch-Me-Not

An old favorite. The many colored flowers grow along the stem, intermingled with the foliage, making a most attractive plant. Excellent for planting around the foundation of a house.

- 1037—Prize Double Mixed. The finest to be had. Pkt., 10c.
 1038—Camelia-Flowered. Double. Flowers all colors. Covered with white polka dots. Pkt., 5c.
 1045—BALSAM APPLE. An interesting climber. Pkt., 5c.
 1036—BALLOON VINE, (Love-in-a-Puff). A rapid growing vine with pods like little green balloons. Pkt., 5c.
 1046—BLUE LACE FLOWER. Long stemmed flowers and a constant bloomer. Height about 2 feet. Pkt., 10c.
 CALENDULA. If you love yellow and orange, this low growing plant will bring it from early summer to late October like a carpet of sunshine. Very double.
 1047—Lemon Queen. Pkt., 10c. 1048—Orange King. Pkt., 10c.
 1049—Mixed Colors. Pkt., 10c.

California Poppies

California Poppies

A beautiful low growing flower, all shades of yellow, orange and crimson, with finely cut silvery foliage. A good border plant.

- 1055—California Poppy Mixed. Pkt., 5c.
 1056—CALLIOPSIS, Semi Plena. Another annual that scatters its dancing flowers of orange, henna and yellow into every waste corner of your garden, and is ever welcome. Plant on the tulip bed to follow them. Mixed Colors. Pkt., 5c.
 1057—CALLIOPSIS, Drummondii, Golden Wave. An interesting new dwarf form of the above. Fine for cutting. Height about 10 or 12 inches. Mixed Colors. Pkt., 5c.
 1058—CANARY BIRD VINE. Named from the airy yellow flowers with feather-like petals. Pkt., 5c.
 1104—CHINESE FORGET-ME-NOT (Cynoglossum Amabile). Produces sprays of bright blue Forget-me-not like flowers which bloom throughout the summer. Plants grow about 18 inches high. Pkt., 10c.

1065—CARDINAL CLIMBER

You will love it. The flowers are little scarlet morning glories. Pkt., 10c.

Candytuft

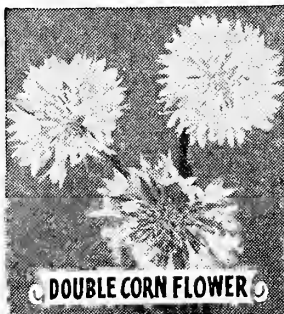

CANDYTUFT. An old annual that has been vastly improved in its color range. This is the Umbellata type and has a cluster of flowers somewhat resembling annual phlox.

- 1063—Mixed Colors. Pkt., 5c.
 1062—Giant Hyacinth-Flowered. White. One foot spikes, actually resembles single white hyacinths. Pkt., 5c.
 1066—CACALIA or FLORA'S PAINT BRUSH. Pkt., 10c.
 1064—CANNA SEED. Try your luck. You may experience the delight of producing a most beautiful new variety from seed. They always bloom the first year. Pkt., 5c.
 1039—CARNATIONS, Dwarf Marguerite. A half hardy plant, blooming late in the season. Fragrant, double; colors white and various shades of pink. Sometimes called "Carnation Pinks." Pkt., 10c.
 Chabaud's Giant Double—A very large double; suitable for pot culture as well as growing in the open. Plants can be lifted late in the season and potted for winter bloom in the house. 1040—Dark red. 1041—Yellow. 1042—White. 1043—Mixed Colors. Your choice, 15c per packet.
 1044—CASTOR BEAN (Ricinus) Palma Christi. The large ornamental kind. Pkt., 5c.
 1072—CHINESE WOOLFLOWER. Like a ball of crimson yarn. Pkt., 10c.
 CHRYSANTHEMUM, Annual. Large daisy-shaped blooms with odd and beautiful arrangement of colored rings surrounding the center. Plant them early. 1078—Mixed Colors. Pkt., 10c.

DOUBLE CORNFLOWER

(Centaurea Cyanus). Much superior to the old-fashioned single Cornflower. We list these in separate colors. Fine for church or house decoration, and best of all, it self-sows.

- 1067—Blue. 1068—Pink. 1069—White. 1070—Lavender. 1071—Mixed Colors. Your choice, per packet, 10c, or 3 for 25c.

DOUBLE CORN FLOWER

All Flower Seed Prices are Postpaid Anywhere

Cosmos

Cosmos

The glory of the fall garden. On tall, feathery, green stalks it bears daisy-like flowers in all shades of lavender, pink and red. Ours is the early-blooming strain, that blooms from mid-summer on. 1080—Crimson. 1081—Pink. 1082—White. 1083—Early Single Mixed. Per packet, 10c.

1323—COSMIDIUM, Mixed. It grows from 12 to 18 inches in height and produces an abundance of single orange and yellow flowers. Blooms all summer. Pkt., 10c.

1085—COXCOMB. One of the old-fashioned flowers that is coming back into popularity. Pkt., 5c.

1086—COLEUS. A beautiful foliage plant. Pkt., 10c.

The Dozen Price On Flower Seed Packets

6 five cent packets, your choice,	25c
12 ten cent packets, your choice,	90c
6 ten cent packets, your choice,	45c

1325—SCARLET FLAX. (Linum Rubrum). Can be used in clumps along the border where it will be greatly admired because of its bright glowing color. Height about 1 foot. Pkt., 10c.

1088—CYPRESS VINE. A medium tall growing vine with fine dark green foliage; pretty red and white flowers. Pkt., 10c.

"I have been ordering seed from you about 9 years or 10, and have always found them good. The last year I just bought here at a local seed store and so I had no garden."—Mrs. J. T. Bradley, Harrisburg, Ark.

Four O'Clock

1093—Marvel of Peru. An old favorite of renewed popularity. Use it for hedges, for foundation planting and large beds for public places. Mixed Colors, Pkt., 5c; oz., 20c.

DAHLIA SEED. As a rule blooms first year from seed. Each plant different. Save the bulbs of the worth while plants.

- 1089—Single Mixed. Pkt., 10c.
 1090—Double Mixed. Pkt., 15c.
 1091—DATURA (Ghost Flower). Large trumpet-shaped flowers. Pkt., 10c.

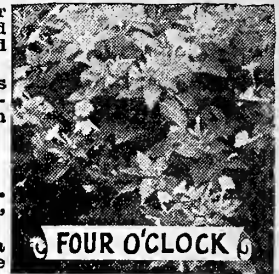

1092—DUSTY MILLER (Centaurea Gymnocarpa). The soft gray foliage plant used to edge beds. Pkt., 10c.

1094—GERANIUM SEED. No two plants from seed are just alike. Pkt., 10c.

1095—GLIA, Capitata. Almost everlasting. White and blue mixed. Wonderful for blue cut flowers. Pkt., 5c.

1096—GLADIOLUS SEED. Pkt., 10c.

1097—GLOBE AMARANTH (Bachelor's Button). Everlasting. Reminds you of clover blossoms. Mixed Colors. Pkt., 5c.

FOUR O'CLOCK

Ornamental Gourds

Will climb surprisingly well. Are useful, ornamental and a great curiosity.

- 1098—Bottle. Used as a drinking cup or water jug. Pkt., 5c.
 1099—Dipper. The old-fashioned Missouri sort. Pkt., 5c.
 1100—Hercules Club. About 3 feet long. Pkt., 5c.
 1101—Nest Egg. Guaranteed to fool the old hen. Pkt., 5c.
 1102—Sugar Trough. Large as a peck measure. Often larger. Pkt., 5c.

1103—Fancy Mixed. All kinds, shapes and sizes. Pkt., 5c; Oz., 20c.

HELICHRYSUM EVERLASTING. The rose-shaped strawflower that is the foundation and glory of all winter bouquets. We have the largest and most beautiful colored strain in the market. When gathering, remove the stem and substitute a slender wire.

1106—Canary Yellow. 1107—Crimson. 1108—Rose. 1111—Violet. 1109—Fiery Red. 1110—Golden Yellow. 1112—Mixed Colors. Per packet, 10c; 6 for 50c. Either alike or assorted.

1113—HELIOLOTROPE. A tender purple plant with a sweetly haunting perfume. Pkt., 10c.

1114—HYACINTH BEAN. Rapid growing vine. Both blooms and pods are very ornamental. Pkt., 5c.

1115—ICE PLANT (Mesembryanthemum). Foliage covered with ice-like globules. Pkt., 5c.

1116—JAPANESE HOP (Humulus Japonicus). Beautiful insect-proof vine. This and Moonflower are our most rapid climbers. Pkt., 5c.

1117—JOB'S TEARS. The gray seeds, shaped like a giant tear drop, are the joy of childhood for using as beads. Pkt., 5c; oz., 25c.

1118—KOCHIA or Annual Evergreen. For hedges, or for backgrounds. Have you tried trimming it in fancy shapes, or using the individual plants in the place of dwarf evergreens? Pkt., 5c; oz., 25c.

1119—LANTANA. Should be used more. Fine for beds or baskets, and can be carried over to bloom in winter. Pkt., 5c.

Larkspur (Annual Delphinium)

The new double annual Delphiniums are a close rival to their sister, who reigns queen of the hardy garden. They are nearly as tall and they self-sow. Do not fail to try them. What we offer is the tall branching type.

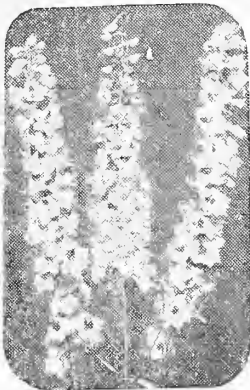

1120—Blue. 1121—Pink. 1138—Rose. 1122—White. 1123—Mixed Colors. Your choice, pkt., 10c; 3 for 25c.

1124—LAVATERA TRIMESTRIS. A dainty pink dwarf of the Hollyhock family. Pkt., 10c.

1126—LOBELIA. A marvelous shade of blue for your borders and boxes. Pkt., 10c.

1125—LOVE-IN-A-MIST (Nigella). A flower of tender blue, half hidden by a mist of green. Pkt., 5c.

1157—LITPINE. Dark Blue. Long graceful spikes with pea-shaped flowers. Annual and suitable for cutting. Pkt., 5c.

Larkspur

"I have used your seed about 15 years and found several of your vegetable seeds doing very good in this high altitude."—Mary E. Carveny, Scottsbluffs, Nebraska.

MARIGOLD

A splendid cut flower whose fragrance reminds you of an old-fashioned garden. Blooms of this strain average about two inches in diameter and very double. Colors, Lemon and Orange.

1127—Lemon Queen. Pkt., 10c.

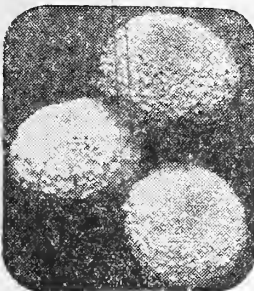

1128—Orange Prince. Pkt., 10c.

1129—Mixed Colors. Pkt., 10c.

1130—Dwarf Marigold Mixed. Pkt., 5c.

1131—DOUBLE FEVERFEW (Matricaria). The good old standby, furnishing white flowers for cutting all summer. Pkt., 5c.

1132—MIGNONETTE (Reseda Odorata). Pkt., 5c.

Marigold

"And best of all the seeds come from Field's and have used your seeds for 22 years."—Mrs. R. J. Martin, Savannah, Mo.

Moonflower

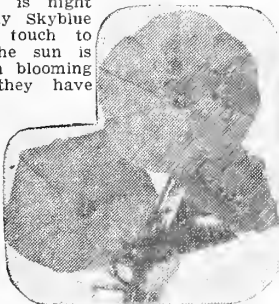

Only the white form, Noctiflora, is night blooming. The Heavenly Blue, Early Skyblue and Giant Pink add a Japanese touch to gardens most of the day unless the sun is shining. If you wish them to begin blooming early, start the seed indoors, as they have tropical habits.

1149—Early Skyblue. A clear, deep sky blue, large and early. Because of its earliness it will provide a long season of bloom for you. It is a strong climber and the foliage a healthy green and at times almost covered with flowers. Price per packet, 15c.

1133—Giant White, Noctiflora. One of the largest and finest. Pkt., 10c.

1134—Mammoth Pink. Very much like the big white Moonflower, but pink in color. Pkt., 10c.

1135—Heavenly Blue. Immense flowers, in clusters and produced in abundance. Pkt., 10c.

Moonflower

Morning Glories

This is one of the most reliable climbers I know of. It does well anywhere. The flowers are so bright and cheerful that it is a comfort to grow them. They can, with good effect, be mixed with other climbers.

1133—Common Mixed (Convolvulus major). Fresh bright looking flowers and a healthy, dark green foliage. Colors white, various shades of blue and red. Pkt., 5c; Oz., 25c.

1137—Imperial Japanese Mixed. This one has a wider range of color than the common kind. Our seed is imported. Pkt., 10c; Oz., 35c.

Boys' and Girls' Collection

Boys and girls can grow flowers as well as anyone if they plan to do it. Directions for growing are printed on each packet. Buy a collection and show the folks what you can do.

Four O'Clock, Marigold, Petunias, Double Cornflower, Zinnias.

1937—SPECIAL OFFER. One full sized packet of each of the above, 25c.

Nasturtiums

They do just as well on poor soil as on rich soil; in fact, they prefer a thin, rocky, clay soil. The climbing varieties are just the thing to cover a fence, stump or trellis. The dwarf varieties make a good border plant. All varieties are fine for cut flowers.

DWARF NASTURTiums

Dwarf Nasturtiums

1139—Dwarf or Tom Thumb. A mixture of the choicest sorts in all colors. All make a rounded, compact bush literally covered with bright flowers. Pkt., 5c; Oz., 25c.

1140—Beauty. Yellow flamed with scarlet. Pkt., 5c.

1141—King of Tom Thumbs. Scarlet flowers, dark foliage. Pkt., 5c.

1142—Queen of Tom Thumbs. Variegated-leaved and mixed. Extra good. Pkt., 10c.

1143—Vesuvius. Salmon-rose. Pkt., 10c.

1144—Ruby King. Dark foliage, deep red flowers. Pkt., 10c.

1145—Spotted King. Dark foliage, spotted flowers. Pkt., 5c.

1930—SPECIAL NASTURTium OFFER. One packet each of the above six varieties and one Tom Thumb, all for 35c.

Tall or Climbing Nasturtiums

This strain climbs well and is suitable for a trellis or any situation not requiring a tall climber.

1153—California Giants. A mixture of the tall growing sorts. Pkt., 5c; Oz., 35c.

1158—Lobbianum Mixed. Our State College at Ames, Iowa, recommends this strain for sunny window boxes. Do not grow as tall as the climbing. Are covered with brilliant flowers. Pkt., 10c.

1159—NICOTIANA. Queen of night bloomers. Very fragrant. Pkt., 10c.

Pansies

No other flower seems so human as the Pansy. The more you pick them the better they thrive. They do best in rich soil. There are two times of the year to sow the seed. First, in August for early sturdy young plants to live over winter. Second, in early spring in the house or hotbeds.

1160—Mile High Mixture. These are the great big fellows with the Mountain vigor still in their blood. Buy them for very large individual blooms. 1/8 oz., \$1.25; Pkt., 20c.

Seed House Mixture

1161—We are often asked what seed we use for the wonderful Pansy borders which surround our seed house plantings. This is a special mixture made up by ourselves, and, while individual blooms are not so large, the plants stool out thickly and stand cutting back and you will find no more satisfactory bedding mixture on the market. Pkt., 10c; 1/8 ounce, 75c.

Mile High Mixture

PANSIES (Continued on Next Page)

Grow flowers for the sick and shut-ins.

HENRY FIELD CO.

PANSIES (Continued)

Seed House Strain in Colors

1162—Golden Yellow.
1163—King of the Blacks.
1164—Snow Queen
1165—Azure Blue.
1166—Bronze and Henna Shades.
1168—Peacock Margined.

Your choice of any named
variety, pkt., 10c;
3 for 25c.

1928—SPECIAL PANSY OFFER. One packet each of the six named varieties and one packet Seed House Mixture, 50c.

PANSY PLANTS

If you did not get Pansies planted last fall, send us an order now to be filled in April or May for some of our big, vigorous, "Wintered Over" plants. They will be covered with buds just ready to burst and will give the children blooms for May baskets and Mother's Day. If placed on graves, will be in full bloom Memorial Day. They transplant easily. Give sunny position for spring bloom. 60c per dozen; 3 dozen, \$1.50, postpaid.

Petunias

Fine for massing in beds or along walks or driveways. Will re-seed themselves from year to year. All of them make good window box and house plants. For bedding use these dwarf and profuse bloomers. Fine to plant in the Tulip bed.

1174—Rosy Morn. Apple blossom pink with white throat. Pkt., 10c.

1175—General Dodds. Blazing crimson. Pkt., 10c.

1176—Viola cea. Nearly blue. Pkt., 10c.

1177—Snowball. Pure white. Pkt., 5c.

1178—Howard's Star. Velvety purple with white star in center. Pkt., 10c.

1179—Lord Courtenay. Brilliant rose with yellow throat. Pkt., 10c.

Hybrid Mixed

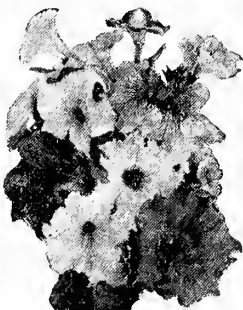

1180—Hybrid Mixed. The best mixture we have ever sold. Pkt., 10c.

PETUNIAS, BALCONY TYPE—They are profuse blooming trailers, with large flowers vividly colored. Use for porch and window boxes.

1186—Balcony Blue. 1187—Balcony Rose. 1188—Balcony White. 1189—Balcony Mixed. Pkt., 15c.

1190—Giants of California. Flowers of enormous size, beautifully ruffled and fringed edges. Make splendid pot plants. Plant the seed carefully, as it is very small. Pkt., 25c.

"I have ordered seed from you for 20 years. Not so many, but always found you gave satisfaction."—Mrs. J. M. Seabloom, Cardwell, Missouri.

Balcony Type

1927—SPECIAL PETUNIA OFFER. One packet each of the six named varieties, for 45c.

Phlox Drummondii Grandiflora

Phlox Drummondii Grandiflora

They begin blooming early and increase in number as they grow. Their broad, flat tops clustered in contrasting colors make them very desirable for bedding. Low growing.

1194—Mixed Colors. Pkt., 10c.

PINKS. Of course, you want "Pinks." They bloom steadily all summer and usually live over.

1191—Double and Single Mixed. Pkt., 5c. 1192—Fireball. Pkt., 10c; 1193—Snowball. Pkt., 10c.

PORTULACA OR ROSE MOSS. Champion hot weather bloomer. Try it between your ribbon drives, and you must have it for your rock garden.

1195—Double Mixed. Pkt., 10c. 1196—Single Mixed. Pkt., 5c.

Grow plenty of cut flowers.

Poppies

Will grow and bloom in any kind of soil and in any kind of weather. The colors are so brilliant and showy that they attract more attention than anything on the place. Even in the heat of July, when nothing else wants to bloom, the Poppies are on hand fresh and beautiful.

Sleepy Hollow Mixture

1197—Double Peony-Flowered. Tall with immense double heads. Mixed Colors. Pkt., 5c.

1198—Carnation-Flowered. Like a carnation. Mixed Colors. Pkt., 5c.

1199—American Legion. The kind the soldiers love. Large, single scarlet. Pkt., 10c.

1200—Tulip Poppy. An absolutely new type; blooms shaped like a giant red tulip. Pkt., 10c.

1202—Shirley. Petals like crinkled China Silk. Mixed Colors. Pkt., 10c.

1203—Sleepy Hollow Mixture. The kind Henry Field grew on his little truck farm years ago. Some of all kinds. Double and single, tall and dwarf, and all colors. You can't beat it. Pkt., 10c.

1929—SPECIAL POPPY OFFER. One packet each of the above six varieties, for 40c.

ROCKY MOUNTAIN GARLAND FLOWER. (Clarkia Elegans). Each branch is covered with buds and flowers in very brilliant shades of rose, white, red, and pink. 1205—Mixed Colors. Pkt., 10c.

SCABIOSA OR MOURNING BRIDE. This old-time annual which is once more decidedly in favor. Wonderful cut flowers.

1211—Lavender. 1212—Rose. 1213—Mixed Colors. Your choice, per pkt., 5c.

1214—SALVIA OR SCARLET SAGE. Plant liberal quantities in boxes, for you will want them to edge Canna beds, to set in front of foundation shrubs, and to slip into bare places in your perennial borders in late summer. No autumn garden is complete without its blazing glory. Pkt., 10c.

1207—SALVIA, Bonfire. Earlier than Splendens and not as tall. Flowers stand well above the foliage. Eighteen to 24 inches high. Pkt., 15c.

1215—SCHIZANTHUS. Bright little blossoms, blotched and speckled like butterfly wings. Fernlike foliage. Pkt., 5c.

1216—SNOW-ON-THE-MOUNTAIN. A beautiful annual foliage plant with variegated green and white leaves. 24 to 30 inches high. Pkt., 5c.

1208—SALPIGLOSSIS (Velvet Trampet). As easy to raise as Petunias. Flowers of deep purple and henna, overlaid with gold lace. A splendid cut flower. Mixed Colors. Pkt., 10c.

1173—SAPONARIA VACCARIA. Satiny pink flowers somewhat like an enlarged Gypsophila, valuable for cutting and largely used for mixing with other flowers. Pkt., 5c.

1217—STATICE SINUATA. The new annual everlasting which bears dainty pink, lavender and yellow ruffles along its flower stem. Fine for winter bouquets. Mixed Colors. Pkt., 10c.

1219—SUNFLOWER, Dwarf Double. Pkt., 5c.

1185—SWAN RIVER EVERLASTING (Rodanthe). For small basket and vase arrangements during the winter, these little flowers are charming. Pkt., 10c.

1239—SWEET ENGLISH VIOLET. Pkt., 10c.

Sweet Peas

Early Flowering Spencers

This is something new. They are ten days to two weeks earlier. They should not displace the late flowering type but should be grown in connection with them, then you will have Sweet Peas early and late.

1236—Early Harmony. Clear lavender. Pkt., 10c.

1237—Rose Pink. Bright rose pink. Pkt., 15c.

1238—Vulcan. The most vivid scarlet color ever seen in Sweet Peas. Pkt., 15c.

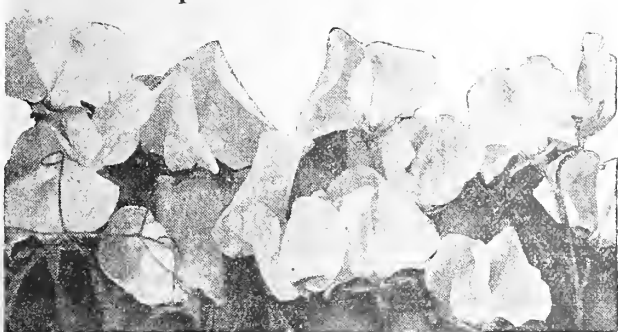

1327—Early Blue Bird. An attractive shade of blue. Pkt., 15c.

1328—Early Snowflake. Pure white. Pkt., 10c.

1264—Early Spencer Mixed. Contains all of the above, and more too. Pkt., 15c; Oz., 50c.

1944—SPECIAL SWEET PEA OFFER. One packet each of the above five varieties and one of the mixed. Special price, 50c.

Spencer Sweet Peas

Spencer Sweet Peas

The flowers of the Spencer type are more open, have longer stems, produce more flowers and for a longer period of time than the old Eckford's type. They are of enormous size and have a wide range of color. Both standards and wings waved and frilled. The word "Standards" refers to the top petals and "wings" to the lower ones. There is no question that inoculating culture improves the bloom and size of plants of your Sweet Peas.

1220—Austin Fredrick Improved. This is a large, pure lavender. Pkt., 10c.

1221—Crimson King. A distinctly new shade of crimson. Very bright. Pkt., 10c.

1224—King White. A giant white. Pkt., 10c.

1222—Carmelita. A light rose pink on white ground. Pkt., 10c.

1223—Rosabelle. A giant rose pink with long stems. Pkt., 10c.

1229—Youth. White, edged with a delicate soft rose-pink. Pkt., 10c.

1234—Blue Bird. A true blue; beautifully waved and frilled. Like the other new varieties, it is the lushest kind of a grower, with long stems that you like to pick. Pkt., 15c.

1233—Miss California. Orange and salmon-pink are rare colors for Sweet Peas. A vigorous variety with three or four blooms to the stem. Pkt., 15c.

1039—SPECIAL SWEET PEA OFFER. One packet each of the eight varieties mentioned above, 50c.

1941—Spencer Color Mixture, 40c

A Big Sweet Pea Garden

ALL THE FOLLOWING COLORS IN MIXTURE

Lavender Shades	Blue Shades
Crimson	Orange
White	Salmon
Rose Pink	Pink on White Ground
White Edged Pink	

We are fixing up something special this season. The mixture is made up of high grade varieties and good seed. It is mixed in the right proportions to make a good blend. Long stems, large flowers with petals waved and frilled.

A mammoth sized package, enough for a long row. You can have a big bouquet every day until they are gone. Enough for yourself and plenty to give away. The more you pick the more you will have. Packet contains between 600 and 700 seeds.

1941—Spencer Color Mixture, 40c.

Sweet Pea Mixtures

1230—The Spencer Mixture. A mixture of the very finest types for those who have limited space. Pkt., 10c; Oz., 35c; 1/4 lb., \$1.00.

1231—Grandiflora Mixture. The good old standard that we have furnished you for years. Pkt., 5c; Oz., 20c; 1/4 lb., 75c.

1264—Early Spencer Mixed. A splendid mixture of the early varieties. Ten days to two weeks earlier than the Spencers and Grandifloras. Pkt., 15c; Ounce 50c.

Sweet Pea Novelties

1232—Mary Pickford. This blossom especially suggests "America's Sweetheart" by copying the pink of her cheeks and a touch of the gold of her hair, and wearing the dainty ruffles of her party gowns. Pkt., 10c.

1329—Pinkie. The largest of all in the deep pink section. A most vigorous grower, producing on long stout stems well waved, nicely placed flowers of a beautiful rose pink shade. Pkt., 15c.

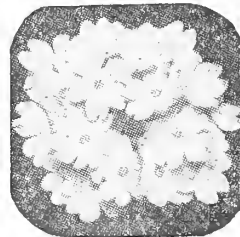

1326—Cherry Red. This is a special blend of the bright red colors in Sweet Peas. The flowers are produced on long stems and both standards and wings waved and frilled. Pkt., 10c.

The Dozen Price On Flower Seed Packets

12 five cent packets, your choice,	45c
6 five cent packets, your choice,	25c
12 ten cent packets, your choice,	90c
4 ten cent packets, your choice,	45c
Either alike or assorted.	

Verbenas

These are the magic weavers that mingle their glorious colors into Oriental rugs of bloom in your garden. Do not forget them this year. They are often used for undergrowth for lilies.

Verbena

1243—Purplish Dark Blue. Pkt., 10c.

1244—Lucifer. Scarlet. Pkt., 10c.

1245—Pink. Pkt., 10c.

1246—White. Pkt., 10c.

1247—Mixed Colors. Pkt., 15c.

Verbena Hybrida Grandiflora or Mammoth Verbenas. My sister, Jessie Field Shambaugh, asked me to list this special strain. The individual florets measure an inch and over.

1248—Rosea. A pure pink with large white eye. Pkt., 15c.

1249—Blue. White eye. Pkt., 15c.

1250—Mayflower. Pink. Pkt., 15c.

1240—SWEET SULTAN (Centaurea imperialis). Soft shades of lavender, purple and rose, in artistic thistle-shaped blooms. Pkt., 5c.

1242—TEN WEEKS STOCKS. Mixed Colors. Pkt., 5c.

1251—VINCA. A very free-blooming pink and white bedding plant with dark, laurel-like foliage. Pkt., 5c.

1241—TORENIA. A marvelous little annual with purple pansy-like flowers. Loves shade, and heat, and moisture. Height about one foot. Pkt., 15c.

California Giant Zinnias

The variety used now looks more like a Dahlia or a Chrysanthemum. Since they may be moved even when in bloom, it is desirable to plant a package of each color in your vegetable garden, and during the summer lift them and place them wherever needed in bare spots in your perennial gardens.

1252—Canary Yellow. 1254—Scarlet. 1255 — Lavender. 1256—Orange. 1258—Salmon Rose. 1259—White. Your choice, pkt., 10c.

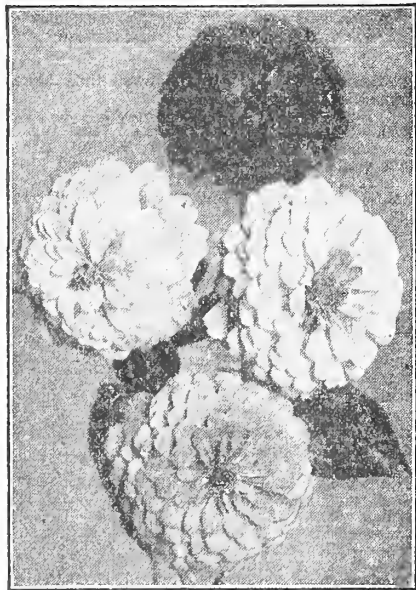

1940 — SPECIAL ZINNIA OFFER. One packet each of above six varieties, for 50c. 1260 — California Giants. All Colors Mixed. Pkt., 10c.

1261 — Exquisite. The most beautiful of the new Zinnias. Of immense size and blending from deep tyrian rose in center to light rose at the edge. Pkt., 15c.

1266—Cut and Come Again. Flowers are medium sized, long stems, for cutting but are satisfactory for bedding. Mixed Colors. Pkt., 10c.

1265—FLOWER GARDEN MIXTURE. A big packet of annual flower seed containing many varieties. A gorgeous riot of color, selected to bloom over a long season. Pkt., 10c.

Grow plenty and share with others. Brighten your home

California Giant Zinnias

HENRY FIELD CO.

Seeds of Perennial Flowers

Use some of them in a perennial flower bed or perennial border. Place it at the side and toward the back of your lawn. It can be all the way from 2 or 3 to 5 or 6 feet wide and from 10 feet long to as long as you want it.

The arrangement should be simple. Plan to suit yourself. Add to or take away from time to time. If a plant does not suit, dig it up and set in something else.

1293—AGROSTEMMA, Coronaria. (Hardy Rose Champion). Colors are crimson and white with rosy eye. The foliage is silvery white and about 2 feet high. Pkt., 10c.

1270—ALYSSUM saxatile. Yellow flowers in early April. Pkt., 5c.

1271—ANCHUSA. A large-growing blue flower for the background. Pkt., 5c.

Aquilegia or Columbine

1274—Long Spurred Hybrids. An unusually good strain of this popular perennial. Very large, long-spurred flowers, and a wide range of color. Pkt., 10c.

1275—Mixed Varieties. Seed of our own saving from all varieties. Pkt., 5c.

1276—BABY'S BREATH or GYPSOPHILA. The fine cut white blossoms are beautiful while fresh, or when dried as everlasting are indispensable in winter bouquets. Pkt., 5c.

An early blooming plant. Flowers well above foliage with long, graceful stems. Suitable for bedding or for cut flowers.

1278—CANTERBURY BELLS (Campanula). The well known "Cup and Saucer" plant. Pink, blue and lavender bells, half as large as a teacup. Mixed Colors. Pkt., 5c.

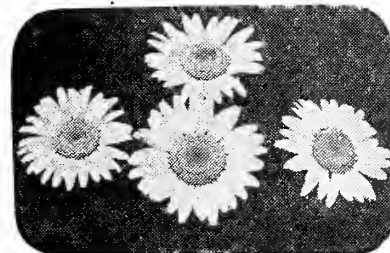

Columbine

1281—CHINESE LANTERN PLANT (Physalis). The large, orange-red pods are ornamental in winter bouquets. easily grown. Pkt., 10c.

1283—CLOVE PINKS. These are the pinks with gray, grasslike foliage and a soft spicy fragrance that are so useful as borders, or for the rock garden. Mixed colors. Pkt., 10c.

1284—MAIDEN PINKS or DIANTHUS DEL-

Shasta Daisy

TOIDES. A bright little flower that blooms in June and July. Mixed colors. Pkt., 10c.

1282—COREOPSIS Lanceolata. A yellow daisy-shaped flower. Will stand hot, sunny locations. Pkt., 10c.

1285—DAISIES, SHASTA, White. The well known large-flowering white Daisy, which was introduced from California. Pkt., 10c.

1272—DAISIES, SHASTA, Kelwal, Yellow. An easily grown perennial with fernlike foliage and yellow, daisy-like flowers. Pkt., 10c.

Delphinium

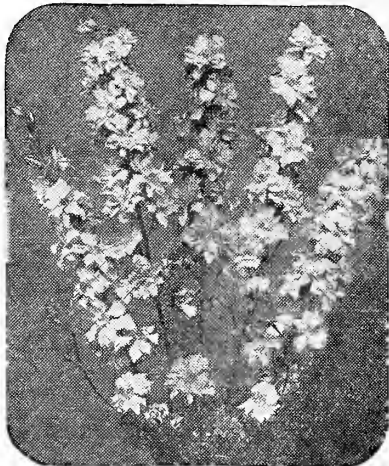

These are the beautiful hardy Larkspurs. They come in wonderful shades of blue and lavender, and the spikes sometimes stand higher than your head. You will wish to try a few of each variety.

1287—Belladonna. Probably the universal favorite because of its exquisite pale blue color. Branching instead of tall spike. Pkt., 10c.

1288—Bellamosum. Just like Belladonna except that it is a dark, deep blue, with a white center. Pkt., 10c.

1289—English Hybrids. Blossoms are arranged along the spikes instead of being in loose sprays like Belladonna. Pkt., 10c.

1291—Wrexham Hybrids. Often called the Hollyhock strain because

Delphinium

of the tall strong spikes with large single and semi-double flowers. Shows a good wide range of Delphinium colors. Pkt., 25c.

1294—DIGITALIS or FOXGLOVE. The spikes of bloom are sometimes 4 feet tall, and the individual tubular flowers are about 3 inches long. Mixed colors. Pkt., 5c.

1296—FORGET-ME-NOT (Myosotis). Low growing plant with dainty blue flowers. Pkt., 10c.

1297—GAILLARDIA (Blanket Flower). Color a blending of orange-yellow and various shades of red. Very useful as a cut flower, as it blooms all summer. Pkt., 5c.

1298—HARDY FLAX (Linum). Fine cut, gray foliage, and blue blossoms about half an inch across. Pkt., 5c.

1267—HEARTSEASE or TUPPED PANSY (Viola Cornuta). This is the Pansy with small blossoms that self-sows. Pkt., 10c.

1303—HELIOPSIS (Hardy Zinnia). Something like Hardy Sunflower but not as tall. Valuable cut flower. Golden yellow. Pkt., 15c.

1299—HIBISCUS (Mallow Marvel). Has immense white, pink or red Hollyhock-shaped blossoms. Mixed colors. Pkt., 5c.

Hollyhocks

Tall, stately old favorites; given plenty of room will make a wonderful showing during July. A splendid background for a flower garden and shows up well along the fence or grouped beside the house.

Hollyhock

1300—Double Mixed. Pkt., 10c.

1301—Single Mixed. Pkt., 5c.

1302—Allegheny. A wonderful fringed, semi-double type that blooms all summer. Mixed Colors. Pkt., 5c.

1306—LUPINES. Tall spikes of pea-shaped blossoms in pink, lavender and blue. Pkt., 5c.

1308—ORIENTAL POPPY. A very large brilliant red perennial poppy. Pkt., 10c.

1304—PERENNIAL 'SWEET PEA (Lathyrus latifolius). A sturdy and rapid growing vine, which is covered all through the late summer with masses of flowers in white, pink or rose. Mixed colors. Pkt., 10c.

1309—PLATYCODON (Chinese Bellflower). Blue and white. Blooms in July and August. Mixed colors. Pkt., 10c.

Pyrethrum Roseum

1311—PYRETHRUM roseum. (Painted Daisy). The blossom is daisy-shaped and comes in all colors of pink, white and rose. It is always in bloom at Decoration Day, and combines beautifully with Peonies. Mixed colors. Pkt., 10c.

1307—SCARLET LIGHTNING (Lychnis Chalcedonica). A brilliant red blossom with spikes about 3 feet tall. Will stand some shade. Pkt., 10c.

1295—SEA HOLLY (Eryngium). Burrs and stems a wonderful shade of blue. Used in winter bouquets. Pkt., 5c.

1286—STACHYS (Woundwort). Dwarf. Soft silvery foliage. For edging or borders. Pkt., 15c.

1312—STATICHE latifolia. Sometimes called "Lavender Baby's Breath." A useful everlasting flower for winter bouquets, and the hardy border. Pkt., 10c.

SWEET WILLIAM. Should be in every garden. The clusters are of every imaginable color and white, and very showy.

1268—Single Mixed. Pkt., 5c.

1269—Double Mixed. Pkt., 10c.

Field's Finest Mixed

1401—FIELD'S FINEST MIXED. Large Bulbs. Mixed colors in Gladiolus are just as pretty as mixed colors in any other flower and a great many people prefer them to the named varieties.

This mixture shows just about everything in Gladiolus colors. We grow them as a mixture in the field then add others to give them still more color. I don't believe you will find a better mixture anywhere. Large blooming size bulbs. Price, 12 for 35c; 25 for 70c; 50 for \$1.25; 100 for \$2.00.

1967—FIELD'S FINEST MIXED. Small Blooming Size. This is the same mixture as above but smaller younger bulbs. Price, 100 for \$1.00.

1970—FIELD'S FINEST MIXED. Bulblets. We offer the same mixture in bulblets. These are about as large as a pea and will not bloom this year but will grow a bulb to bloom next year. It is a good way to get a lot of Gladiolus bulbs at a small cost. Price, 200 for 25c; 1000 for \$1.00.

Unnamed Glad Collection No. 1997

24 bulbs, 75c.

You can buy your gladiolus bulbs much cheaper if you do not require the name. Most people soon forget variety names anyway.

The flowers are just as pretty as those that are sold under name.

All bulbs in these collections are large blooming size. Wide open flowers, long spikes and wonderful color.

One Primulinus in the list and it is a large one.

If you want gladiolus under name turn to the list of named varieties where you will find a large assortment to select from.

All of the following will be found in the collection. It cannot be broken or the bulbs sold singly.

- 3 bulbs salmon pink flecked with rose.
- 3 bulbs light pink. Very early.
- 3 bulbs clear yellow. Early.
- 3 bulbs a glorious deep scarlet.
- 3 bulbs tall graceful red.
- 3 bulbs cream white with dainty pink markings.
- 3 bulbs dark clear purple.
- 3 bulbs bright red. Tall spikes. Large blooms.

Orange and Yellow Shades

1430—ALICE TIPLADY. Beautiful orange-saffron. 3 for 18c; 6 for 30c; 50c per doz.

1460—FAIRLAWN YELLOW. Clear yellow and very early. 3 for 18c; 6 for 30c; 50c per doz.

1584—GOLD. Pure golden-yellow; throat a shade deeper. 3 for 25c; 6 for 45c; 75c per doz.

1677—J. A. CARBONE. A distinctive orange-salmon. Very popular. 3 for 18c; 6 for 30c; 50c per doz.

1690—JACK LONDON. Light orange with vermilion stripes. Fine. 3 for 18c; 6 for 30c; 50c per doz.

1507—PRIDE OF LANCASTER. A ruffled orange-salmon with throat blotched scarlet-red. 3 for 18c; 6 for 30c; 50c per doz.

White and Cream White

1563—ALBANIA. Pure snow white. Large wide open flowers. Late. 3 for 18c; 6 for 30c; 50c per doz.

1431—AUTUMN QUEEN. Creamy-pink. 3 for 18c; 6 for 30c; 50c per doz.

1569—CARMEN SYLVIA. Pure white with slight lilac pencil markings in throat. 3 for 18c; 6 for 30c; 50c per doz.

1438—ELORA. White with dark red blotches on lower petals. 3 for 18c; 6 for 30c; 50c per doz.

1444—LILY WHITE. Dainty creamy-white. A popular early white. 3 for 18c; 6 for 30c; 50c per doz.

1445—LUCETTA. Ivory white with lines of faint pink. Good. 3 for 18c; 6 for 30c; 50c per doz.

1446—MARY PICKFORD. Named for "America's Sweetheart." A delicate creamy-white, with throat of soft sulphur-yellow; stem and calyx also white. 3 for 18c; 6 for 30c; 50c per doz.

1497—MINNESOTA. Amber white with red markings in throat. 3 for 12c; 6 for 20c; 35c per doz.

Mary Pickford

- 1553—MAIDEN BLUSH. Dainty flesh-pink flaked with old rose. 3 for 12c; 6 for 20c; 35c per doz.
- 1606—MINETONKA. Salmon-yellow with cream throat. 3 for 12c; 6 for 20c; 35c per doz.
- 1491—MING TOY. Showy deep buff; yellow throat. Tall plant. 3 for 12c; 6 for 20c; 35c per doz.
- 1495—MYSTIC. Rose-pink. 3 for 12c; 6 for 20c; 35c per doz.
- 1800—MISHAWAKA. Canary yellow. 3 for 12c; 6 for 20c; 35c per doz.
- 1508—BRONZE BEAUTY. Buff-yellow; edges of petals streaked red. 3 for 12c; 6 for 20c; 35c per doz.
- 1434—ROANOKE. Pale yellow. Strong grower. 3 for 12c; 6 for 20c; 35c per doz.
- 1458—SHELL PINK. Apple blossom pink. 3 for 12c; 6 for 20c; 35c per doz.
- 1514—SOUVENIR. Large pure yellow. 3 for 18c; 6 for 30c; 50c per doz.
- 1555—SWEET ORA. Pale sulphur-yellow. 3 for 12c; 6 for 20c; 35c per doz.
- 1526—ULRICA. Large rich yellowish-orange. 3 for 12c; 6 for 20c; 35c per doz.

SPECIAL OFFER No. 1996. 19 bulbs, 1 bulb each of the Butterfly varieties, 55c.

- 1404—BUTTERFLY or PRIMULINUS MIXED. Contains most of above varieties which gives a good range of color. A rich mixture of this wonderful flower. Price, 35c per doz., 40 for 85c; or 100 for \$1.95, postpaid.

CANNAS

Circular Canna Beds

Most of you no doubt have often wished for a pretty circular flower bed on your lawn, but could not decide just what flowers to use, or how to go about it to make one. These beds are not hard to make when you use the right varieties.

Cannas are just the flower for this purpose, and are easily grown. In fact, you can hardly keep them from growing. No other flower furnishes the tropical-like foliage and bright showy flowers that looks so well in a circular bed.

All our varieties are the large flowered kind and are attractive and bloom freely. We have discarded the small flowering varieties. The bloom stands well above the foliage so that they make a good showing.

We will send you a list of the varieties for these beds and just how you are to place them. We will select varieties that will match up well as to foliage, bloom and height.

1961—FIVE FOOT BED. 13 plants. 4 tall for center, and 9 medium height for outside of a formal bed. \$1.25.

1962—SEVEN-FOOT BED. 19 plants. 1 tall for center, 6 medium for second circle, and 12 for outside of bed. \$1.75.

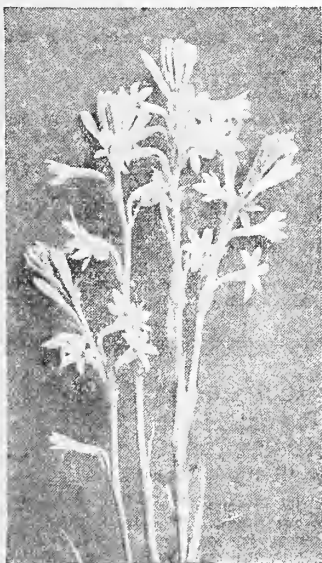

1963—TEN-FOOT BED. 37 plants. 1 extra tall for center, 6 medium height for second circle, 12 for next circle, 18 shorter for outside circle. \$3.50.

1957—Canna Border Collection

24 Bulbs \$2.25; 12 Bulbs \$1.25

Use as a background for lower growing flowers; or as a screen to hide some unsightly place, a chicken yard, old fence, or set at the side or back side of the lawn. Colors well blended. Six each of four named varieties, 24 bulbs, postpaid, \$2.25. Three each of the same list or 12 bulbs, \$1.25.

1844—MEXICAN TUBEROSES

Mexican Tuberose

This variety grows a strong, sturdy spike, pure white, and very fragrant flowers. It can be used as a cut flower or can be allowed to stand in the garden where its pleasing fragrance will be quite noticeable, especially in the evening. 4 bulbs for 30c; 75c per dozen; \$5.25 per 100.

1847—CALLA, Golden Yellow (Elliottiana)

A beautiful new Calla for outdoor culture and for pot culture, for early Spring bloom. The flowers are large and a clear golden yellow. Leaves a dark green spotted a creamy white, making a very striking and pretty plant. It is a good strong grower and we are furnishing large bulbs so you will have no trouble in growing a nice plant.

A clump of a dozen of these Callas bordered with a good free-blooming, dwarf plant, makes a beautiful show when all are in full bloom. They are far superior to the old white Calla or the Spotted Calla for outdoor plant-

1985—Scarlet Canna Bed

13 Bulbs \$1.25

A wonderful circular bed can be made of choice varieties of Cannas and Zinnias; 10 feet across. The center 5 feet a brilliant red Canna and on the outside a row of Giant Scarlet Zinnias.

Special Price, for 13 bulbs and two packets of Zinnias, \$1.25.

1841—Grand Mixture of Cannas

This mixture is bound to suit you if you like plenty of color. Not only a variety of color in the flower but both the green and bronze foliage varieties. Good healthy roots sure to grow. Price, 6 for 50c; 12 for 90c; 25 for \$1.80; 50 for \$3.35; 100 for \$6.50, postpaid.

NAMED CANNAS

All varieties except as noted, 15c each; 6 for 75c; \$1.25 per dozen.

1814—TEHAMA. 3 to 4 feet; green foliage. One of the most striking cannas we list. A warm, deep rich red with a slender tongue of golden yellow on lower petal. 20c each; \$2.00 per doz.

1819—HUNGARIA. 3 feet. Green foliage. A delicate pink, closely resembling La France.

1822—RICHARD WALLACE. 4 feet. Green foliage. Large canary yellow flowers. A popular variety.

1836—PRESIDENT. Four feet. Green foliage. Color a rich glowing scarlet. Large truss of flowers on strong erect stalks well above foliage. 20c each; \$2.00 per doz.

1826—EUREKA. About 4 feet. Green foliage. Large white flowers which first appear cream. The best white.

1833—KING HUMBERT. 4 feet. Bronze foliage. Very large orange-red flowers.

1820—LA FRANCE. 3 feet. Green foliage. A delightful shade of pink.

1840—YELLOW KING HUMBERT. 5 feet. Green foliage. Large golden yellow flowers dotted with bright red. Some plants will occasionally give a scarlet or scarlet-striped flower.

1813—WYOMING. 5 to 6 feet. Bronze foliage. Large orange colored flowers.

1835—MADAM CROZY. 3 to 4 feet. Green foliage. Crimson flowers with irregular border of golden yellow.

1825—PENNSYLVANIA. 5 feet. Green foliage. Bright red flower.

1818—LADY CALIFORNIA. 3 feet. Green foliage. Grows an immense truss of flowers a beautiful straw yellow with lower petal lightly flecked a deep rose.

1827—CANDELABRA. 4 feet. Three to five flower branches on each stalk at one time is the average. Lovely orange-scarlet blooms. Green foliage. 25c each; \$2.50 per doz.

1986—SPECIAL OFFER. One bulb each of the 13 Canna

varieties listed on this page, \$1.25.

ing. Plant in well drained, fertile soil, loose and mellow.

Large size, 35c each; 3 for \$1.00.

1848—CALADIUM or Elephant's Ear

These plants do not bloom, but they are valued for the appearance of their enormous leaves. They often grow 3 feet in length, and make a fine background for small plants and flowers. Give rich soil and plenty of moisture. 20c each; 2 for 35c; \$1.95 per doz.

1901—Giant Flowering Amaryllis

75c each or 3 for \$2.00, postpaid

Mammoth bulbs sure to bloom. The flowers show variegated colors including delicate pinks, and all shades of red in stripes and bands and on a light to pure white ground. Some show more variation than others. A surprise in every bulb. No two alike. Price, mammoth bulbs, 75c each or 3 for \$2.00, postpaid.

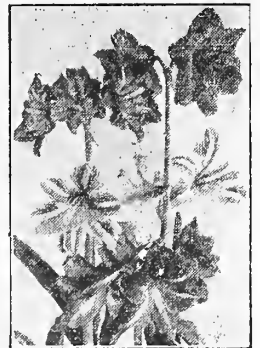

A Perennial Border

For less than "six bits" you can buy enough seed to plant a good sized perennial flower bed or border. To this you can add to from time to time or change as you like.

Annuals may be grown in this same bed if you wish and thus prolong the season of bloom.

Grow a few extra plants for your friends and they in return will exchange with you and in that way increase the size of your collection. Plan to suit yourself or follow a plan we will furnish with each collection.

Flowers for spring and Summer and Fall.

Amaryllis

DAHLIAS

Our Dahlia Guarantee

If they do not bloom we will refund the price paid, or replace them free of charge. It does not make any difference whether it is a cheap variety or a high priced one. Every Dahlia bulb we sell carries that guarantee. There are no strings on this guarantee.

Plant the latter part of May or first of June and you will have an abundance of bloom. Folks living where the summers are not so hot can plant them any time. There are four general types, the "Show", a very formal flower; the "Decorative" or less formal and large; the "Cactus" with slender pointed petals and the "Pompon" or a diminutive Show.

1902—FIELD'S MIXED DAHLIAS

12 Bulbs \$1.50

We have a tremendous crop of mixed Dahlia bulbs this year. We must have at least 100,000 bulbs and probably more. We are more than satisfied with the crop but what is troubling us now is how to sell them. One hundred thousand bulbs is quite a bit more of the mixture than we ever sold in one season before.

After talking it over we have decided to make a special price on them. It is a lower price than we have ever sold Dahlias at before. It is a great chance for you to get some good Dahlias at a bargain.

We will see that you get good, sound bulbs and varieties from every color section among the dahlias. There will be various shades of red, scarlet, crimson, pink, yellow and white, as well as other colors.

We will also see that you get varieties from each type of flower—the Decorative, Show and Cactus. With all these colors and types of flower you will have a wonderful collection.

The next thing you will want to know is "will they bloom?" They sure will. If you have had trouble to get Dahlia blooms, try this mixture. If they don't bloom satisfactory to you, you get your money back. Keep cutting them and they will keep blooming until frost.

We will give you good sound bulbs, sure to sprout and carefully packed. We will try and give you the biggest \$1.50 worth of Dahlia bulbs you ever bought.

12 Bulbs, \$1.50, postpaid.

NAMED DAHLIAS

Decorative Type

1873—DARLENE. Very early. Blooms freely. A beautiful shade of shell pink, with a dainty blending of white at center. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

Decorative Type

1875—MABEL THATCHER. A giant among dahlias. Soft pale yellow and the formation of the blossoms is almost perfect. Stems stiff and strong. 50c each; 3 for \$1.35; 6 for \$2.50; 12 for \$4.00.

1896—PINK JACK ROSE. Something like the Red Jack Rose only a lavender-pink in color. Blooms freely. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1882—AUTUMN QUEEN. A lovely combination of apricot, gold and bronze. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1884—MARION. Large flowers of bright red. The outer petals reflex toward the stem, giving it great depth. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1887—PRIDE OF CALIFORNIA. Fine large flowers of brilliant red. Extra good. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

Place a vase of flowers on the dining table.

1871—ELDORADO. Full double blossoms of pure gold on long drooping stems. Plants loaded with bloom. Seems to stand hot dry weather better than the average. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1872—FRANK A. WALKER. A pretty shade of deep lavender-pink. Blooms freely through hot dry weather. Very early. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1893—JACK ROSE. A brilliant shade of crimson red just like General Jack rose. A free bloomer and fine for yard decoration. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1850—MINNIE McCULLOUGH. A beautiful canary yellow tipped and shaded crimson. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

Cactus Type

1891—COUNTESS OF LONSDALE. A pretty shade of rich salmon with faint tinge of apricot. A wonderful cut flower. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

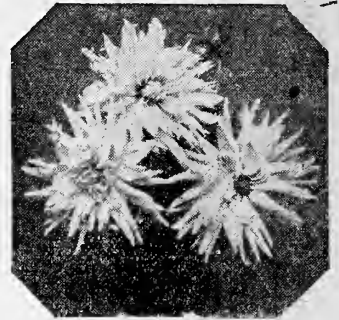

1860—GENERAL BUHLER. Maroon-red tipped with white. Stems long. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1866—GOLDEN GATE. Large flowers of rich gold, overlaid pale bronze. A free bloomer. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1879—INDOMITABLE. A n early variety with large rosy-mauve flowers. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1886—PERLE DE LYON. Pure white flowers borne on good stems. Petals cleft at the tips. Medium size. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1894—PIERROT. A unique and striking flower of amber color, sometimes tipped with white. Large size with long narrow incurved petals. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

Cactus Type

Show Type

1888—ARABELLA. Pale primrose yellow, suffused with pink. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1889—BONNIE BLUE. The nearest blue of any dahlia. A lovely unique color of bluish-lavender. Long stemmed and free blooming. 35c each; 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

1862—FLORAL PARK JEWEL. Almost a perfect ball. Long stems. Flowers red tipped with white. Medium size. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1852—PENELOPE. White center tinted lilac. Good for cutting. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1863—QUEEN VICTORIA. A clear, bright yellow. Very early and blooms freely. One of the most satisfactory show dahlias we have. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1890—O. B. STEVENS. Very similar to Queen Victoria. A fine yellow. 20c each; 3 for 55c; 6 for \$1.00; 12 for \$1.90.

1876—TILLAMOOK. Large ball-shaped blossoms, composed of tightly quilled petals of rose-pink. Long stems and flowers produced freely. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1859—A. D. LIVONI. A delicate pink; long stems. Quilled petals; medium size. An old variety but very popular yet. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1861—BETTY LOU. A golden yellow tipped crimson. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

Show Type

Pompon Dahlias

1854—SNOWCLAD. Perfectly formed little blossoms of pure white. Free bloomer. 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1865—CORONA. Pure White miniature flowers. Called "the Carnation flowered dahlia." 25c each; 3 for 70c; 6 for \$1.35; 12 for \$2.50.

1965—Color Collection of Dahlias

My Paint is FULLY GUARANTEED

Order It at My Risk!

Here we are again all ready to get after you folks who are living in houses needing paint. I started selling paint in the first place because I wanted to bring the price of good paint down to where you could all afford to use it. I haven't changed my mind a bit about it. Don't be fooled about painting. It is an investment and a good one if you get good paint.

And Henry Field's Paint is good paint, you can bet on that. It's good quality, rich, finely prepared and carefully mixed and we put a man sized guarantee on every gallon of it. We have proven the quality of Henry Field Paint to thousands of our customers and we are ready and glad to prove it to you.

Here's the guarantee and you can't beat it: "Use 2 gallons out of your order. If it doesn't convince you of all we say and then some, fire it back. You're welcome to the 2 gallons. Yes, and we guarantee it to be fresher. Spread better. Work easier. And go farther. After any reasonable length of time, if the paint is not giving you the service you are entitled to, we will send you paint free to repaint the job."

Now — square around and get your painting done. Start with your house and go right down the line. Give your buildings a new suit of clothes. It will mean money saved in the long run. And it's worth all it costs in the new pride you'll have in your place — because a fellow can't help being ashamed to live in a shabby, unpainted place.

You can't beat Henry Field Paint for service and fair price. It will come to you fresh from the factory and every gallon will be guaranteed exactly as stated above. Send us your order. It will be the best money you spend this year and will give you the most pleasure.

MORE MERCHANDISE BARGAINS

We have lots and lots of special merchandise bargains you won't want to miss. Write for our prices before you buy. Here are some items we are especially proud of:—

Field's Famous Washing Machine — Wonderfully efficient and unusually low in price.

Henry Field Tires — Strongest tire guarantee being made today with prices lower than ever before.

Radio Sets — Marvelous tone, close precision tuning fine reception and long distance — at a price that challenges them all.

Write for our prices on these and many other things before you buy. You will save money by ordering from Henry Field. — as thousands of our regular customers will tell you.

EASY PAYMENTS MONTHLY

Yes, we have an Easy Buying Plan with only a small amount down and the balance in Easy Monthly Payments. Write for our Special Easy Payment Order Blank showing you how convenient it is to order from Henry Field on time.

Paint the Barn, Too

Our Barn Paint also stands right up front for fine quality, long service and fair price. It's fresh, spreads better and looks better. Yes, it carries the same guarantee as our House Paint. Don't let your barn go to ruin for lack of paint. You can beat the weather man and save repair by painting now. The longer you put it off the more it's going to cost you.

These prices are low — especially low when they will get you such a good, high quality paint.

HENRY FIELD CO.

This is our Biggest and Best Harness Value

30 Days Trial

We have featured this "Economy" Harness for several years. It is our leading value in Harness, the most harness you will find anywhere for these prices.

Economy Harness—first of all—has the real harness leather in it. Not belly leather. Not split leather. And none of the soft-tanned stuff. It is choice leather from end to end. It is put together with the care and attention generally given only to the very high priced sets. The hardware is good, heavy and substantial, too. The set is made to fit a good, big team so you won't be disappointed by getting skimpy size.

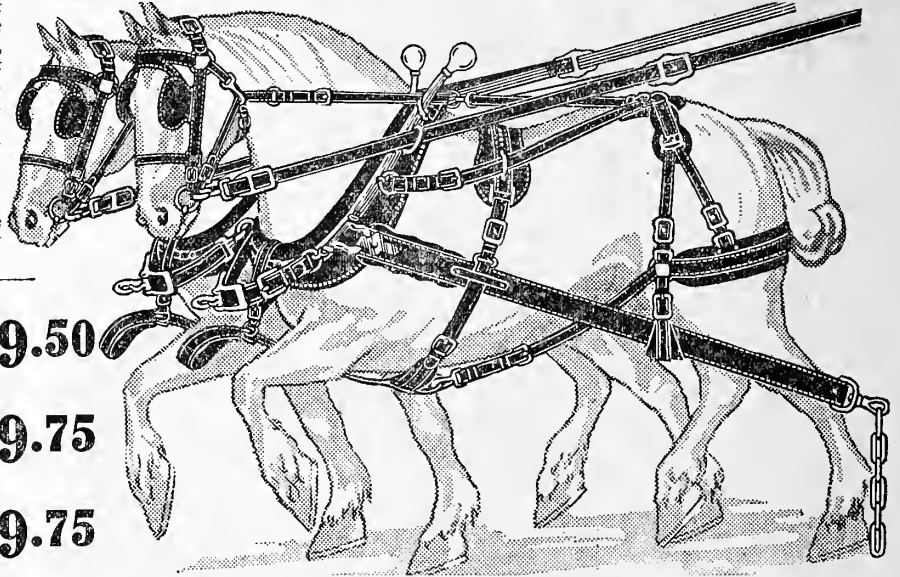

"I got two sets of harness last winter. They are the best harness I have ever had in workmanship, strength and material, and also fit the horses perfectly. I also saved \$15.00 a set on it."—CHAS. M. WARREN, SPENCER, IOWA.

"I have bought two sets and six collars. I certainly think they are wonderful for the money. I saved at least \$25.00 on the two sets and at least a dollar on each one of the collars."—R. L. HOUGHLAND, STORY CITY, IOWA.

Two of the BEST Drum Brooders EVER MADE

Manufactured by World's Largest Brooder Mfrs.—\$30 Values—we sell at Lowest Prices in History
Your Choice of Hood or Canopy Type \$19.75

Hood Type \$19.75

Shipping Weight 75 lbs.

This is the fastest selling and most popular and best made type of Drum Oil Brooder on the market and Drum Oil Brooders are best of all Brooders. It will heat any size brooder house up to 16 ft. square even on coldest nights. The Automatic Control is the most accurate and nearest fool proof of any on the market. You won't have to get up nights to look at it. It holds the temperature in your house just where you want it. You can burn Furnace Oil (Distillate) or Kerosene. Furnace Oil is just as good and costs only about ½ as much.

Has regular Furnace burner. Has no wicks. No gas or fumes to stunt chick growth. Automatically ventilates house. Is easy to operate. Is safer than coal stove or Blue Flame Oil Brooders, and furnishes more heat and steadier heat. Has big 24 inch drum that radiates worlds of heat.

Comes complete with 8-gal. tank, oil pipe, smoke pipe elbow, draft adjuster and finest automatic heat control ever designed. Has same tank, pipe and control as pictured in Canopy Type at right. All you need extra is some 5 in. smoke pipe. We ship from Illinois Factory or Shenandoah and sell in our retail stores.

Complete With
Furnace
Type
Burner
and the

Best Automatic
Control Ever Made

FREE BOOK

A card or letter brings complete Poultry Supply catalog with full descriptions of money-saving poultry equipment.

60-in Canopy Type \$19.75

Shipping Weight 75 lbs.

This is the one we sold last year and that everyone liked so well. It is almost the same as the Hood Type described at left except that the heat drum is 21 inches in diameter instead of 24. Many say a canopy saves heat and many want a canopy for chicks to hover under. However, more people buy the hood type. Both are good and our price is \$10.00 to \$15.00 under most all competitors. The quality is the finest.

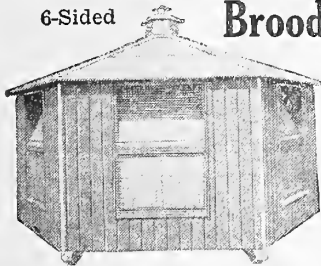

80 lb. Bale Peat \$1.50
160 lb. Bale Peat \$3.00

F.O.B. Iowa Shipping Point

Peat Litter should be used at least the first month by everyone in brooding chicks. Keeps floor dry and warm and absorbs 15 times its weight in moisture. Need not be changed oftener than once a month. Small bale is sufficient for small house and large bale for largest brooder house. This is fine quality and lowest prices we ever saw. Freight is extra but takes low rate.

Save up to \$25.00 on 6-Sided Brooder Houses

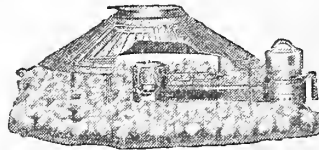

12-ft. 500 Chix
Only **\$75**

14-ft. 750 Chix
Only **\$89**

16-ft. 1000 Chix
Only **\$110**

Shipped from Iowa, So. Dakota and Illinois Factories.

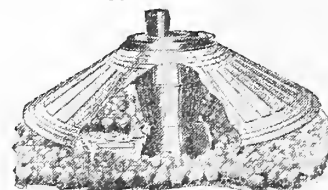

This is positively one of the best 6-sided Brooder Houses on the market. It is made of heavy lumber, has thick, warm floor; big, roomy, Screen Glass windows; ventilator and chimney, skids and everything complete. If you pay \$25.00 more you won't find better. We save you money by selling direct. Can ship from point near you in sections. Simply bolt together. Easy to erect. Write for catalog.

Automatic Oil Brooder

This Brooder is the best buy we could find in a Blue Flame Brooder. It has a Thermostat Flame Control that regulates the heat by controlling the flow of oil. Will reduce flame to candle-like flame in warm weather or up to full heat in cold weather. Has no valves, floats or sliding joints. No leveling needed. Cannot overflow. Has strong, heavy canopy.

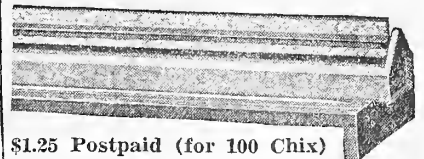

Size	Wt.	Price
32 in. Canopy	36 lbs.	\$ 9.75
42 in. Canopy	39 lbs.	10.75
52 in. Canopy	46 lbs.	11.75

Automatic Coal Stove

Has Double-Check damper control. Just fill with coal. When required temperature is reached Thermostat shuts off bottom draft and opens top check draft. Works like automatic furnace. Holds fire good, is well made and the best coal stove buy we know of.

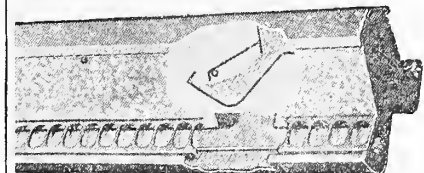

Canopy Size	Ship. Wt.	Price
42 in.	75 lbs.	\$10.50
52 in.	88 lbs.	12.75
60 in.	110 lbs.	15.40

\$1.25 Postpaid (for 100 Chix)

48-in. Chick Trough Feeder

This is the new, Reel Type Feeder. Furnishes most feeding space at lowest cost. You need one of these for every 100 chicks. Price \$1.25 each postpaid. Also have 36 in. Feeders of lighter material and no stand packed in cartons of 6 feeders for \$2.00 postpaid. 6 Feeders will feed 500 chicks. Wonderful bargain.

30 in. Waste-Not Feeder \$1.25 Postpaid

40 in. Waste-Not Feeder 1.65 Postpaid

Popular style, large capacity, hopper feeder with rod that absolutely prevents wasting feed. Has hinged top and is well made of heavy material. Allow 1 inch space per chick.

Eby's Flu Remedy

Stops colds, roup and Flu. Best thing we have ever found. Thousands use it. Treats 150 chickens or 75 hogs. \$1.50 bottle postpaid.

WHITE HI-TONE

for Coccidiosis
Most popular remedy for coccidiosis, so-called White Diarrhea and intestinal infection. 6-oz. bottle \$1.00. Pint \$2.00, postpaid. Money back if don't suit.

Stop Cannibalism with NO-PIK

For chicks or mature stock that toe-pick or wing-pick. Simply apply to bleeding parts. Tastes bad, smells bad. Use also as preventative. 8-oz. jar \$1.00 postpaid.

Cod-Liver Oil

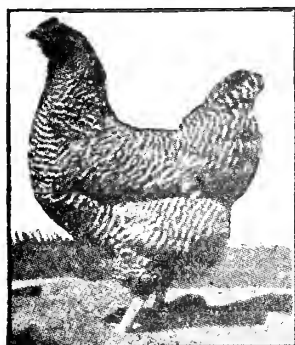

Comes in powdered form. Very easy to mix. Rich in Vitamin D which takes place of direct sunshine. State Colleges recommend it. 10 lb. package (for 500 lbs. feed) \$2.50 postpaid, without yeast \$1.75.

W. D.

(Water Disinfectant)

A Chlorine Compound in powder or tablet form. Should be used in all drinking water for chicks and mature stock. Goes farther than liquid compounds. Large pkg. \$1.00 postpaid.

World's Largest Importers EGG-BRED Chickens

World's Egg Champion

This Barred Rock hen laid 358-eggs in 365 days and which is a world's record. We have some of this same blood in our Importation.

World's Champion Leghorn

This White Leghorn broke all World's records this year for highest Leghorn hen with 357-eggs in 365 days. We offer same blood lines from our Importation.

Here is one of three Importations made this year from Canada and England. We are now admitted the World's Largest Importers of Egg-Bred chickens. Prof. Lloyd of British Columbia, Canada, writes, "This is by far the largest order we ever received. The Leghorn cockerels are from

R.O.P. trapnested hens with records of 250 eggs up and on sires side 270 to well over 300. Rocks, Reds, Orpingtons and Wyandottes have records up to 300-eggs with none lower than 200. We are confident that results (from your matings) will far exceed your fondest expectations."

Which Grade to Buy — Lowest Prices — Finest Quality

Trapnest-Sired — This is our finest Egg-Bred grade. Males were imported from best breeders and mated to our best hens. Canadian producers claim 80% of hens with trapnest records of 225-eggs and 90% with 300-eggs in their country. The Imported Tom Barron males are from 301-egg dams or better. Over \$6,050.00 worth males Imported. We challenge anyone in the U.S. to equal this grade. Our prices are very low. All stock **Blood-Tested** and Accredited.

Special AAA Grade — Same quality as we sold as AAA grade last year and much better than most sell as AAA grade. Hens are good quality and males are from State Colleges, Trapnesters and Specialty Breeders. And

compare our low prices with others. All Stock **Blood-Tested** and Accredited.

Standard A Grade — From Standard, carefully culled, purebred stock of good farm flock quality. All Stock **Blood-Tested** and accredited.

Send only \$1

Only \$1 books your order for any number of chicks for delivery in January, February, March, April or May. Pay balance on arrival.

BLOOD TESTED CHICKS

Read all about **Blood-Testing** for B.W.D. on next page. State Colleges everywhere say **Blood-Tested** Chicks are worth much more. All our flocks are **Blood-Tested**, yet our prices are lowest in history. Order early.

Northern Blood
New, hardy, northern blood will put new life and pep in your flock. It will mean more eggs, better health & more profits. The best is cheapest in the long run. Order early.

WE DON'T GUESS
WE TRAPNEST

Does It Pay to Blood Test For B.W.D?

Diseased (Curdled)

Healthy (Clear)

Yes, Say Leading State Colleges

Here's the whole story about **Blood-Testing** as told by the State College folks. State Colleges are run to get facts. When all agree that **Blood-Tested Chicks** are worth much more it must be so as they raise and experiment with both kinds. We sell **Blood-Tested chicks** in all grades and breeds. Write for **FREE** circular on **Blood-Testing** which explains how we do it.

Worth 4c to 5c More

"The blood tested chick is worth a great deal more than one from an untested hen. I do not know the exact amount but I would say around four or five cents more."—Louisiana State University.

5c to 10c More Valuable

"Generally speaking, it is my opinion that blood tested chicks are worth from five to ten cents more than untested stock."—Alabama Polytechnic Institute.

Insist on Blood-Tested Chicks

"In this state (South Carolina) our buyers of baby chicks insist on blood tested stock so it is largely a matter of sale or no sale with our batcherymen."—Clemson Agricultural College.

Worth 50% More

"All evidence now available points to the fact that chicks hatched from infection-free eggs are worth 50 per cent more than the ones from untested birds."—University of Nebraska.

BLOOD TESTED CHICKS

All our flocks are tested for B.W.D. (Bacillary White Diarrhea). Play safe—buy only **Blood-Tested Chicks**.

Must Blood-Test Flocks

"As I understand the formaldehyde gas fumigation the process is intended only as a control measure to prevent the spread of the disease. Those chicks that have the disease in their system will, of course, continue to be infected. This treatment will only prevent the spread of the disease to other chicks. The only satisfactory way to eliminate the disease is to **Blood-Test** the flocks."—University of Missouri.

Customers Pay 10¢ More

"In this section the cost to a customer of a tested chick is about 10 cents more than that of an untested chick."—Rhode Island State College.

Will Buy Only Blood-Tested

"The majority of people in New England will not buy chicks from non-tested stock at any price. Our people have no trouble in getting 25c to 30c apiece for chicks from tested flocks."—Massachusetts Agricultural College.

Fastest Growing Breed

Lay Like Average Leghorns, Weigh Heavier and Lay Bigger Eggs That Bring Bigger Profits.

Booth **EGG-BRED** White Minorcas are taking the country by storm. We sold more White Minorca chicks last year than of any other breed. If you want a breed that Judge Branch says will replace Leghorns get Booth White Minorcas. All stock **Blood-Tested** for B.W.D.

New, Lower Prices

(We sell cheaper than Booth himself)

	25	50	100	500
Utility Flock Matings	\$4.00	\$8.00	\$15.00	\$75.00

Trapnest-sired Matings	6.50	13.00	25.00	125.00

Eggs 1/2 above prices on chicks.

Started Chicks—2 weeks old \$13.00 per 100 extra, 3-weeks old \$16.00 per 100 extra.
SEND \$1 to book your order for any amount.

On right is Eden C. Booth, world famous White Minorca man showing some of his **Egg-Bred Trapnest White Minorcas** to Ross Salmon, our **KPNF Poultryman**. Mr. Booth fills all our White Minorca orders before he does his own and fills them from his very best stock.

A Hen Laying 30-Oz. Eggs Makes More Money Than One Laying 23-Oz. Eggs

BOTH cost the same to feed and raise, yet the big 30-ounce eggs of the White Minorca bring highest market prices. Booth's White Minorcas have never been beaten in an egg laying contest and it is easy to see **Booth's** why a flock of this strain is more profitable than an even larger flock of another breed producing 22 or 24 ounce eggs.

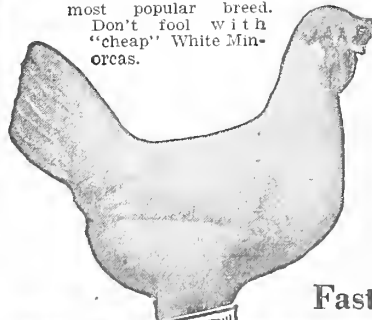

Best Known Strain in the World

More Booth's strain White Minorcas are sold than any other strain in the world. This leadership has been earned. It is due wholly to the fact that they produce bigger profits, and buyers all over the world demand them. Those who are able to supply this demand get more for their eggs and chicks.

Start Now

Build a local business of your own and cash in when others turn to White Minorcas. The coming of graded Egg Markets will undoubtedly make Big-Egg White Minorcas America's most popular breed.

Don't fool with "cheap" White Minorcas.

**THIS
BOOK
TELLS
THE
STORY**

Mr. Reese V. Hicks, Managing Editor of the International Baby Chick Ass'n, says, "I do not believe there is a flock anywhere that will approach yours in all qualities required for good Minorcas."

Yield Contest Winning Seed Corn

Increase Your Yields - Get a Kind that Always Matures

Test Your Seed

Few realize that much "crib corn" won't grow this year. Test yours. Don't bite and guess — that won't go. We are working hard, testing hundreds of samples and will have some extra good seed but no big amount. We have put the price right down to bottom. If you appreciate it send order early. We guarantee satisfaction both as to test and quality.

All Popular Varieties

Main Crop Yellow	Main Crop White
Golden Utility	Iowa Silvermine
Pfister's Krug	Boone or Johnson
Field's Utility	County White
Shenandoah Yellow	Cornplanter
Shenandoah Special	St. Charles
Iowa Goldmine	Early Sorts
Nebraska Cattle Corn	(90 days here)
Smooth or Rough	Golden King
Reid's Yel. Dent	Minnesota No. 13
	Pride of the North
	Red 90-day
	Silver King (White)

Pfister's Krug

Iowa's Greatest Yield Winner

For 7 or 8 years Krug corn has lead the Yield Contest in Southern Iowa for consistently high yields. The Pfister strain is best and has lead oftenest. If you want Iowa's greatest open-pollinated, main crop corn try Pfister's Krug's. See ear above. Wonderful feeding corn and, of course, yellow. We get seed direct from originator. Supply is limited. Order early.

Golden King for Northern Iowa

Golden King is the greatest yielder for northern Iowa same as Pfister's Krug is for southern Iowa. Try it.

At Lowest Prices

Standard Grade	----- \$2.50 bu.
Extra Select	----- 3.00 bu.
Hung and Dried	----- 3.50 bu.
Ensilage (White, Yellow or Early Dent)	----- 1.50 bu.
F.O.B. Shenandoah — Sacks Free — Germination Guaranteed	

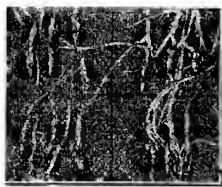

On orders for 5 bu. or more deduct 10¢ per bu. Add 25¢ per order if less than 1 bu. Prices subject to advance without notice.

Which Grade to Buy

We have most all popular varieties in any of the 3 grades priced above. The Standard Grade is good, high germinating, hand selected corn, run over 2 graders and is fairly uniform for grade. The Extra Select is a finer selection and is run over 3 graders and only the finest extra select kernels saved for seed. Hung and Dried is the extra select and in addition was picked and dried before freezes and is as near 100% as is possible to make any seed corn. Ensilage or Fodder corn is for planting thick and is not graded.

Write for Free Samples Corn

Guaranteed to Grow

Strong Germination

Each and every grade we sell is guaranteed to test to suit you or you can return the seed and get your money back. We will stand or fall on your judgment. We test and retest and check every lot very carefully. We cannot guarantee a stand as there are too many bugs, worms and cold weather to contend with. But test it any way you please.

Golden Utility

Medium Early. Iowa Yield Contest Winner

It is earlier than Krug's and later than Golden King. Fine for central Iowa, eastern half Nebraska, etc. In fact, does good anywhere it will mature. Has wide, meaty grain and is finest feeding corn I ever saw. This was our biggest seller last year and will probably be our best this year. Wonderful all-around corn for good yield, early maturing and feeding value. Offered in 3 grades.

CORN DUST

1 lb. \$1.50
Can P.P.

Non-poisonous, combination disinfectant and rodent-repellant. Not only controls diseases like mercury products but contains bad smelling and bad tasting ingredients that may help repel pests. Has been officially tested and found to increase yields from 4½ to 21½ bu. per acre. Acts as stimulant, disease destroyer and repellent. Non-poisonous and harmless. 1-lb. can treats 5 to 8 bu. seed, \$1.50 post-paid.

Merko \$1.75 can

Best of all mercury treatments but no better than Corn Dust for diseases and contains no repellent and is a poison and must go express collect. \$1.75 for 1-lb. can (5 to 8 bu.)

Hybrid or "Mule Corn" Wins Everywhere

"All I have room for here is to print letters from satisfied growers. If you want to know how we make the Hybrid or "Mule Corn" write for circular. It is a cross of expensive Inbreds and every ear is from a de-tasseled stalk. It is made by the Henry Wallace system. Letters from growers and County Agents prove it the Greatest Money-Making Corn for the Middle West.

Graded Seed — \$9.00 bu.

Ungraded Seed 6.50 bu.

Same corn except for grading. F.O.B. Shenandoah — Bags Free — Tests Guaranteed.

Special—Enough for 1-acre \$1.50 P.P.

If less than 1 bu. is ordered add 25¢ per order. Hybrid Corn means Bigger Yields, Stiffer Stalks and More Ears to Stalk.

Supply is limited. Order early.

BIG YIELDER — STIFF STALKS AND LOTS OF 2-EAR STALKS

"The Hybrid corn stood up like fence posts while my own corn lodged so bad the horses could not follow the rows when picking it. Hybrid made 70 bu. per acre while my own corn made 40 bu. Parts of the field made more than 100 bu. per acre."—W. G. Reeves, Meadow Grove, Nebraska.

"Your Hybrid yielded 95, 110 and 124 bu. per acre. Outyielded ordinary varieties."—F. E. Krause, (Co. Agent) Jackson Co., Ia.

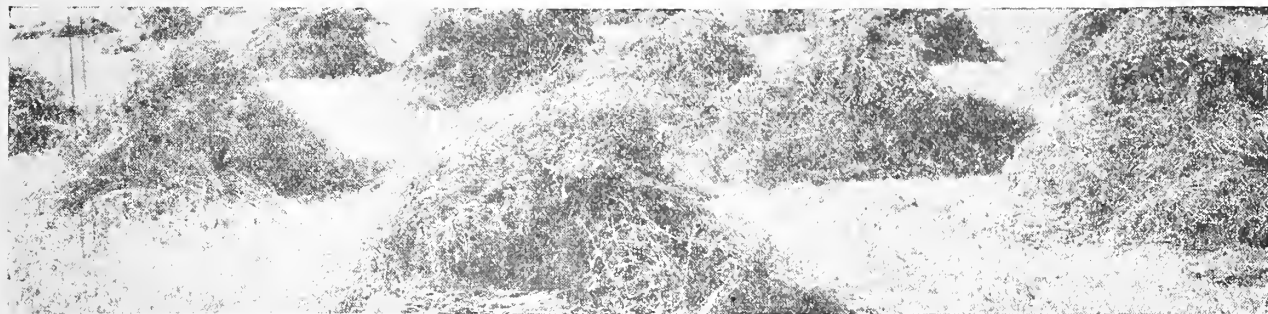

"Am well pleased with Hybrid or "Mule Corn". Lots of stalks have 3 or 4 shoots on them."—Aldis Rawlings, Pittsboro, Ind.

Hybrid Looks Like Smooth Reid's

"The Mule Corn made around 25 bu. to the acre while the Yellow Dent and Silvermine in two other fields with the same treatment made practically nothing because of dry weather."—R. N. Shaw, Springdale, Ark.

"Enclosed are results on Hybrid Corn. I have an M. S. degree in plant breeding but this is a revelation to me. Why don't people pay the price and buy Hybrid corn — that would be "Farm Relief!"—J. A. Fahrchild, (County Agent) Perry Co., Mo.

BLACKFOOT — The Original and Genuine GRIMM Alfalfa

**Constantly
Improved
Since
1857**

Every Bag STATE SEALED and STATE CERTIFIED

The Idaho Grimm Alfalfa Seed Growers Association is a group of farmers out there organized to give all of us a square deal on Grimm. Every one of their fields is State Inspected. Every bag of "Blackfoot" Grimm is Sealed and every bag carries an Official Certification by the State of Idaho. The association has stuck together and fought for certified purity and when you get "Blackfoot" Grimm you get Pedigreed Grimm—Registered and Certified and then Sealed for absolute protection.

Don't Be Fooled by "Bootleg" Grimm

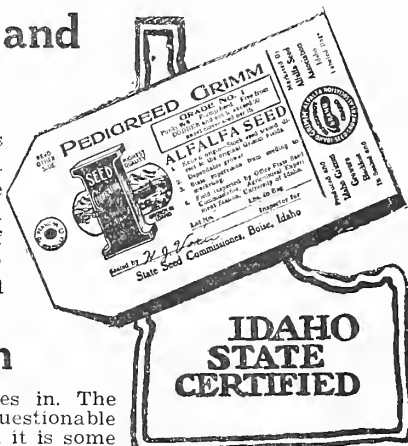

And now that this Association of honest, sincere growers have put Grimm on the map a lot of imitators or counterfeiters have bobbed up all around to do all they can to capitalize on the word "Grimm". There is "affidavit" Grimm and Private Label Grimm and Grimm this and Grimm that. We call them "Bootleg" Grimm because they are going under false colors.

According to reports from right out in Idaho most of the low end seed and doubtful seed from uninspected and unqualified fields and unknown sources goes out of the state as some kind of "bootleg" Grimm, whether it is genuine Grimm or not. State Inspection throws some of them out and the protective rules of the Association are too strict for others. They keep on raising Alfalfa Seed, alright and they sell it to some one and that's where the

**Write for Our Latest Price List on Field Seeds.
Lowest, Money Saving Prices We Ever Quoted!**

I have always been a crank on quality seed and I get especially cranky at the way the word "Grimm" has been kicked around the last few years. But there is one way to get real, genuine Grimm Alfalfa Seed. Get "Blackfoot" Grimm and you don't have to worry. That Blackfoot brand on the bag means everything in Grimm Alfalfa Seed. It is the last word in pure, pedigreed Grimm Alfalfa. You stick to it if you don't want to be fooled. And I mean it, too, whether you get it of us or from some one else.

"bootlegging" comes in. The next time such questionable seed is heard from it is some special kind of Grimm.

Well, I hate a deal like that. I don't believe any of you want to buy something, pay for it and then not get it. I don't like underhanded substitution no matter how nice a name it has. When you pay for Grimm you ought to get Grimm — not half-Grimm or part-Grimm or fake-Grimm. That's why I have taken this whole page to tell you to stick to the original, genuine, State Certified and Sealed Blackfoot Grimm. It is high in Purity and high in Germination. It's the hardest of all Alfalfas. And in the long run it is the lowest in cost because you are surer of a stand that will stick. You know it only takes a load or two more hay to make the good seed a good investment and it only takes a few killed out spots to make cheap seed look mighty expensive.

Also, you don't want to let yourself get fooled on the so-called private label or Affidavit Grimm bearing the United States Verification Tag. All in the world that a United States Verification Tag does is to give you the place of origin of the seed. It hasn't got a single thing to do with guaranteeing the variety or anything else except place of origin. Remember, even screenings can be put out in a bag bearing the U. S. Verification Tag. Some seedsmen make a big fuss over that Tag, but now you know just as much about it as anyone does. It means place of origin and that's all.

My advice is to stick to the "Blackfoot" certified brand. We would like to have your order and believe we can save you money on it. Blackfoot Grimm makes good fast friends and we like to sell it. But whether you order from us or the other fellow don't be fooled by "bootleg" Grimm no matter how fancy they name it.

Rotation of Crops
pays the most
Profits.

Dakota No. 12 is the Pick of all Common Alfalfa

This is the best of all the common varieties of Alfalfa. We believe in it and for years have recommended it to our friends. Dakota No. 12 is grown under mighty severe weather conditions both winter and summer. Winters up there are so severe that only the real hardy alfalfa comes through to maturity and produces seed. Summers are very apt to be hot and dry and so Dakota No. 12 gets conditioning in that direction, too. Dakota No. 12 is super-hardy. If you have been discouraged before because of freeze-outs or thin stands put in this Dakota No. 12.

It's a big producer, too. Gives you a heavy crop of fine quality hay or pasture. It resists disease and wilt and year after year it has proven hardy enough for the midwest.

Our Dakota No. 12 is pure and high germinating, the pick of Dakota production. And our fair price will bring you the selected quality seed.

I am going to repeat here again the plain fact about price. Yes, you can get cheaper seed. Get it lots of places. There's always more poor, second grade seed than there is of the finest quality and somebody has to sell it. But we don't want the job.

You will be better off — in the stand you get, in the yield and in the hardiness — to pay for good, honest seed. You can't go wrong on our Dakota No. 12. It will come through, stay by you and prove one of the best investments you can make.

Montana Common

This alfalfa is grown under the severe conditions of Montana and is a favorite with our customers. Has proven one of the very hardest kinds and is hardy enough for the Cornbelt. Montana Common is a heavy producer of fine hay and pasture. Our stocks of this seed are finest it is possible to get and our price makes such fine seed an attractive value.

Kansas-Nebraska

Here is the old stand-by in the Mid-west and one that is hardy for a section no farther north than Shenandoah. It is appreciated for the big crop of hay or pasture it produces. Good quality of hay, too. While our price is low it will bring you the very best of the Kansas-Nebraska alfalfa seed.

Utah Common

For Southern Iowa and farther south Utah Common has always been hardy enough and has produced good heavy crops. Utah is a great alfalfa state and we offer you the best with our Utah Common. Priced right to prove a good buy if you are in Southern Iowa or further south.

Red Clover Our Old Standby

You all know as well as we do that Iowa or Homegrown Red Clover is hardest of all. Known all over the United States for its extreme winter hardiness and high purity and germination.

Red Clover just cannot be beat as one of the finest all around legume crops for hay, pasture and soil improvement. Lots of folks have been trying to use substitutes for it but they usually go back to the old standby — Medium or Common Red Clover. If you keep Red Clover in your rotation you never need to worry about keeping up the fertility of your farm. Every bit of our seed is new crop, extra hardy, shows high purity and germination tests, home-grown, of good color, big berried and free of

noxious weeds such as buckhorn and dodder. We believe that the best Red Clover Seed is by far the cheapest you can buy.

Mammoth Red Clover

Mammoth or Sapling Clover looks very much like Common or Red Clover. About the only difference is that it is later and grows taller and heavier.

Alsike Clover

This clover has more uses than any of the other clovers because it will make a good growth on practically any soil. Alsike shines on thin upland or gravelly soils as well as being adapted to low, wet or overflow land.

Write for our Latest Price List on Field Seeds. Lowest, Money Saving Prices We Ever Quoted!

SWEET CLOVER -- Nature's Own Soil Builder.

SWEET CLOVER is the finest of all as a soil improvement crop. Not only that, but if conditions are at all favorable, it will grow anywhere. It is one of the most valuable crops to the Mid-West farmer. Restores the Nitrogen to the soil quicker than any other legume.

When you plow under a good stand of White Sweet Clover it is equal to putting on 20 tons of barnyard manure per acre. Not only that, but sweet clover makes a dandy pasture for dairy and beef cattle, sheep, horses, hogs and chickens. Will carry more stock per acre than any other legume. The big white sweet clover is the most used of all the sweet clovers and has been found to be the best all around variety. Fine for both hay and pasture and by far the best for soil improvement.

When cured properly, this sweet clover is practically equal to alfalfa for feeding value as hay. Best of all though, is that it fits right into your crop rotation without waste of time and is our best soil building legume.

A splendid mixture is to use 10 pounds each of White Sweet Clover and Brome grass per acre. We like to sow sweet clover in the spring with the small grain, then take off the cash crop, pasture down the growth in the stubble, let it grow the next spring and plow under just ahead of corn planting time. You will raise more corn on that field than you ever did in your life. We have had reports where the yield of corn has exactly doubled just by turning under one crop of white sweet clover.

Yellow Blossom Sweet Clover

The Yellow Sweet Clover has been found to be equal to white blossom for the crop rotation and pasture. A lot of people like it best for pasture because it makes a lower growth and a finer-stemmed plant for pasture. Not so coarse. Because of the way it grows it will not produce as much tonnage per acre. Especially good in mixtures. A very good clover that is being used more and more every year. A biennial.

Grundy County White Sweet Clover

The Grundy County or Dwarf White Sweet Clover is also a biennial or two-year clover. It grows more like the yellow blossom, but shorter and finer-stemmed than the big white sweet. Many prefer it on this account for hay or pasture. It is earlier and more leafy. Seed ripens ahead of frost. Easy to handle. Branches freely. Yields lots of seed — more as a rule than the other varieties.

HUBAM

Hubam is an Annual White Blossom Sweet Clover. A valuable clover which Prof. H. D. Hughes of the Iowa Experiment Station originated several years ago. The Hubam is equal in all ways to the regular White Sweet Clover. Many feel that it is superior because it makes its full growth the first year and makes the same results as the biennial in one season.

One of its greatest uses is for "bee pasture". Is a quick producing, high quality honey plant which has a honey flow of around 40 to 45 days duration if conditions are normal.

WHITE DUTCH CLOVER

This is the little White Clover used in lawns and pasture mixtures. Grows on most any soil about the same as Alsike. Good to be used in any pasture or lawn grass mixture.

SUDAN GRASS

Greatest of All Emergency Hay and Pasture Crops

There just isn't any question but that Sudan Grass is the greatest of all annual pasture and hay crops. It is greatly relished by all kinds of livestock for either pasture or hay. The per acre seeding cost is very small and it takes very little care or work. Prepare the ground just the same as for corn, then either broadcast or drill in 20 to 30 pounds of seed per acre. Be sure and do not sow the seed until the ground is well warmed up or say ten days to two weeks after corn planting time. It is a warm weather crop. Cover not over one inch deep and one-half inch is better. Start pasturing it just as soon as it is four to six inches high and it will carry 5000 pounds of live weight all summer long. That is when most of your other pastures are brown and dried up. Fine to be used as an emergency pasture or as a pasture every year.

It is pretty hard to beat as a hay crop. Much better than the other forage crops like Millet, Cane, etc. Does not sour. Matures a lot easier and quicker. Is a tender, palatable and succulent winter feed for cattle, horses and sheep. Fine stemmed.

It is one of the surest crops to catch. Good on any well drained soil. Stands a world of hot and dry weather. In fact it likes it. Hardly ever a crop failure. We believe you should always have a patch of Sudan. You'll say that it is the greatest pasture and hay crop you ever had.

Sudan and Soy beans make a real combination for hay. Use 30 pounds of beans and 10 pounds of Sudan per acre. Put in the Soy beans first and then in about ten days drill in 10 pounds of Sudan. Will produce a heavy tonnage of hay that carries a high feeding value.

Canadian Field Peas

This is a crop that a lot of you don't know about, but every one of you should use. They are grown quite extensively in the North and Northwest as a regular field crop and for hay and pasture here. You can't beat them for a real early hay either alone at the rate of two bushels or with Oats using a bushel of each per acre. Put them in early in the spring and they will make earlier hay than anything else. They have long fine stemmed vines and pods like common peas only more of them. Are a legume and make lots of hay high in feeding value. This is a year when you need lots of hay to make up for the meadows killed by the drought. By putting in Oats and Peas early you can take them off for hay and follow with Sudan or Soy beans for another good crop. A few acres will make a world of dandy hay. Oats, Canadian Field Peas and Rape make a fine combination for early hog and cattle pasture, too.

Buckwheat

There is more buckwheat grown in the Midwest every year. It makes an especially good catch crop as it fully matures in from 70-75 days. Grows on practically any soil. A good cash grain crop for the poorer soils where other grains do not yield satisfactorily. Used a lot for bee pasture. We prefer the Japanese and Silverhull varieties and can furnish both. Use $\frac{1}{2}$ to 1 bushel per acre.

SOY BEANS

A Real Annual Legume

Soy Beans are already one of our leading legume crops. Just to show you what growers think of them, the acreage is doubling practically every year. Put some out this season.

This crop has more uses than any other legume. The seed or grain is full of vitamins and is rich in proteins which makes a real honest-to-goodness home-grown supplement feed. When cured properly the hay is almost equal to Alfalfa. Use Soy beans for hay. Pasture them. Make them into silage. And use them for soil builders.

Soy beans are fed with profit to any age dairy and beef cattle, hogs and sheep as well as poultry. They are not only profitable but the stock likes them, too. They are one legume that will always work into a rotation. Any corn ground will grow them. Make their full growth and mature in one season and are easy to handle.

It will pay you well and be a lot easier on your land if you put out a part of your small grain acreage into Soy beans. They will grow on poor or acid soils where other legumes will not. They can't be beat as a catch crop. Remember, that Soybeans can be profitably grown to hog or sheep down, for hay, soil improvement, both for feed and cash crop, silage and pasture. They are the best legume for all purposes. So — why not use them. We'll be glad to help you all we can. Send for our Free leaflet on handling them.

MANCHU

This bean is especially adapted to the Cornbelt. It is a yellow seeded variety and is easily told by its black scar. Medium maturing. One of the best all around varieties for the Midwest. Very good for hogging down, silage, hay and seed. This variety is one of the best for any section except the extreme Northern part of the Cornbelt.

Pekin

The Pekin is quite a bit smaller seeded than other varieties being from one-half to two-thirds as large as most others. It is a

Dwarf Essex Rape

"Salad for the Pigs"

Every farmer who raises hogs should have a patch of rape for summer pasture. It is really unbelievable the rapid gains you will get from it. The Iowa State College found in tests that they could put a hundred pound gain on a hog cheaper and quicker with Rape pasture than by using Alfalfa pasture. This is sure saying a lot for the feeding value of Rape as Alfalfa is supposed to be the greatest of all hog pastures.

Rape is easily seeded requiring only 6 to 8 pounds per acre. Seed is very cheap in price. Can be sown alone or in combination with corn for hogging down. Balances the corn ration. Or use with Oats or Oats and Canadian Field Peas.

Sow anytime in the spring or make two or three seedings and alternate the patches for an all-season pasture. Always grows.

Best All Around Legume for Anywhere

black bean. Pekins are especially good for hay, making a good quality, fine stemmed hay. Are used a great deal for silage with corn as well as a seed crop. Are erect and stand up well. Medium late in maturing.

Virginia

This is the best Soybean for poor soils. Especially good on soils such as found in Southern Iowa. Considered the best of all for hay. Is tall growing and fine stemmed. Also fine for silage or seed. Virginias are brown seeded and medium late maturing.

Velvet Barley

The Velvet Barley is by far the best variety on the market today. A six-rowed type. This barley will outyield and produce better quality grain than any other including the bearded and beardless varieties. The beauty of it is that it is smooth awned like oats. No barbs on the beards, to get in your clothes and make life miserable while handling it.

Oderbrucker Barley

This is one of the old standbys and the best yet next to Velvet. Six-rowed, yields more than common varieties, stands up and yields well. Use $1\frac{1}{2}$ to 2 bushels of barley per acre put in at Oat seeding time or a little later. Barley makes a fine feed crop.

Iowa No. 103 Oats

Iowa No. 103 Oats are stiff strawed, stand up well, are medium maturing and yield well. White. A very good variety to use for a nurse crop. This is the only kind we handle.

Marquis Spring Wheat

Here is an outstanding spring Wheat. The only variety to use as it will outyield all others and be of better quality. Stiff strawed and stands up well. And the beauty of it is that it is beardless.

We Like Permanent Mixtures

We believe in mixtures. When using a good mixture you are sure to get a good catch and to have a good permanent pasture or hay crop that lasts from early spring until late fall. They have a higher feeding value than single crops. A single crop may fail but a mixture of a number of good crops is sure to make a good stand on most any kind of soil. Use more mixtures. Ours are all made up of our regular best stocks.

Permanent Pasture and Meadow Mixtures

We have made these mixtures from a number of the best legumes and grasses. Made up especially to produce high yielding and high quality hay or pasture. Not only that, but a mixture of this kind is sure to catch for a good stand on most any soil. Good for any live-stock. Use 20-25 pounds per acre.

Lowland Pasture Mixture

This mixture is permanent and similar to our Permanent Pasture Mixture. But it is made to be a successful crop on low, overflow or wet ground. Also good for fields where it is hard to get a stand of other grasses.

Quick Action Pasture Mixture

This is an annual mixture. Not permanent. It is made for quick results and is a heavy producer of good quality pasture. Lots of early fresh green feed for cattle, hogs and young stuff.

Brome Grass

This is a fine Western Grass but is used very extensively all through the Cornbelt. Has a long season as it is green in real early spring and is last to get brown in the fall. Stands a world of trampling and is very resistant to hot and dry as well as cold severe winter weather. Also, great to stop soil washing along ditches, dikes or in washy fields. Good addition to any permanent pasture mixture. A dandy mixture is 10-15 pounds each Sweet Clover and Brome Grass per acre. Use 20-30 pounds Brome Grass when sown alone.

Orchard Grass

Orchard Grass grows on most any soil type. Permanent. Has a long growing season and furnishes pasture from early spring until late fall. Orchard Grass is one of the best to grow in shady places such as orchards, groves and timber pastures.

Other Field Seeds

These are only a few of the many farm seeds we carry. We also carry the finest stocks of White Dutch Clover, English Blue Grass, Bermuda Grass, Fescues, Creeping Bent Grass, Lawn Grass Mixture, and other Grasses and mixtures. Sunflower Seed, Winter Vetch, Winter Wheat, Rye, Sheep-o Fertilizer and other grades of Red Clover, Sweet Clover and Alfalfa.

Write for Field Seed Price List.

Solid Red Top

Red Top is undoubtedly the best of all grasses for bottom ground where other grasses do not thrive. Does very well on low or over-flow soils and wet ground. Also does well on thin up-land soils. In fact, there is hardly any soil on which it will not grow well. Used a lot in any permanent pasture mixture. Mixtures can be made up by using Red Top, Blue Grass, Orchard Grass, Timothy and Alsike.

Kentucky and Canada Blue Grass

Kentucky Blue Grass is considered to be the best natural grass in the Middle-west. It can be sown either in early spring or fall. Needs plenty of cool, moist weather at first to become well established. Produces nice heavy, thick growth which all livestock likes.

The Canadian Bluegrass looks very much like Kentucky Bluegrass except that it grows closer to the ground and not so tall. Especially good to sow on poor, gravelly or the thinner types of soil.

Either of these Bluegrasses can be used very well alone and are fine to use in any permanent pasture mixture.

Seed Inoculation

You should always inoculate all the legume seed that you sow. Inoculation is really a cheap crop assurance. Gives the plant the power to take the nitrogen from the air, not only for its own use but to store up in the soil. That is why clover, alfalfa, soybeans, etc. make the soil so much richer for the other crops that follow. By far the easiest, cheapest and fastest way of enriching and building up your land.

Costs only a few cents per acre and will make a return of many dollars.

New Postpaid Prices

Inoculation for Clover or Alfalfa

1/2 bu. size will inoculate	30 lbs. seed	\$.50
1 bu. size will inoculate	60 lbs. seed	1.00

GARDEN PACKET - Peas, Beans, Lima Beans, Sweet Peas20

Cane

Syrup or Sorghum Cane:—There are two main varieties which most people use for sorghum making. The Wisconsin Amber is an early cane which makes a very sweet, light colored syrup. Short Orange is a fairly early variety which grows shorter and stalker. It produces a heavy light colored syrup. Everyone likes sorghum and a small patch makes a lot. It is very easy to grow.

Fodder Cane:—When grown for fodder, cane should be sown at the rate of 50 to 100 pounds per acre. Fodder Cane makes a huge yield of good fodder and forage for winter feeding. Also good for summer hog feed. Grows most any place. Very good for the West.

Milo Maize and Kaffir Corn

These two crops are really the best known of the grain sorghums. Grow well anywhere and on any well drained soil. Mighty fine quality and lots of fodder for winter feeding mules, horses and cattle. The grain makes very good hog and poultry feed. Milo requires the least moisture although both will make a heavy crop under hot and dry climatic conditions.

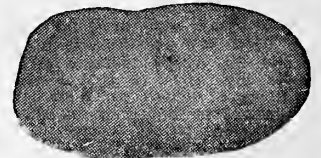

Feterita

Another of the grain sorghums. Beats most hot dry weather as it ripens 15 to 20 days earlier than Milo or Kaffir. Is the best of all for poultry feed on account of its large, white, soft berry which does not require grinding.

Golden Millet

Millet is one of the heaviest producing fodder crops. Golden or German is the best all around Millet. Produces lots of fine stemmed good quality forage on most any soil - good or poor. You can sow it as late as July in this section and get a good catch crop for hay. Use 3/4 to 1 bushel per acre.

Northern Seed Potatoes

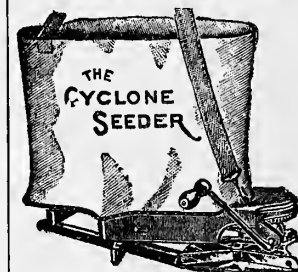

Of course it is too early yet to quote prices on Seed Potatoes. You can be sure, though, that we can save you money on the very best of Northern Grown Irish Cobblers and Early Ohio's. These two varieties are both high yielders and fine quality. Get our prices before you buy your planting stock.

SHEEP-O Fertilizer

Sheep-o is an organic fertilizer. Specially treated and prepared. Well balanced plant food readily available and lots of it. Fine for lawns, gardens, shrubbery, etc. \$2.25 per cwt., F.O.B. Shenandoah.

CYCLONE SEEDER

Only
\$2.25

Post-
paid

Here is a dandy. Big and roomy. Works evenly and sows the seed in a steady flow. Accommodates any kind of seed to be sown at any thickness. Fully guaranteed to be satisfactory or your money back.

Nursery Department

Here is my son Frank, with a nice specimen of Spirea Van Houttei. I think most all of you know him. He has been head of the Nursery Department for several years, and sees that you get the best of Nursery Stock. He has always spent a good share of his time right out in the Nursery fields, looking after the things we grow for you.

Frank has described about everything on the following pages, which does well in this country. Of course, you can't plant everything in one, or even two years, but you can make a very nice addition each planting season. Everybody is planting more nowadays than they used to. To keep up with this demand, Frank has listed on the following pages the better and most popular shrubs and plants.

Frank's Nursery talks can be heard every week day from KFNF. If you have any particular planting or growing problems, he will be glad to have you write. **Henry Field.**

Just a Word About Our Shrubs

The shrubs that we offer are all two year old, field grown plants, which stood from eighteen to twenty-four inches high in the Nursery row at digging time. They are well rooted and vigorous, and just the right size to plant for best results. Before shipping them, we trim them back just as they should be for successful planting, which is about six inches from the ground. Plant them two or three inches deeper than they stood in the Nursery row, and mound up dirt about a foot high over the plants. This dirt should be left on for about two weeks, to allow the buds for the new growth a chance to get started. As soon as the new buds start, rake the surplus dirt down level with the ground. After that, all that is necessary is to see that the shrub has plenty of water during the hot, dry weather. **Frank Field.**

Spirea Van Houttei

is about six inches from the ground. Plant them two or three inches deeper than they stood in the Nursery row, and mound up dirt about a foot high over the plants. This dirt should be left on for about two weeks, to allow the buds for the new growth a chance to get started. As soon as the new buds start, rake the surplus dirt down level with the ground. After that, all that is necessary is to see that the shrub has plenty of water during the hot, dry weather.

**HARDY
ORNAMENTAL
SHRUBS**

ALTHEA (Rose of Sharon). Large showy flowers somewhat like double Hollyhocks only a little smaller. Needs protection through the winter, anywhere North of here. Pink, purple, or white.

ALMOND, PINK FLOWERING. Small double pink flowers very early in the Spring before the leaves appear. 50c each; 4 for \$1.65.

ALMOND, WHITE FLOWERING. Same as the pink. 50c each; 4 for \$1.65.

BARBERRY, THUNBERGI (Japanese Barberry). Glossy green foliage changing to coppery red in the Fall, covered with scarlet berries. The stems are covered with short, sharp thorns.

BARBERRY, RED LEAFED. Habit of growth just like the Barberry Thunbergi, except that the leaves and twigs are red throughout the entire growing season. 70c each; 2 for \$1.25; 4 for \$2.25.

CALYCANTHUS. Old-fashioned sweet scented shrub. 75c each.

DESMODIUM, PENDULIFLORUM. Medium height shrub, covered with small purplish-red flowers in late summer. 75c each.

DEUTZIA, GRACILIS. A handsome Japanese shrub about two feet high. White flowers. 45c each; 2 for 85c; 4 for \$1.50.

DEUTZIA, CRENATA. Is medium high, growing about four or five feet high. White flowers.

DEUTZIA, PRIDE OF ROCHESTER. is the tall one, growing higher than one's head. White flowers.

DOGWOOD, RED BARKED. Grows five or six feet high. Valued especially for the bright red color of its branches through the winter long after the leaves fall.

DOGWOOD, YELLOW BARKED. The same as the red in every way, except for the color of the bark, which is yellow.

FORSYTHIA (Golden Bell). Golden yellow, bell-shaped flowers before the leaves appear.

FLOWERING QUINCE (Japanese Quince). Medium height shrub with dark green leaves shading to dark red. Flowers are bright red and borne in great profusion early in the Spring.

ELDER, CUT-LEAF. Similar to common Elderberry, except the leaves are finely cut, like Ferns.

ELDER, GOLDEN. Like the common Elder except that the foliage is golden yellow all season long.

HIGH BUSH CRANBERRY. Similar to Snowball, but the bloom is flat in shape, followed by clusters of berries about the size and color of Cranberries. 60c each; 4 for \$1.75.

HONEYSUCKLE, MORROWI. Like the old-fashioned bush Honeysuckle, except that it is very much more spreading in habit of growth. Flowers are pink.

Jennie, Frank's Wife

HONEYSUCKLE, TARTARIAN. The old-fashioned bush honeysuckle, blooming in May followed by red berries, which hang on the rest of the summer. 35c each; 4 for \$1.25.

HYDRANGEA, ARBORESCENS (Hills of Snow). Medium height bush covered with pure white flowers, just like Snowballs only four times as large. Should be planted in shade or partial shade. 50c each; 4 for \$1.65.

HYDRANGEA, P. G. A good deal like the Arborescens, except that it blooms in August and the flowers instead of being round are in the shape of an immense cone, sometimes over a foot long. 50c each; 4 for \$1.65.

HYDRANGEA, P. G. TREE FORM. Same as the regular P. G., except that it has been trained to a single stem so as to grow in tree form. \$1.50 each.

KERRIA, JAPONICA. An attractive shrub of medium height with small double yellow flowers in mid-summer. 75c each.

LILAC, COMMON PURPLE. Makes dandy hedges along boundary lines. Usually starts blooming when five or six years old.

LILAC, COMMON WHITE. Same as the Common Purple, except that the flowers are pure white. 60c each; 4 for \$1.75.

LILAC, PERSIAN PURPLE. Not so tall as the Common Lilacs and the leaves are smaller. Usually starts blooming when three years old. 50c each; 4 for \$1.65.

LILAC, CHAS. X. A French Lilac having large heads of single dark reddish purple flowers. \$1.00 each; 4 for \$3.25.

LILAC, MADAM LEMOINE. Another French Lilac with pure white double flowers. \$1.00 each; 2 for \$1.75.

LILAC, PRESIDENT GREVY. Very similar to the above variety except that the flowers are light blue in color. \$1.00 each; 2 for \$1.75.

PRIVET, AMOOR RIVER is probably the most popular of all the Privet family, as it is entirely hardy anywhere in the United States. Like all the other members of the Privet family, it can stand any amount of pruning and trimming and Privet hedge can be kept at any desired height from six inches up to six feet. 35c each; 4 for \$1.25; 12 for \$3.25. (For larger quantities look under "Hedging".) Page 48.

PRIVET, CALIFORNIA. This variety has leaves much more glossy than the Amoor River and is a little more rapid growing. It is wonderful for hedging anywhere south of Kansas City, but we do not advise its use in this latitude, as it is not hardy here.

IBOTA PRIVET. Resembles the Amoor River very closely, except that it is much more dense and spreading in its habit of growth.

REGEL'S PRIVET. This is a new introduction which is gaining in popularity every season on account of its very spreading habit of growth. It is usually grown as an untrimmed hedge on that account. Very attractive.

PRUNUS, NEWPORT. Purple leaved Plum. Hardy and of upright growth. Foliage is a beautiful reddish-purple with red tips. Somewhat larger than the Triloba or Pissardi. 60c each, 2 for \$1.00.

PRUNUS, PISSARDI. Dwarf Plum Tree or Plum Bush with reddish purple foliage the entire season. 60c each; 2 for \$1.10.

PRUNUS, TRILOBA. Another Dwarf Plum Tree planted quite extensively for its beautiful double pink flowers. 60c each; 2 for \$1.10.

Unless otherwise specified, all shrubs are priced as follows: 35c each; 4 for \$1.25; 12 for \$3.25; postpaid, either alike or assorted.

HENRY FIELD CO.

35

Hardy Ornamental Shrubs (Continued)

PURPLE FRINGE (*Rhus Cotinus*). Smoke tree. Mist like, purple flowers, round light green leaves. \$1.25 each.

RHODOTYPOS KER-RIOIDES (Jetbead). Medium height, bright green foliage. Single white flowers in May followed by jet black shiny seeds. 50c each.

SNOWBALL. Old-fashioned favorite, known to everyone, which needs no description. 60c each; 2 for \$1.00.

SNOWBERRY. Very hardy, low growing shrub covered throughout the Fall and Winter with large, waxy white berries.

SPIREA ANTHONY WATERER. Very compact, low growing shrub covered with dark, crimson pink flower clusters all summer long. 45c each; 4 for \$1.65.

SPIREA, COLLOSA ALBA. Same as Anthony Waterer in every respect, except that the flowers are pure white instead of dark red. 45c each; 4 for \$1.65.

SPIREA, OPULIFOLIA. Grows five or six feet high and bears large clusters of white flowers in early summer, which are followed by attractive looking dark red seed pods.

SPIREA, PRUNIFOLIA. Medium height shrub whose double flowers are strung one in a place along the entire length of every branch and twig early in the season. This is the true Bridal Wreath.

SPIREA, THUNBERGII. Most beautiful of all the Spireas as the foliage is quite finely cut and blooms very early. Small white flowers.

SPIREA, VAN HOUTTEI. Incorrectly called Bridal Wreath by most people. This is the most common of the Spireas and is probably the most showy, as it is a perfect fountain of white early in the Spring, blooming here well before Decoration Day. It gets to be five or six feet in height, and is equally valuable for hedging, foundation planting, or as specimen planting. 5 for \$1.00; 12 for \$2.00.

SUMAC, CUT LEAFED STAGHORN. This is a close relative to the Sumac which grows wild along the road, except that the leaves are fern-like and stems are fuzzy like a deer's horn.

SPIREA, BILLARDI. Grows four to five feet high. Blooms in July and August with cone shaped clusters of pink flowers.

SYRINGA, CORONARIUS (Mock Orange). Beautiful, hardy, well known shrub with flowers resembling orange blossoms. Grows eight to ten feet tall.

SYRINGA, LEMOINEI. Low growing variety, growing about waist high with flowers quite large and semi-double. Leaves are much smaller than on the other varieties. 40c each; 4 for \$1.35.

SYRINGA, VIRGINALIS. An improved Mock Orange, practically everblooming. Flowers are extremely fragrant. 60c each; 2 for \$1.00; 4 for \$1.75.

TAMARIX, AMURENSIS. An extremely hardy shrub with feathery plume-like foliage. Flowers are pink.

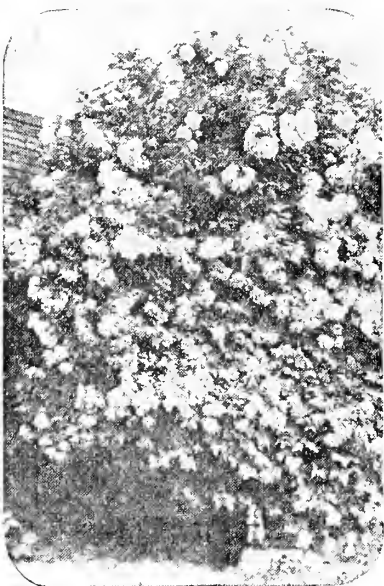

TAMARIX, INDICA. Practically the same as the above except for the color of the foliage, which is dark green where the Amurensis is a light green.

WEIGELA, CANDIDA. Very popular shrub belonging to the Honey-suckle family, covered with a profusion of pure white tubular flowers in May or June. 45c each; 4 for \$1.65.

WEIGELA, EVA RATHKE. Closely resembles the above variety, except that the flowers are a dark red. It is more dwarf in habit of growth. 45c each.

WEIGELA, ROSEA. This is the hardiest of all Weigelas and is very free blooming with rose colored flowers.

WEIGELA, VARIEGATA. Very similar to the other varieties, except for the foliage, which is a handsome combination of white and green stripes.

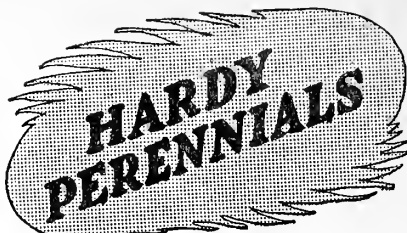

Snowball

Weigela, Rosea

Spirea, Thunbergii

ACHILLEA, MILLE-FOLIUM ROSEA. Pink flowers. Leaves like Yarrow, but the blooms resemble Anthony Waterer Spirea. 18 inches. Sun. July-August.

ACHILLEA, PERRY'S WHITE. Clusters of pure white double blossoms. Multiplies rapidly. 10 inches. Sun. July-August.

AGROSTEMMA CORONARIA (Rose Camellion or Mullein Pink). Sturdy, erect growing plant with silvery foliage. Very showy, rosy crimson flowers in June and July.

ALYSSUM, SAXATILE. A rock garden plant with yellow flowers and leathery gray foliage.

ANCHUSA. Tall plant with coarse foliage, but masses of blue flowers. Blooms early.

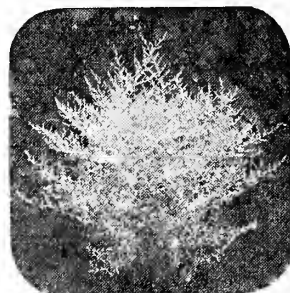

ANTHEMIS. The so-called yellow Shasta Daisy. Bloom is much like it aside from the color, which is a golden yellow. 18 inches in height. Full sun.

ARABIS, ALPINA (Rock Cress). Pure white flowers, produced in dense masses, splendid for border and rock-bed work. Low growing. Full sun.

ARMERIA (Sea Pink). Attractive dwarf plants forming tufts of bright green foliage. 12 inches in height. Full sun.

ARTEMISIA, SILVER KING. A variety of Artemisia, much prized for winter bouquets, as the entire plant is silver color, and dries that same color. Grows 2 to 3 feet high.

ASTERS, HARDY. Dwarf form and dainty pink and lavender blooms make it very suitable for a place in the hardy border. 2 feet high. Part shade.

Artemisia, Silver King

BAPTISIA AUSTRALIS (False Indigo). Dark blue, sweet pea shaped flowers in June. Leaves resemble sweet clover. 2 feet high.

BLACKBERRY LILY. Resembles Iris but flowers look more like Lilies. Red background very thickly spotted with yellow and black. Late in the season a fruit forms where each Lily was, which looks just like a Blackberry.

BLEEDING HEART, FERN-LEAF (*Dicentra Formosa*). Fine cut foliage like a fern, which is carried all Summer along with small, heart shaped pink blossoms. Fine for rock gardens. Sun or semi-shade. 12 inches. May to frost.

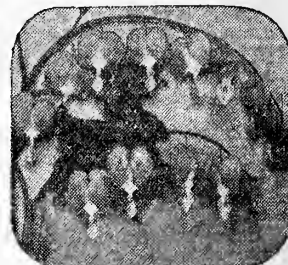

BLEEDING HEART, OLD FASHIONED (*Dicentra Spectabilis*). Especially useful for shady spots. Foliage dies out in the summer; plants come up again the next Spring. 18 inches. Sun or shade. May-June. 50c each; 3 for \$1.25.

BOLTONIA. Free flowering small white Daisy on stems from 4 to 5 feet high in September. Use in the background. In white or lavender. Specify which color you wish.

BUTTERFLY BUSH (*Buddleia Magnifica*). Gorgeous lavender spikes, sometimes called Summer Lilac. The woody stems die back each winter and sprout up from the roots in the Spring. 3 to 4 feet. August to frost.

CAMPANULA, CARPATICA (Harebell). Dwarf variety with light blue, well-shaped flowers. A favorite rock garden plant. 8 inches. Sun or semi-shade. June-July.

CAMPANULA (Canterbury Bells). Sometimes called "Cup and Saucer Flowers". Handsome blue, white and pink, cup-shaped blossoms in June or July. Sun or semi-shade. 24 inches high.

Bleeding Heart, Old Fashioned

Unless otherwise specified, all hardy perennials priced as follows: 25c each; 5 for \$1.00; or 12 for \$2.00, postpaid, either all alike or assorted.

A Hedge for Every Home
See Page 48.

Hardy Perennials (Continued)

CANDYTUFT, HARDY (*Iberis Sempervirens*). Hardy form of old-fashioned Candytuft, growing 8 to 10 inches in height with dense heads of bright flowers early in the Spring. Full sun or part shade.

CARNATION, HARDY. Hardy garden form of the Carnation family. 12 inches in height. Full sun. June to frost.

CERASTIUM TOMENTOSUM (Snow In Summer). A low growing plant for the rock garden, having silvery white foliage, covered with small snow-white flowers.

CHRYSANTHEMUM, OLD-FASHIONED HARDY. We have old-fashioned hardy Chrysanthemums in two colors, red and white. They want full sun. Grow about 3 feet high, and usually bloom in the latter part of October.

CHRYSANTHEMUM, EARLY BLOOMING.

This is the improved form, which blooms along in August and September. Not very hardy and needs a lot of protection through the winter. Grows about two feet high. Full sun. We can furnish them in pink or yellow.

COLUMBINE. The Short Spurred are mostly in blue or pink. The Long Spurred comes in all the pastel colors of blue, pink, yellow, cream, and white. Semi-shade or open sun. 2 to 3 feet in height. May and June. Be sure and specify whether you want Long or Short Spurred.

COREOPSIS LANCEOLATA. One of the standbys for hot, dry exposures. Like a yellow daisy, but the petals are broader and notched at the edges. 18 inches. Sun. May to frost.

DAISY, IMPROVED EARLY SHASTA.

Very much better than the old Shasta, in every way. This one is absolutely hardy, blooms here before Decoration Day. Large flowers and long spikes.

DELPHINIUM, BELLADONNA. A marvelous shade of light blue. 3 to 5 feet. Sun. June to frost.

DELPHINIUM, BELLAMOSUM. Same as the above except that flowers are very dark blue with white throat.

DELPHINIUM, ENGLISH HYBRIDS. Tall type, spikes 3 to 6 feet high; a well established plant will have five to six spikes. An extra choice strain, many of them double. June to frost.

DELPHINIUM, VANDERBILT HYBRIDS. An extremely choice strain of Delphinium, the result of years of careful breeding and selection. I honestly believe that this is the best strain in the United States. 75c each; 3 for \$2.00.

DIGITALIS (Foxglove). Tall spikes of tubular flowers. Grows 2 to 3 feet high. Prefers semi-shade. June-July.

ERYNGIUM (Sea Holly). Popular for Winter bouquets. Bright blue stems and burrs. 3 feet high. Sun. July and August.

EUPATORIUM (Hardy Ageratum). A charming blue flowered plant, blossoms late. 2 feet high. Sun or semi-shade.

FERN, HARDY MAIDEN HAIR. Has fine, wiry black stems with delicate, finely-cut green fronds from which it gets its name.

FERN, HARDY OSTRICH PLUME. Not house ferns, but big, hardy fellows that grow out-of-doors and live over the winter. They do best in full shade on north side of the house in loose, rich, moist ground. 2 to 3 feet high and is broad at base.

FUNKIA, SUBCORDATA GRANDIFLORA. Big oval shaped ribbed leaves and large, white, fragrant blossoms. Sometimes mistakenly called "Day Lily". 18 inches high. Shade. August and September. Each 50c; 2 for 90c.

FUNKIA, LANCEOLATA. Small, lance-shaped leaves, sprays of lavender bells in September and October. 18 inches. Shade or part shade.

GAILLARDIA (Blanket Flower). "Pin Cushion Plant". Flower something like a daisy; blending of red, yellow and henna. For hot, sunny locations. Blossoms all summer. 18 inches. Sun. May to frost.

Daisy, Improved Early Shasta

Hardy Ferns and Mertensias

GOLDEN GLOBE. New introduction by Sass Brothers, the famous plant breeders of Omaha, Nebraska. Very much superior to the old-fashioned Golden Glow as the flowers are a perfect globe shape. Just as round as golf balls.

GOLDEN GLOW. Grows 5 to 6 feet high; large, double, golden yellow flowers. Fine for background. Sun or semi-shade. July-September.

GYPSOPHILIA PANICULATA (Baby's Breath). Valuable for mist-like effects and for trimming bouquets. Pick as soon as opened and dry for winter bouquets. 3 feet. Open sun. June and July.

GYPSOPHILIA, DOUBLE (Double Baby's Breath). The flowers are just as double as little Roses. Each 60c; 2 for \$1.00.

HELIANTHEMUM (Rock Rose). A perfect rock garden plant, low growing, practically evergreen forming broad clumps, covered all summer with bloom.

HELIOPSIS

PITCHERIANA (Hardy Zinnia). Resembles golden yellow Zinnias except that they are only half double. Grow about 3 feet high and bloom practically all summer.

HIBISCUS. The new hardy variety called "Mallow Marvel". Blooms from 5 to 10 inches across, ranging in colors through red, white, and pink. 3 to 4 feet. Sun or semi-shade. July and August.

HOLLYHOCKS. Nothing else will quite take their place at the back of the lot or against the side of the garage. 5 to 7 feet. Sun. June to frost.

LINUM PERENNE (Hardy Blue Flax). Fine cut foliage, growing a little over a foot high with single blue flowers.

LOBELIA CARDINALIS (Cardinal Flower). Spikes of fiery red in late Summer. 3 feet. Sun or semi-shade.

LYCHNIS, CHALCEDONICA (Maltese Cross or Scarlet Lightning). The most vivid red imaginable. Blossoms some all summer. Very hardy. 2 to 3 feet. Sun or semi-shade. June to frost.

LYTHRUM SUPERBUM (Purple Loosestrife). Tall growing plant for the background with beautiful long sprays of purplish lavender flowers.

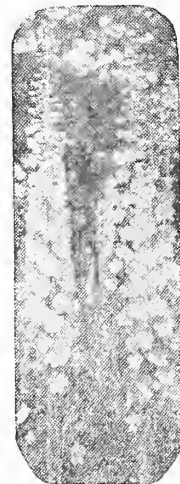

MERTENSIA (Blue Bells). Old-fashioned favorite. Drooping clusters of blue bells in April and early May. Prefers shade or semi-shade. 12 inches. April-May.

MONTANA CORN FLOWER (Hardy Centaurea). Flowers a good deal like the annual Corn Flowers or Bachelor Buttons, but much larger, double dark blue. Perfectly hardy.

MYOSOTIS (Forget-Me-Not). Will live through the winter with protection given to Pansies. Does best in damp location. Blossoms all summer. 10 inches. shade or semi-shade. May to frost.

ORNAMENTAL GRASS. We have two kinds to offer this year. Both old-fashioned varieties, popular and well known. **PHALARIA**

VARIEGATA or **OLD-FASHIONED STRIPED GRASS.** 15c each; 12 for \$1.00, postpaid. **EULALIA JAPONICA.** A tall growing variety sometimes called Hardy Pampas Grass on account of its beautiful feathery plumes, which appear just before frost. 25c each; 5 for \$1.00.

Hybrid Delphinium

PENSTEMON (Barbatus Torreyi). Sometimes called Beard Tongue. One of the most useful and showy flowers of the hardy perennials. Spikes of bright scarlet flowers, which bloom from June until August and often until the first of September. Very hardy.

PENSTEMON LARGE FLOWERED HYBRID. A low growing plant, closely resembling Snapdragons. Sometimes called Hardy Snapdragon. Shades of white, pink and red.

PINKS, DIADEM. Large, double variegated blooms. 12 inches. Sun. June to frost.

PINKS, DIANTHUS DELTOIDES (Maiden Pinks). Dwarf variety, covered with small, star-shaped, pink flowers in June and July. For the sunny rock garden. 6 inches.

PINKS, GRASS OR CLOVE. Very fragrant variety with gray, grass-like foliage and variegated blooms. 12 inches. Sun. June to frost.

PHYSOSTEGIA (False Dragon Head). Forms large clumps 3 to 4 feet high bearing long spikes of delicate pink and white flowers, tubular in form. Full sun. July and August.

PLATYCODON (Chinese Balloon Flower). Large, blue or white flowers from buds like small balloons. 2 to 3 feet. Sun or semi-shade. July to September.

Unless otherwise specified, all hardy perennials priced as follows: 25c each; 5 for \$1.00; or 12 for \$2.00, postpaid, either all alike or assorted.

Use more hardy shrubs for foundation plantings.

HENRY FIELD CO.

Hardy Perennials (Continued)

POPPY, ORIENTAL. Largest, showiest Poppies of all, making a large clump, which gets better every year. One such clump will often carry from 20 to 30 enormous blooms of dazzling scarlet. The best time to move them is during the month of August, when they are dormant, but for spring planting we have a good supply of plants growing in small pots, which can be set out with perfect safety. Each 25c; 5 for \$1.00.

Poppy, Oriental

RUDBECKIA, HIRTA. The hardy form of the biennial Black-eyed Susan. Flowers are dark orange with a purple cone in the center. Stems are about 2 feet high. Blooms all summer.

SEDUM, SPECTABILIS. Tall growing with pale pink blossoms in September and October. Hot, sunny location. 1 to 2 feet.

SEDUM, BRILLIANT. The same thing only a bright pink blossoms. 18 to 24 inches high. Sun or semi-shade. September.

SEDUM, TRAILING. Trailing variety with little waxy leaves. Most beautiful plant we have for filling in spaces in the rock garden. Multiplies rapidly. Sun or shade. August.

SEMPERVIVUM (Hen and chickens). Little green rosettes which resemble Cactus. Much used in the rock garden. 1 inch. Sun or shade.

STACHYS, LANATA (Woolly Woundwort). Charming gray plant for the rock garden. Its fuzzy leaves resemble rabbit ears. 12 inches in height. Sun. Blooms in July.

STATICE, LATIFOLIA (Sea Lavender). A rosette of broad, leathery, odd-looking leaves lying close to the ground. Blossoms are lavender colored, borne in masses like Baby's Breath, only much finer.

SUN DROPS. A dwarf form of the Primrose family, which sends up stalks about 12 inches high, covered with golden yellow flowers in June and July. It increases by means of creeping underground root stalks.

SWEET PEA, PERENNIAL. Hardy Sweet Pea, which lives over in the ground and comes up every year. Vine. Prefer sun. June to frost. Mixed colors only.

SWEET WILLIAM, EVERBLOOMING RED. A new variety, dark red in color, which blooms all summer, one foot high. 20c each; 6 for \$1.00.

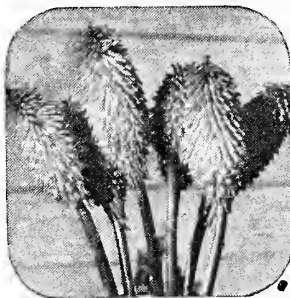

Yucca

POTENTILLA or CINQUEFOIL. Beautiful little plant that resembles Strawberry plants so closely that it is hard to tell them apart, except for the brilliant single or double flowers of assorted colors that are produced in profusion throughout the Summer.

PYRETHRUM (Painted Daisy). Daisy-like flowers ranging from white to deep rose. Fern-like foliage that stays pretty all summer. Blooms around Decoration Day. 18 inches. Sun. May to June.

RANUNCULUS. Trailing, double, yellow Buttercup with glossy green leaves. 6 inches. Sun. May-June.

RUDBECKIA (Black-Eyed Susan). Grows about 3 feet tall and during August and September is covered with yellow daisies with black centers. A biennial. Prefers semi-shade, but will grow anywhere.

Tritoma

THALICTRUM ADIANTIFOLIUM (Meadow Rue). Beautiful tall growing plant with foliage just like Maiden Hair Fern with small white flowers in June.

TIMBER PHLOX. Old-fashioned favorite, which grows wild in the timber land. Some folks call them Sweet Williams. The color is pinkish lavender. Blooms very early in the Spring and should be planted in practically full shade for best results.

TRITOMA, PFITZERI (Red Hot Poker). Also called Flame Flower and Sky Rocket Plant. Leaves almost like Iris. Long spikes of scarlet-orange flowers from July to frost.

VERBENA, HARDY. Looks just about like any other Verbena, only it is absolutely hardy. Extra fine for cemetery planting, as a couple of plants will cover a grave in one season. Just comes in one color, pink. Blooms all summer.

VINCA MINOR (Grave Myrtle). Hardy trailing vine, whose habit of rapid growth and dark green foliage makes it especially good for cemetery planting and rock gardens.

VIOLA, CORNUTA (Tufted Pansies). This is a cross between Violets and Pansies, and is hardy and everblooming.

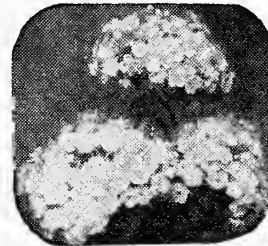

VIOLA, ODORATA (Sweet Russian Violets). The strain of Violets commonly grown in the Greenhouse for winter blooming. The flowers are large, very dark in color, and very fragrant.

YUCCA, FILAMENTOSA (Adam's Needle). Spanish Bayonet or Dagger Plant. You know what it is. Full sun, if possible.

YUCCA, VARIEGATED. New introduction resembling the old-fashioned Yucca, Filamentosa, except that the leaves are beautifully striped, green and white. 50c each; 3 for \$1.25.

Named Sorts of HARDY PHLOX

We have a wonderful collection of the better named varieties of Hardy Phlox, much superior to the old-fashioned seedling Phlox. They are field grown plants of good size and certain to bloom the first season. All varieties are 4 for \$1.00; \$2.50 per dozen, postpaid.

Jules Sandeau

MISS LINGARD. Pure snowy-white.. The earliest bloomer of all.

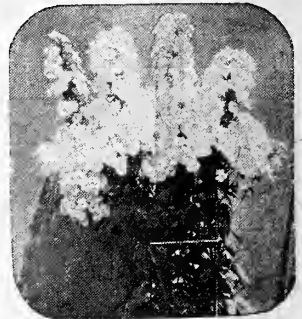

MRS. JENKINS. Round compact heads of pure white.

PHLOX SUBULATA OR MOSS PINK. A variety of Phlox which trails on the ground, and is a perfect mass of pink flowers in April. Especially adapted to the rock garden.

RJNSTROOM. A beautiful, clear, rose-pink with slightly darker centers. My favorite.

R. P. STRUTHERS. Deep carmine-pink with darker center. We sell more Struthers than any other variety.

PHLOX, MIXED COLORS. If you are not particular as to color, we can supply you with the mixed colors at 25c each; or 6 for \$1.00.

Miss Lingard

Pansy Plants

Pansies growing in the Field.

These plants are growing in cold frames out in the open field and they have been having freezing weather all winter, so they will be absolutely hardy. You can plant them out just as soon as the frost goes out of the ground in the Spring without any danger of having them hurt by freezing weather.

We are growing this year the finest lot of Pansy Plants that we have ever had. For one thing it is the best strain of seed obtainable in the United States.

Some of these plants bloomed in the field last fall, and we measured several which measured three inches across the face. The price is the same as it was last year, 60c for one dozen or \$1.50 for three dozen, by mail postpaid.

Water Lilies

No pool is complete without a few Water Lilies or Water Hyacinths. They add to the beauty of the pool and are quite necessary if you have fish. There are many different varieties and sorts of Water Lilies, but we recommend only the hardy varieties, for they can be carried over in the basement from one season to the next.

As this catalog goes to press we are undecided as to just what varieties of Water Lilies and Water Plants we will handle in addition to the varieties we had last spring. So far as I can tell now, we will have only three colors of Water Lilies, prices as follows: White, each \$1.00; Yellow, each \$1.50; Pink, each \$2.00, postpaid.

Water Hyacinths

We will have the Water Hyacinths, those peculiar bulbous stemmed plants, which float on the water and which are so necessary if you intend to raise young goldfish. 30c each; 4 for \$1.00, postpaid.

Unless otherwise specified, all hardy perennials priced as follows: 25c each; 5 for \$1.00 or 12 for \$2.00, postpaid, either all alike or assorted.

Peonies are ideal for permanent cemetery plantings.

The first hardy garden Lily to bloom early in the Spring is the LILY OF THE VALLEY. It likes a cool, moist, shady location like the North side of the house. The first of the true Lilies to bloom is the ELEGANS and UMBELLATUM family, the best of which is the RED RUSSIAN, which blooms about June first. Color, dark, reddish-orange.

Lily of the Valley to bloom is the REGAL LILY, which looks like an EASTER LILY except that the flowers are pink at the base on the outside and yellow at the base on the inside.

It blooms in July about the same time as the HARDY OUTDOOR EASTER LILY, Lilium Gigantum, which is pure, snowy white and used extensively by Greenhouses for indoor culture and needs quite a bit of winter protection if planted outdoors.

Regal Lily Next to bloom comes the TIGER LILY, which we carry in both the double flowered and single flowered.

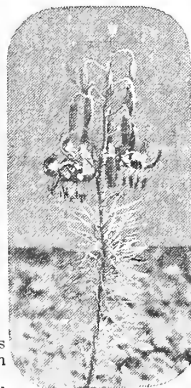

Then come the Japanese Lilies of which the AURATUM is the finest flowered, but a little harder to grow. It blooms in August. It is largest and sweetest smelling of all Hardy Lilies, pure white background covered with brown spots and yellow mid-rib of the petals.

The RUBRUM LILY blooms in September, white background so closely covered with carmine-red dots as to give the Lily a red appearance. The petals are recurved and stay in bloom for a long time.

Hardy LILIES

It is CLOSELY followed by the other members of the ELEGANS family, and by the UMBELLATUM family, which is a little larger than the rest of its relatives. Grows a little taller, and the blooms are a little lighter in color.

The SIBERIAN CORAL LILY, Lilium Tenifolium, blooms about the same time with the stems and foliage fine and wiry. Flowers are small in size, a deep scarlet with a waxy appearance. Petals are recurved like those of the RUBRUM LILY, and the bulbs are about the size of a small hickory nut.

Siberian Coral Lily

Rubrum Lily

Hemerocallis

The HEMEROCALLIS is also classed in the Lilies, but has thick fibrous roots instead of a bulb and is perennial. The flowers look just like Lilies and they come in various shades of yellow, and bloom at different seasons of the year.

The earliest one is HEMEROCALLIS FLAVA, which blooms late in May and is a clear, lemon yellow in color. HEMEROCALLIS MIDDENDORFFI opens about Decoration Day and is a little larger than FLAVA, and is a golden orange in color. HEMEROCALLIS DUMORTIERII comes next, blooming in June. Large golden yellow with reddish-yellow markings. It is closely followed by HEMEROCALLIS FULVA, which blooms all through July. It is the tallest one, sometimes as much as shoulder high. The flowers are dark brownish-copper color.

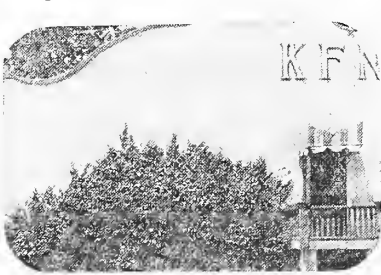

HEMEROCALLIS KWANSO is just the same as FULVA except the flowers are full double. HEMEROCALLIS THUNBERGII is the last of all to bloom, usually the latter part of August. The flowers are a pale lemon yellow, running about waist high.

Ornamental VINES

AMERICAN IVY (Virginia Creeper or Woodbine). A native American vine, which is hardy anywhere. A beautiful vine and a fast grower. Requires some support. 35c each; 2 for 60c; 4 for \$1.00.

Boston Ivy

BOSTON IVY (Ampelopsis Vetchii). which clings tightly to any kind of wall. or stucco houses. Not so very hardy north of here. 55c each; 2 for \$1.00; 4 for \$1.75.

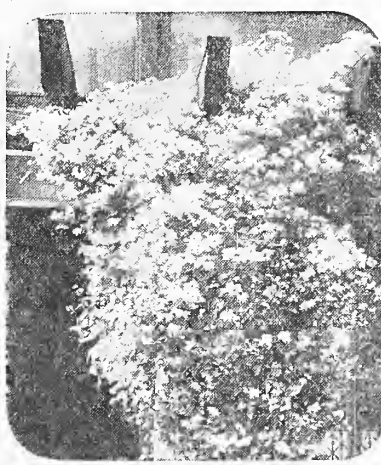

ENGELMANN'S IVY (Ampelopsis Engelmanni). Larger and stronger growing than the Boston Ivy and extremely hardy, but does not cling so well. Used very extensively on account of its hardness and rapid growth. Looks some like American Ivy. 35c each; 2 for 60c; 4 for \$1.00.

CLEMATIS JACKMANNI. The big purple Clematis. Very fine, hard to grow. We furnish very fine plants, but sell them without any guarantee, as to their living. \$1.00 each; 2 for \$1.75; 4 for \$3.00.

CLEMATIS PANICULATA (Japanese Clematis). Hardy, thrifty, quick growing. Great masses of fragrant white flowers during July, August, and September. 35c each; 2 for 60c; 4 for \$1.00.

DUTCHMAN'S PIPE (Aristolochia Siphon). Derives its name from the peculiar shape of its flowers, which resembles the old-fashioned Dutch pipe. The leaves are nearly as large as dinner plates. Does best on the north side of houses where most other vines are not a success. Blooms in June. Our vines are grafted and are the true large-leaved type. 60c each; 2 for \$1.10; 4 for \$2.00.

HONEYSUCKLE, HALLIANA (Hall's Japan Honeysuckle). Perfectly hardy, great climber and will grow anywhere. They range from white to yellow in color of blooms. 35c each; 2 for 60c; 4 for \$1.00.

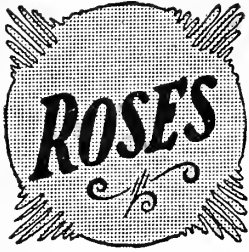

SILVER LACE VINE (Polygonum Auberti). Fastest growing of all hardy climbing vines. Many customers report thirty feet growth the first season. Covered with masses of foamy white flowers in late summer. Seems to do equally well on any side of the building. Price 75c each; 3 for \$2.00; postpaid.

TRUMPET FLOWER (Bignonia Radicans). A hardy, native vine, and extra strong grower, which always looks well. Glossy green leaves and large orange colored trumpet shaped flowers. 40c each; 2 for 75c; 4 for \$1.25.

WISTERIA (American Purple). A very strong growing vine with handsome, lacy foliage and beautiful, drooping trusses of purple flowers as large as bunches of grapes. Grafted from blooming wood. 85c each; 2 for \$1.50.

WISTERIA (Chinese White). About the same as above, except the color, which is pure white. Grafted vines. 85c each; 2 for \$1.50. Use Evergreens for Permanent Garden Beauty

Our rose bushes are all heavy, field grown plants, and budded or grafted on wild rose roots to make them strong, vigorous and healthy plants. The following varieties have proven their worth as to beauty, hardiness, and vigorous habit of growth, and should have a place in every garden. Unless otherwise specified, all Roses are sold at the following prices: 50c each; 3 for \$1.00; or \$4.00 per dozen, postpaid, either alike or assorted.

The Hybrid Tea Roses

These are the Everblooming Roses, which produce blooms from every new shoot all summer long. There is nothing that can equal the beauty of a bed of Hybrid Tea Roses. Include some of these roses in your planting plans.

The strongest shoots come from the base of the plant, and therefore should be cut back to within five or six inches of the ground when planted. In October draw earth about six inches high around the plant and after the ground freezes for the winter, mulch with a foot of straw.

BRIARCLIFF—Deep rose pink at center, shading to a lighter shade on the outer petals. Lasting and fragrant.

DUCHESS OF WELLINGTON—Intense saffron yellow, stained with crimson. Very hardy, and free blooming.

Gruss An Teplitz

GRUSS AN TEPLITZ—Rich, velvety red. Bears more blooms than any other, and blooms consistently until freezing weather. Very hardy.

J. L. MOCK—Silvery pink blooms on erect stems. Blooms freely, and flowers are large.

KAISERIN AUGUSTE VICTORIA—Pure snowy white, and a favorite. Flowers double and very lasting.

KILLARNEY PINK—Bright, sparkling pink. Abundant, continuous bloomer.

KILLARNEY WHITE—Same as the Pink Killarney, except that the flowers are a pure, snowy white.

LADY HILLINGDON—Deep apricot yellow. Blooms very freely. Flowers fragrant.

LOS ANGELES—Bright coral pink, shading to gold at base of petals. Flowers large and extremely fragrant.

LUXEMBOURG—Rich, golden yellow. Very vigorous and free blooming. A favorite.

MADAM CAROLINE TESTOUT—Bright, satiny rose with somewhat darker center. Petals tipped with silvery pink. Flowers quite large.

MADAM EDOUARD HERRIGER—Coral red, shading to brick apricot when fully opened. Very hardy.

MRS. AARON WARD—Indian yellow, occasionally splashed with salmon. Strong, vigorous grower.

MRS. CHAS. BELT—Shell pink with salmon shading. Flowers quite large. One of the best.

Lady Hillingdon

RADIANCE PINK—Brilliant, peach blossoming pink. Vigorous growing. Free blooming. Hardy. Altogether one of the most desirable of Roses.

RADIANCE RED—Same as the Pink in every respect, except the color, which is a deep rose carmine.

SOUVENIR DE CLAUDIUS PERNET—Full, double blooms of pure, sunflower yellow. Grows vigorously, very hardy,

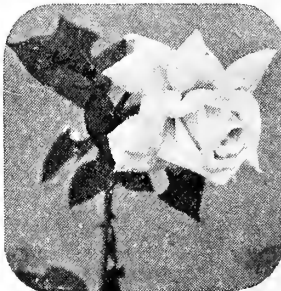

and blooms profusely all season.

SOUVENIR DE GEORGES PERNET—Oriental red, shaded with yellow. Flowers very large. Vigorous growing and extremely hardy. Very desirable.

SUNBURST—Apricot yellow shading to orange yellow in the center. Upright growth and blooms well.

WILLOWMERE—Blending of coral-red and shrimp-pink, shading to yellow in the center. Vigorous grower.

Fill those vacant places with good yielding fruit plants.

Kaiserin Auguste Victoria

Radiance Red

A Collection of New Varieties

Here are some of the more recent introductions of Hybrid Teas. We have tested them thoroughly in our own Trial Grounds, and find that they fully justify the price of \$1.50 and \$2.00, which is usually asked for them. We have fortunately secured a quantity of these, which enables us to offer them at \$1.00 each, postpaid.

Dame Edith Helen

BETTY UPRICHARD—Semi-double to double. Flower of delicate salmon pink when opened. Buds orange-carmine. Healthy grower and free blooming.

DAME EDITH HELEN—Pure, glowing pink. Flowers borne thickly on long, strong stems. Blooms are very large, double, lasting, and intensely fragrant. Blooms continuously, and is very hardy.

ETOILE DE HOLLANDE—Deep, bright red flowers borne thickly on long, strong stems. Flowers very lasting and fragrant, with the odor of Old Rose.

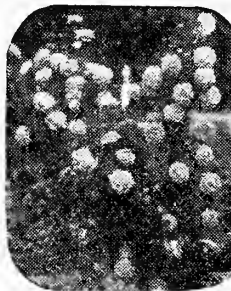

Lady Margaret Stewart

LADY MARGARET STEWART—Blooms very large and very double. Deep sunflower yellow, brushed with orange and red. Borne singly on long, straight stems. Grows vigorously and blooms continuously. Extremely fragrant.

LORD CHARLEMONT—Deep, dark crimson flower which is quite large, perfectly shaped, and very double. Very fragrant. Very hardy, blooms continuously all summer.

The Climbing Roses

Climbing American Beauty

Climbing Roses produce those long branches which may be trained over lattices or allowed to trail over banks. For a trellis, arbor, or beautiful gateway, nothing can equal the charm of Climbing Roses in full bloom. We can furnish the following favorite varieties:

CLIMBING AMERICAN BEAUTY—Deep rose-pink, large blooms, one to a stem. Free blooming and fine for cut flowers.

CRIMSON RAMBLER—Flowers double, and a bright crimson. Borne in large pyramidal clusters. Blooms profusely.

DOROTHY PERKINS—Clusters of pink blossoms with crumpled petals. Foliage heavy, which makes it best for quick shade.

DOROTHY PERKINS WHITE—Same as the pink form in every respect, except that the flowers are white.

DR. VAN FLEET—Flowers cameo-pink, fading to bluish white. Vigorous grower and very hardy.

DR. HUEY—Dark crimson on a roon, borne in clusters of three or four on a stem. Very beautiful.

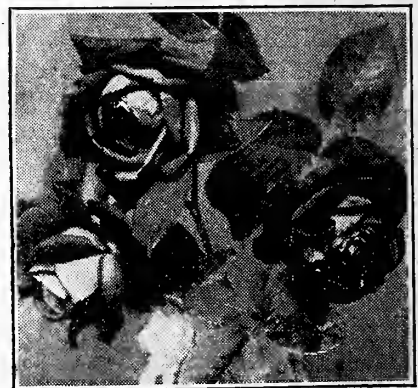

GARDENIA—Double yellow flowers. Best of the yellow Climbers.

PAUL'S SCARLET CLIMBER—Double flowers of fiery scarlet. Grows rapidly, and is the showiest of all Climbing Roses.

ROSARIE—Bright pink flowers in large clusters. Blooms very freely, and is practically thornless.

SILVER MOON—Large, semi-double flowers of pure white. Very vigorous and hardy.

TAUSENDSCHOEN OR THOUSAND BEAUTIES—Flowers in varying shades, from deep pink to white. Vigorous and hardy, with but few thorns.

Paul's Scarlet Climber

The Garden Roses

The hardiest and most free blooming of all. No pruning is necessary, except to cut out the dead wood each spring.

HUGONIS—Single, yellow Rose with beautiful, fine-cut foliage. Blooms three weeks earlier than any other.

MADAM PLANTIER—Widely used white Rose for cemetery plantings. Hardy anywhere, and produces a mass of snow-white blooms for Memorial Day.

HARRISON'S YELLOW—Beautiful double flowers of bright yellow. An old favorite.

ROSES (Continued)

Hybrid Perpetual Roses

These are the June Roses, which produce flowers of such large size and exquisite colors. In favorable seasons, they will sometimes produce a second crop of blooms in September. They are very hardy, and do well with ordinary care. It is necessary to prune away the tall, spindling wood in August, and leave from three to five main canes to ripen. In the spring these canes should be cut back to about two feet for large flowers, or if you don't mind the smaller blossoms, you can leave them somewhat longer. The following varieties are most satisfactory for their quality of bloom.

AMERICAN BEAUTY—Large double flowers of crimson. Very fragrant. Rarely needs description, for it is known to everyone.

FRAU KARL DRUSCHKI—Large double flowers of pure snowy-white. Generally acknowledged to be the most perfect white rose.

GENERAL JACQUEMINOT—Large red. Growth very vigorous and bushy. Very fragrant.

GEORGE AHRENS—Long, tapering buds of delicate pink. Sometimes called the pink Frau Karl Druschki.

PAUL NEYRON—Flowers bright rosy-pink. The largest of any known Rose.

SOLIEL D'OR—Large double flowers of golden yellow, shading to nasturtium red. Best yellow June Rose.

Paul Neyron

The Rugosa or Shrub Roses

Grow in shrub form, with heavy, deep green foliage all summer long, and bear an abundance of blooms in June. Used widely as hedges, as they are absolutely hardy and do not require pruning.

CONRAD F. MEYER—Pure silvery-pink. Very fragrant.

F. J. GROOTENDORST—Flowers of brilliant rosy-pink. Blooms consistently all summer. Unique in appearance, as each petal is evenly notched. Cross of Rosa Rugosa and Baby Rambler, making it exceptionally hardy.

PINK GROOTENDORST—The same as the above, except flowers are a clear pink.

HANSA—Reddish-violet flowers of large size. Grows vigorously and blooms freely.

SIR THOMAS LIPTON—Flowers double and pure white. Free and continuous bloomer.

THE WICHRIANA OR WHITE MEMORIAL ROSE—The trailing Rose which makes an ideal cemetery planting. It makes a complete green blanket which will keep the weeds down, and is covered with waxy white blooms in June.

The Dwarf Polyanthus or Baby Ramblers

There is an increasing demand for these low-growing Roses. The only bedding plant that can be depended upon for constant bloom all summer, and that is absolutely hardy. They never grow over 18 inches high, and are a mass of bloom all summer long. They need no pruning, except to remove faded flowers and dead twigs.

CATHERINE ZIEMET—Flowers of pure snowy-white, and double. Blooms in clusters.

CECILE BRUNER—Small double flowers of bright pink. Somewhat yellowish center. Dwarf and bushy, and blooms constantly from June to August.

IDEAL—Large, velvety crimson flowers which are double and very lasting. Very hardy.

EDITH CAVELL—Intense crimson scarlet. Probably the best known of all Baby Ramblers.

ELEN POULSEN—Dark brilliant pink, borne in large clusters. Very fragrant.

E. R. N. TESCHENDORF—Very lasting semi-double flower of strawberry red. Unusually abundant and continuous bloomer.

GEORGE ELGER—(Yellow Baby Rambler)—Very double. Flower of medium size. Golden yellow. Vigorous grower and blooms continuously from June until September.

TRIUMPH DE ORLEANS—Bright cherry red with somewhat lighter center. Vigorous grower and blooms well.

Rose Bush just taken from our field.

YOUNG FRUIT TREES

Thrifty, vigorous, young trees, just the right size for planting with best results, and at reasonable prices. These are the sizes used by most commercial orchard planters. The one year old trees stood from two to four feet high in the Nursery row, and the two year old trees from four to six feet high. Before we ship them out, we cut them back and prune them just as they should be for best results.

We guarantee that they will arrive safely, in good, live growing condition. If they aren't absolutely satisfactory in every respect when you receive them, return them at our expense, and we will refund the purchase price.

One year old Apple Tree

Apple Trees

A good selection of apples in the farm orchard is undoubtedly one of the best paying improvements you can make on your land. The orchard gives you good returns for your money, whether it be a small one supplying only enough for your own use, or a large one handled commercially.

We list only those varieties which are standard and which have proven to be the best for both home and commercial purposes. We can furnish you with either the one year old trees as shown in the picture above, or the two year old trees which are slightly branched.

Summer Apples

DUCHESS OF OLDENBURG—Yellow with red stripes. Good cooker. Ripens August to September.

MAIDEN BLUSH—Fine blushed variety, fine for home use. Ripens early fall.

RED JUNE—Medium sized yellow with red predominating. Bears well and ripens in July to August.

WEALTHY—Red. Does well anywhere. Ripens in September.

YELLOW TRANSPARENT—Pale yellow, and bears early. Ripens in September.

Winter Apples

DELICIOUS—Brilliant, dark red. Unsurpassed for quality as an eating apple. Very hardy. Ripens in October.

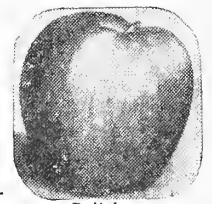

GRIMES GOLDEN—Golden yellow with wonderful flavor. Keeps well, and is a good, healthy grower. Ripens in September and the first of October.

JONATHAN—Dark red. Trees bear quite young and bear well. Ripens in late September or early October.

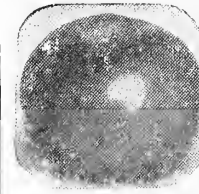

STAYMAN'S WINE-SAP—Deep crimson. Stores well and is better if not used until December or January. Ripens in October.

NORTHWESTERN GREENING—Greenish-yellow. Keeps well and is a fine cooking variety. Very hardy. Ripens about the middle of October.

TOLMAN'S SWEET—Fruit yellow and red, of fine flavor. Ripens in late September and early October.

Delicious

Wealthy

Crab Apples

RED SIBERIAN—Fruit red and rather small. Ideal for canning. Trees bear well, and are very hardy. Fruit matures in October.

WHITNEY NO. 20—Fruit green and red striped. Of good size and flavor. A fine quality Crab. Ripens in August or early September.

The following prices apply to all varieties of Apples, either all alike or of assorted varieties: One year trees, two to four feet, 4 for \$1.00; 10 for \$2.00; 25 for \$4.50. Prices prepaid, by mail or express, according to the size of the bundle.

Two year trees, four to six feet, 4 for \$1.80; 10 for \$4.00; 25 for \$8.75. They are too large to be sent by mail, and must be shipped express at your expense.

Plan the future with a profitable Orchard

HENRY FIELD CO.

Peach Trees

CHAMPION—Free-stone. Fruit large, delicious, and sweet. White meated with creamy-white skin and red cheeks. Ripens in August.

CRAWFORD'S EARLY—Freestone Fruit yellow with a showing of red cheeks. Flesh yellow and sweet. Ripens in August.

HEATH CLING—The only clingstone variety we list. White peach, very large and of fine quality. Ripens in October.

ELBERTA—Free-stone. The variety more widely grown than any other. The fruit is yellow with red cheek, having firm yellow flesh of fine quality. The trees are quite hardy and unusually productive. Ripens early.

Champion Peach

J. H. HALE—Somewhat larger than the Elberta. Rich, golden yellow blushed with carmine. Flesh is dark yellow. Very firm. Ripens just a little later than the early Elberta.

ROCHESTER—Fruit large, and of delicious flavor. White blushed with red. Hardy, and a good yielder. Ripens about the middle of August.

The prices are as follows for all varieties, and they may be either alike or assorted: One year trees, two to four feet, 4 for \$1.00; 10 for \$2.00; 25 for \$4.00. These prices are

J. H. Hale

postpaid, and the trees will be shipped either parcel post or prepaid express, according to the size of the bundle.

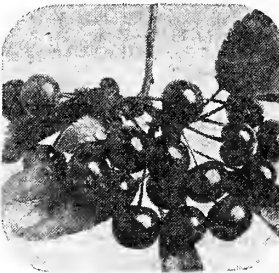

Two year old trees, four to six feet, 4 for \$1.60; 10 for \$3.50; 25 for \$8.00. These trees are too large to ship by mail, and must go by express, at your expense.

Cherry Trees

EARLY RICHMOND—Bright red in color. Very well known, and very hardy. Yields well. Used extensively for canning. Fruit is of good quality and good size. Ripens in June.

ENGLISH MORELLO—Very dark red, almost black. Fruit is juicy, tender, and of good quality. Very fine fruit for late canning. Ripens in late June.

LARGE MONTMORENCY—Large, red Cherries, very rich and contain very little acid. The trees are very hardy and bear constantly. Especially recommended for the Middle Western States. Ripens about ten days later than the Early Richmond.

Large Montmorency

The prices are as follows: One year old trees, two to four feet, 4 for \$1.60; 10 for \$3.50; 25 for \$7.50. These prices are prepaid, and include delivery by parcel post or prepaid express, depending upon the size of the bundle.

Two year old trees, four to five feet in height, 4 for \$2.40; 10 for \$5.50; 25 for \$12.50. These trees are too large to ship by mail, and must go by express, at your expense.

Sweet Cherries

Sweet Cherries are not so very satisfactory grown in the Middle West, but we have such an increasing call for them that we list the following variety, which, in our estimation, is best for the Middle Western States:

BLACK TARTARIAN—The genuine, old-fashioned Sweet Cherry. The fruit is very large, and very sweet, and almost black in color. Ripens in late June or early July.

One year old trees, three to four feet, 65c each; prepaid by mail or express.

Two year old trees, four to five feet, 75c each. These are too large for shipment by mail, and must go by express, at your expense.

Apricot Trees

Apricots are not generally successful through the Middle Western States this far north, but our demand for Apricots is quite large, so we list this one variety. It is, in our estimation, the most suitable for this country.

SUPERB—Very hardy variety, which originated in Kansas. Probably the best flavored and most productive hardy Apricot yet produced. Medium size, and light salmon in color.

The prices on the Apricot Trees in both one and two year sizes the same as for Cherry Trees.

Pear Trees

BARTLETT—Yellow Pear with red cheek when fully ripened. Fruit very well flavored and popular both as an eating and canning Pear. Ripens in late August or early September.

KIEFFER—Golden yellow. Of large size and a good keeper and shipper. Ripens in October.

SLOCUM—Smaller than the Bartlett or Kieffer. Fruit sweet and of fine texture. Ripens late September or early October.

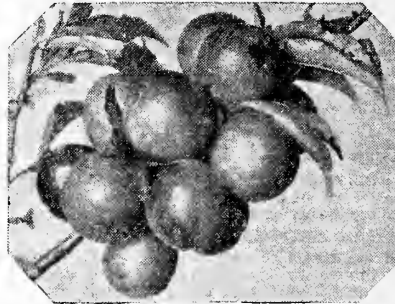

Pear trees furnished in both one and two year sizes at the same price as the Cherry Trees.

Bartlett

Plum Trees

COMPASS CHERRY—Colored about the same as the Early Richmond Cherry. Good quality fruit of fine flavor. Excellent for canning. Ripens in July.

Hanska

HANSKA—Hansen Hybrid. Crimson blushed fruit of large size, red in color. Trees very hardy. Ripens in August.

BURBANK—Fruit cherry red, and large. Trees are very hardy. Produces well. Ripens about the middle of August.

OPATA—Another Hansen Hybrid. Purple fruit with green flesh. Sweet flavor. Ripens about the middle of July.

SAPA—Another Hansen Plum. Bears ex-

tremely early, and grows vigorously. Fruit is almost black with flesh of a deep, reddish-purple. Ripens late in July.

TERRY—Native Plum. Fruit red and quite large. Ripens well and keeps well. Flesh is yellow. Ripens in August.

UNDERWOOD—Large, round fruit of greenish-yellow. Fruit of excellent quality and keeps well. Matures about the middle of August.

WANETA—Dark red Plum of unusual quality and size. Very good eating Plum. Matures by early August.

Prices on all Plum trees in both one and two year sizes the same as those on Cherry Trees.

GRAPE VINES

AGAWAM—One of the best of all the red varieties. Quite large.

BETA—Medium sized, black grape, said to be a cross between the Concord and the wild Grape. Vigorous climber, much used for ornamental purposes in addition to its value as a grape juice maker. Hardy without protection anywhere in the country.

CATAWBA—Very large, coppery red, high quality and a heavy bearer.

CACO—The most valuable grape introduced in the last century. The fruit is quite large and reddish brown in color. Very high quality. The flavor is extremely rich and spicy. This variety being a very new introduction, is rather scarce and high in price, but is well worth it. One-year plants 40c each; two-year plants 60c each, postpaid.

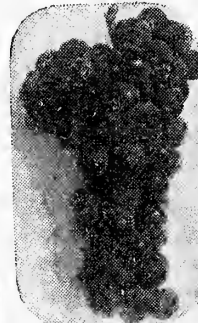

CONCORD—The variety grown for main crop market the country over.

MOORE'S EARLY—Very fine for market purposes. Ripens ten days before the Concord.

NIAGARA—Greenish-white, heavy yielder, bunches large and compact. Most satisfactory of all white grapes.

Agawam

Concord

STRAWBERRIES

Field's New Masterpiece

FIELD'S NEW MASTERPIECE (Everbearing)—Our new everbearing variety offered now for the first time. Superior to Mastodon, for its size, flavor, productiveness and keeping qualities. Berries very large, solid, dark red, and of fine texture, making it very delicious for table use. It will keep better and longer than any berry we have ever had, keeps for days after being picked, thus making it ideal also for market use. It produces a heavier crop than the Mastodon, and makes more runners and more new plants than any other everbearing variety we have ever had.

It has taken us three years to work up a sufficient stock of plants so that we could offer them to you. Consequently, our stock is limited, and it will be strictly first come, first served. Price, 12 for \$1.25; 25 for \$2.00; 50 for \$3.00; 100 for \$5.00, postpaid.

SPECIAL OFFER

In order to help introduce the two new varieties we are going to give, with each order 100 of Field's New Masterpiece, an additional 100 plants of the new June bearing variety, Blakemore, which we are offering also for the first time this season. Additional plants will not be sent unless the order amounts to 100 plants or more.

THE MASTODON EVERBEARING—The Mastodon is one of the biggest and best strawberries we have ever had. It is certainly a world beater, big, dark red high flavored, and ideal for home use. The plants are big and husky, and produce lots of fruit all summer from June until frost. Now the most popular variety in the U. S.

IMPROVED PROGRESSIVE EVERBEARING—A standard variety of everbearing strawberries. They are widely used and preferred by some people to the Mastodons, claiming that the berry is better flavored.

Spring Bearing Strawberry Plants

AROMA—A great market berry in Southern Missouri and Northern Arkansas.

BANNER—Not very extensively grown in the Middle West, but used widely in Western states. Makes the largest plants and largest leaves of any strawberry plant I ever saw. The berries are very large in proportion. Well worth trying.

THE BLAKEMORE—A recent introduction in the June bearing strawberry. Originated in the East, where special attention is given to marketing qualities, and flavor of berries for commercial use. The berry is large and finely flavored, very solid, which makes it a good keeper, and the plants produce even heavier than the Senator Dunlap. This is the first season in which stock of this wonderful new variety has been available to offer in quantities. 25 for 60c; 50 for \$1.10; 100 for \$2.00, postpaid.

SENATOR DUNLAP—One of the best June bearing varieties. It has been the standard market variety for this section of the country. Heavy bearer and heavy plant maker. The fruit is large, smooth, regular in shape, very firm, and of dark red color, and of a quality that makes it unexcelled for home or market use.

PREMIER—Not planted generally here in Iowa, but used extensively in Ohio, Indiana, and Illinois, and has been in great demand the last two or three seasons. Commercial growers in these states claim it is the best variety.

Postpaid Prices for Strawberry Plants

	25	50	100	200	500	1000
Aroma	\$0.40	\$0.65	\$1.25	\$2.25	\$4.00	\$7.00

Mastodons	1.00	1.50	2.75	5.00	10.00	18.00

THE YOUNGBERRY

Something entirely new in the line of small fruits. The Youngberry is the result of crossing the Dewberry with the Loganberry. Resembles these parent plants very much in habit of growth. However, it is more hardy and more vigorous growing, and adapts itself to a wide range of soils and climatic conditions. Unequalled for productiveness, a few hundred plants often bearing several thousand quarts of fruit in a single season. Fruit very juicy, somewhat sweet flavored like the red Raspberry. First-class for table use, as well as for canning and making jelly.

\$2.00 per dozen; 25 for \$3.50; or \$12.00 per hundred, postpaid.

RASPBERRIES

There will be more Raspberries planted this year than ever before. They do well in most any part of the country, and are always in demand in season and bring good prices everywhere. The most delicious and popular of all small fruits, except Strawberries.

Have the ground well prepared, and plant in rows five feet apart, with the plants set three feet apart in the row. After they are through bearing, cut out the old wood so as to give strength and vigor to the new canes that are to produce the next year's crop. We recommend the following varieties:

CHIEF, the New Red Raspberry

Chief is the new Red Raspberry recently brought out by the Minnesota Experiment Station. Originating in Minnesota, it is unusually hardy. In addition to this, it is apparently mosaic proof. The berry is a rich red in color, and ripens from ten days to two weeks earlier than the Latham. The berries are somewhat smaller in size, but it is such a heavy yielder that the average crop is about 25% more for each season. The flavor is highly delicious, in fact, the best tasting Raspberry that we have ever eaten.

We recommend this very highly, and believe it is the coming Raspberry for commercial as well as home use. Our stock is limited this season, so we advise ordering early. Prices \$2.00 per dozen; 25 for \$3.50; or \$12.00 per hundred, postpaid.

Quillan Raspberry

QUILLAN—An improved and new variety of the Black Raspberry. Fruit of fine flavor, about the size of the Cumberland. Growth vigorous and strong, and bears heavily. Price 12 for \$1.00; 25 for \$1.75; 100 for \$6.00, postpaid.

Other Varieties of Raspberries

CUMBERLAND—The largest of all Black-cap Raspberries. Vigorous grower, bears heavily, fruit of excellent quality. One-year plants one dozen for 60c; 25 for \$1.00; 100 for \$3.50.

Two-year plants 12 for \$1.60; 25 for \$3.00; 100 for \$9.00, postpaid.

(We especially advise the planting of the two-year old, or transplanted plants, for they are much more vigorous than the one-year old size, therefore more certain to give good results.)

CARDINAL—This is the best purple variety, and looks very much like the Black-cap, except that the berry is a dark, cardinal color. Berries large and of very fine quality. One-year plants, 12 for 70c; 25 for \$1.25; 100 for \$5.00.

Two-year plants, 12 for \$1.60; 25 for \$3.00; or 100 for \$10.00, postpaid.

CUTHBERT RED—One of the old standbys in Red Raspberries. Fruit sweet and very rich. 12 for 70c; 25 for \$1.25; 100 for \$4.50. We have these only in the one-year old plants, which are known as sucker plants.

LATHAM RED—An extra hardy early red Raspberry from Minnesota. The best of all red Raspberries, excepting the new variety called Chief. These are sucker plants, and we have them only in one size. 12 for \$1.00; 25 for \$1.75; 100 for \$6.00, postpaid.

ST. REGIS OR EVERBEARING RED—Fruit of brilliant crimson, and good size. Ripens early, and produces until frost. We have these in the sucker plants only. 12 for 60c; 25 for \$1.25; 100 for \$4.50.

BLACKBERRIES

Blackberries are almost as popular for home use and canning as Raspberries. The method of growing and handling them is just about the same. We offer four of the best varieties, which cover the entire season of ripening.

EARLY HARVEST—The earliest ripening variety. Vigorous and compact grower. Yields heavily. 12 for 90c; 25 for \$1.50; 100 for \$5.00, postpaid.

MERSERAU—Largest fruit of any. Fruit sweet and very juicy. Ripens two weeks earlier than the Snyder. 12 for \$1.00; 25 for \$1.75; 100 for \$6.00, postpaid.

ELDORADO—Very hardy and vigorous. Berries are large, jet-black, and borne in large clusters. 12 for \$1.00; 25 for \$1.75; 100 for \$6.00, postpaid.

SNYDER—The old standby. Very hardy and very thrifty. Berries borne in large quantities. 12 for \$1.00; 25 for \$1.75; 100 for \$6.00, postpaid.

DEWBERRIES

LUCRETIA—Fruit is quite large and closely resembles the Blackberry. Very sweet without a core. Vines trail on the ground. Very hardy and produces well. 12 for 90c; 25 for \$1.50, postpaid.

Strawberry-Raspberry

Berries bright scarlet, much like red Raspberries. Bush is low growing and is hardy anywhere. Fruit borne on new growth. Fruit not of much value to eat, but chiefly a curiosity for the garden. 15c each; 4 for 50c; 12 for \$1.00, postpaid.

There is beauty in all flowers.

HENRY FIELD CO.

IRIS

The Rainbow Flower

It has been truthfully said that the Iris is without any exception the most satisfactory of all perennial flowers for the average gardener to grow. For one thing, Iris is absolutely hardy throughout the entire country. They can be grown from the Atlantic to the Pacific and from the Gulf of Mexico to the Great Lakes. Here in Shenandoah they do not get any winter protection whatever and come through gloriously every spring.

Siberian Iris

One of the strong points from the stand-point of the amateur is the fact that Iris planted this summer and fall will bloom next spring. Another point is the fact that Iris can be moved with perfect safety any month of the year that you can work the ground. Here in Iowa that means any time from the first of March until the middle of December. We have moved clumps in full bloom, and never lost a plant.

The Iris is the only flower which has the complete color range. Dark, vivid blues; pure, snowy white; wine color so dark that it is almost red; rich, glowing yellows, deep purples almost black and every possible shading in between. Some of them are variegated with two sharply contrasting colors; others have the colors blended so evenly that the eye cannot distinguish where one color leaves off and the other begins. In fact, the different color combinations are so many as to be almost inconceivable.

There are six or seven hundred different varieties of Iris, being listed in various Nursery catalogs throughout the United States, but we have selected only a few of the best and we offer them to you in the list below. Some of these are varieties of recent introduction. Others are old favorites, which have stood the test of time.

The main thing to remember in planting Iris plants is to set them very shallow with at least half of the bulb showing above the ground, and with only the roots extending down into the ground.

15c Varieties Iris

- ALCAZAR**—Light violet blue with purple falls.
- BLUE SIBERIAN**—Medium small, dark blue flower.
- CAPRICE**—Purple red. Best in this price range.
- EDITH COOK**—Purple standards with yellow falls.
- FLORENTINE ALBA**—Large white flowers. Blooms early.
- FRO**—Pure yellow standards. Falls yellow.
- GERTRUDE**—Dark violet blue. Very free blooming.
- HER MAJESTY**—Rosy lilac flowers. Medium size.
- JUNIATA**—Clear blue with purple veined falls.
- KOCHII**—Very dark purple. Blooms early.
- LOHENGRIN**—Lilac blue. Free blooming.
- LORELY**—Clear yellow. Purple veined falls.
- MADAM CHEREAU**—Pure white. Petals penciled with blue.
- MADAM PACQUETTE**—Flowers violet veined with white.
- MONSIGNOR**—Blue with purple veined white falls.
- MRS. H. DARWIN**—Pure white with purple veined falls.
- NIBELUNGEN**—Tan standards with purple falls.

Iris Border

- PRINCESS BEATRICE**—Lavender with slightly darker falls.
- PRINCESS VICTORIA LOUISE**—Yellow. Maroon falls.
- QUAKER LADY**—Purplish tan with lavender falls.
- QUEEN OF MAY**—Lavender flowers. Blooms early.
- RHINE NIXE**—White with purple falls, bordered with white.
- ROSE UNIQUE**—Lilac purple. Falls slightly darker.
- SALMON PUFF**—Lavender with light purple falls.
- SHERWIN WRIGHT**—Deep yellow. Very free blooming.
- VELOCIA GRANDIFLORA**—Deep blue with light blue falls.

WHITE SIBERIAN—White flowers, otherwise same as Blue Siberian.

Your choice of the above varieties at 15c each, or \$1.00 per dozen, postpaid, either alike or assorted.

For shade or ornament Plant Chinese Elm

25c Varieties Iris

- AFTERGLOW**—Light lavender or mauve.
- B. Y. MORRISON**—Pale lavender with dark purple falls.

CECIL MINTURN — Lilac pink flowers. Medium size.

CLUNY — Pale lilac blue with darker falls.

DELICATISSIMA — Pure white bordered with lavender.

DREAM—Lilac pink with slightly darker falls.

EDOUARD MICHEL—Dark reddish violet. Flowers large.

ISOLENE—Bluish pink with deep lilac pink falls.

JAPANESE IRIS — Tall growing with narrow leaves. Blooms flat. Can be grown in damp or acid soil. Mixed colors, only.

LENT A. WILLIAMSON—Soft lavender with dark purple falls.

LORD OF JUNE—Pale lavender with darker falls.

MARY GARDEN—Pale yellow with white falls.

MIRANDA—Large, clear blue-purple. Very tall.

MOTHER OF PEARL—Lavender-gray. Tall growing.

OPERA—Standards violet-red with reddish purple falls.

PROSPER LAUGIER—Dark tan with crimson purple falls.

QUEEN CATERINA—Lavender blue with darker blue falls.

SHEKINAH—Light yellow with creamy white falls.

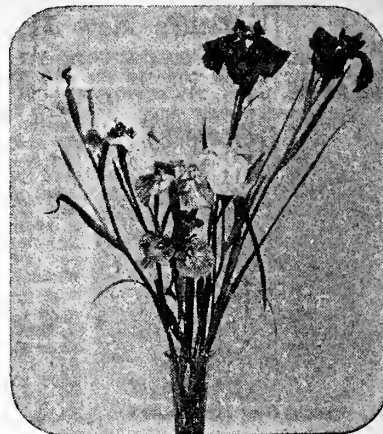

STANDARD BEARER—Lavender with white veined falls.

SWEET LAVENDER—Rose-lavender flowers. Tall growing.

TROOST—Light purple. Falls white veined with dark purple.

YELLOW PUMILA—Dwarf variety with golden yellow flowers.

Your choice of the above varieties at 25c each; or \$2.00 per dozen, postpaid, either alike or assorted.

Japanese Iris

Red Wing

DWARF OR LOW GROWING IRIS

PURPLE PUMILA—Dwarf variety with dark bluish-purple flowers.

WHITE PUMILA—White flowers veined with greenish-yellow.

SPRING SKIES—Free blooming with flowers of pale blue.

Any of the above Pumila varieties at three for 25c or 75c per dozen, postpaid, either alike or assorted.

Extra Choice Varieties

Here are some of the finer and newer varieties. They are newer introductions which have been on the market for only a short time, and consequently are higher in price. All are very good, and are becoming popular.

AMBASSEDEUR—Bluish pink, dark purple falls. 50c each.

AUTUMN KING—Clear blue with velvet purple falls. Flowers of large size and blooms in spring and fall. \$1.00 each.

BEAU IDEAL — White, heavy violet border on both standards and falls. 50c each.

BUTO—Royal purple with dark violet falls. New. \$5.00 each.

CAROLINE STRINGER—Flowers of delicate rose pink. \$1.00 each.

GOLD IMPERIAL—Light chrome yellow. 75c each.

KING TUT—Tobacco brown with falls of rich sorghum brown. New. \$5.00 each.

MEDRANO—Reddish copper with crimson purple falls. 50c each.

MORNING SPLENDOR—Deep reddish-purple. \$1.50 each.

NEPTUNE—Light blue with dark purplish-blue falls. 75c each.

PRAIRIE GOLD—Best yellow of all Iris. \$2.00 each.

PROSPERO—Lavender with deep reddish-purple falls. 35c each.

RED WING. Light brownish-red with falls of dahlia carmine. New. \$5.00 each.

Prosper Laugier

Beau Ideal

Lord of June

WHITE SIBERIAN—White flowers, otherwise same as Blue Siberian.

Your choice of the above varieties at 15c each, or \$1.00 per dozen, postpaid, either alike or assorted.

Peonies in bloom in one of our fields

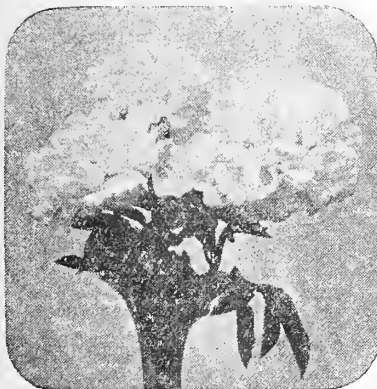

PEONIES

I don't know of any flower which gives more satisfaction than Peonies. The flowers are beautiful, large, and fragrant, and are hardy anywhere. They are easy to grow, the main thing being to plant them properly. They do well on any ordinary garden soil, and should not be planted so there is more than three inches of dirt over the crown of the plant. The ideal time for planting is in the Fall, but Spring planting is just as good, providing you plant early.

We don't have space here to give detailed descriptions of each variety, but do give the predominating color and time of bloom. We have arranged them in classes according to price, so that you can easily make your selection if you know how much money you want to spend and how many Peonies you want.

50c Varieties

- AKSARBEN**—Bright, fiery red. Midseason.
ALBATRE—Pure snow-white. Midseason.
ANEMONE FLORA PLENA—Beautiful shade of light pink. Midseason.
BRYANT'S WHITE—Milk-white. Midseason.
COURRONE D'ORR—Snow-white with yellow stamens. Late midseason.
DOC DE WELLINGTON—White with sulphur center. Midseason.
DUCHESSE DE NEMOURS—Sulphur white. Early.
EDULIS SUPERBA—Best deep pink. Early.
FESTIVA MAXIMA—Pure white. Very popular. Early.

Madam Crousse

- MEILKE**—Beautiful rose pink. Early.
MONT BLANC—Milk white. Centers tinted rose. Early midseason.
OLIVE LOGAN—Dark rose. White tinged center. Midseason.
PLENISSIMA ROSEA—Delicate rose pink. Midseason.
PARMENTIER—Deep salmon pink. Midseason.
PRINCESS ELLEN—Lilac pink. Late.
QUEEN VICTORIA—White with specks of crimson. Midseason.
REINE DE FLEURS—Clear pink with darker center. Midseason.
ROSE FRAGRANS—Dark pink, almost red. Late.
SEA BREEZE WHITE—Large white flowers. Midseason.
STEVENS PINK—Rose pink. Early.
 Your choice of above varieties at 50c each or 10 for \$4.00, postpaid, either alike or assorted.

75c Varieties

- ALBERT CROUSSE**—Flesh pink. Center touched with crimson. Late.
AVALANCHE—Milk white. Petals edged with crimson. Late.
FELIX CROUSSE—Ruby red. Late midseason.
FULGIDA—Bright red with yellow stamens. Late midseason.
LIVINGSTONE—Soft lilac rose. Late.
LOUIS VAN HOUTTE—Dark crimson. Late midseason.
PRAIRIE KING—Bright crimson shaded to purplish-red. Early.
PRESIDENT ROOSEVELT—Deep red. Midseason.
ROSE DELIGHT—Clear rose pink. Midseason.
STELLA—Delicate rose with crimson center. Midseason.
 Your choice of the above varieties at 75c each or 10 for \$6.00, postpaid, either alike or assorted.

UNNAMED PEONIES

If you just want Peonies by color, and don't care so much about the named varieties, we can furnish you with either red, white, or pink, not named, at 35c each, or three for \$1.00. You may make your selection by color, either all the same color or all different colors. If you want a dozen or more, you can have them at the rate of \$3.00 per dozen, postpaid.

\$1.00 Varieties

- ASA GRAY**—Salmon pink marked with deep pink. Midseason.
BARONESS SCHROEDER—Delicate blush white. Late.
CRIMSON VICTORY—Very dark red. Early midseason.
GROVER CLEVELAND—Dark crimson. Late midseason.
KARL ROSENFIELD—Dark crimson. Early midseason.
MAY KING—(Officialis Rubra)—Brilliant crimson. The earliest blooming red.
MONS JULES ELI—Lilac pink shaded to deep rose. Early midseason.
NEPTUNE—Beautiful lilac white. Midseason.
GRANDIFLORA—Bright shell pink. Late.
 Your choice of the above varieties at \$1.00 each, or 5 for \$4.00, postpaid, either alike or assorted.

Mons Jules Eli

\$1.50 Varieties

- MADAM EMILE LEMOINE**—Pink shading to pure white when fully opened. Midseason.
MARIE CROUSSE—Soft salmon pink. Midseason.
SARAH BERNHARDT—Apple blossom pink. Silver tipped petals. Late midseason.
 Your choice of the above varieties at \$1.50 each, or 3 for \$4.00, postpaid, either alike or assorted.

\$3.00 Varieties

- GEORGIANA SHAYLOR**—Flesh pink with lighter center. Midseason.
LONGFELLOW—Brilliant red with golden stamens. Midseason.
LORA DEXHEIMER—Bright crimson shading to dark red. Early.
MADAM JULES DESSERT—Pure white shading to pink. Midseason.
RICHARD CARVEL—Bright crimson. Early.
SOLANGE—Delicate pink. Midseason.
TENUIFOLIA (Fern-leaf Peony)—Bright red. Early.
THERESE—Pink shading to lilac white. Midseason.
WALTER FAXON—Bright rose pink. Midseason.
 Your choice of the above varieties at \$3.00 each, or 5 for \$12.50, postpaid, either alike or assorted.

Some Especially Fine Peonies

- KELWAY'S GLORIOUS**—Enormous flowers. Creamy white. Guard petals streaked with rose. \$10.00 each. Midseason.
LE CYGNE—Pure creamy white. The most perfectly formed Peony in existence. \$7.00 each. Midseason.
PHILIPPE REVOIRE—The most perfect red. Midseason. \$10.00 each.

Cream of the List

- FESTIVA MAXIMA**—Best white. **EDULIS SUPERBA**—Fine pink. **FELIX CROUSSE**—Very good red.
 One of each for \$1.50, postpaid.

Most all of you are familiar with these three varieties. If you are not, this selection is my choice of the best red, pink, and white in good, medium priced Peonies. All three bloom well, and are sure to give the utmost satisfaction. They are always in bloom at Shendaoah for Decoration Day.

You can help both yourself and us by ordering early.

HENRY FIELD CO.

EVERGREENS

Evergreens

You have always wanted Evergreens, and probably not been able to have them, partly because it was difficult to get just the right size for transplanting with the best success, and partly because if you bought them in larger sizes, they cost too much. We have had grown for us a fine stock of the ten best varieties, which are the most suitable for your needs. All of the following list you will find to be varieties best suited for foundation plantings, for general landscape work, and for back-ground and even rock garden plantings. We selected this list, because of its range of uses, and because the varieties are all very hardy and can be grown under almost all soil and growing conditions, and are adaptable to most any situation.

The main thing to remember in planting Evergreens is to water them freely when first planted, and during the spring and fall. It is well to use a mulch around the base of the trees during the winter, which you may apply when the ground freezes, and remove when the weather becomes warm in the spring. Most Evergreens prefer well drained soil and open, sunny locations, but they may be otherwise used. Exceptions are noted in the descriptions of varieties.

These young trees have all been transplanted several times, and are now just the right size for transplanting with best results. They will be dug fresh from the field, and balled and burlapped for shipment. Plant them just as soon as you receive them. Dig the hole large enough for the ball of earth to set into nicely. It is not

Pfitzer's Juniper

necessary to remove the burlap from the roots. Just cut it in several places, so the roots will have room for growth. Pack dirt firmly around the ball, and cover so the tree is one or two inches deeper than it stood in the Nursery row. Keep them well watered during the spring, and also during the fall season.

The pictures on this page are actual samples taken from the field. Note the size of the young trees, compared with the length of the ordinary carpenter's hammer. They are balled and burlapped for shipment, just as shown in the pictures.

GUARANTEE

We guarantee that these trees will be packed and delivered to the Express Company in good, live, growing condition. If any damage occurs while in transit, claims should be filed with the Express Company. We can not assume responsibility for the growth of trees after they are in the ground, for successful growth of Evergreens is mostly a matter of the care they receive after being transplanted. If we were to assume any responsibility for their growth, we could not handle them at the price at which we offer them.

Varieties

Black Hill Spruce

NORWAY SPRUCE — Probably the most widely used Evergreen. Very hardy, and adaptable to most any soil. Prefers shallow and well drained soil, although that is not necessary. Should be planted in open, sunny locations.

BLACK HILL SPRUCE—Hardest of all Spruces. Compact and bushy in habit of growth. Most suitable for specimen plantings or away from buildings. Very hardy. Should be planted in well drained soil, and preferably in full sun. Can be grown in partial sun.

ORIENTAL ARBORVITAE—Tall and slender grower, of dark green foliage. Can be grown under almost any conditions, but prefers the open, sunny locations. Useful for specimen, foundation, or back-ground plantings.

SCOTCH PINE—Very hardy and can be grown on almost any soil. Grows very rapidly, which makes it a great favorite. Prefers a cool, well drained soil. Used mostly in background and specimen

plantings. Fine for city plantings, as it does well under city growing conditions.

COMPACTA ARBORVITAE—Dwarf grower, which is almost globe shaped. Foliage of bright green. May be used in landscape work, and handled the same as the other Arborvitae.

PYRAMIDAL ARBORVITAE — Most popular of all Arborvitae. Should be planted on the south or east, in reasonably good soil. Will attain a height of about 20 feet, not more than 3 or 4 feet wide at the base of the tree. Valuable for corner, entrance, and specimen plantings.

AMERICAN ARBORVITAE—One of the oldest of Evergreens. Prefers a moist location, although very dependable and hardy in any location. Preferred for background or large group plantings. Effectively used in landscape work, for it can be kept trimmed to any desired height or form.

JUNIPER EXCELSA STRICTA—Tall, dense grower, which tapers gradually from the ground to a sharp point on top. Slow growing, which makes it desirable for rock gardens, foundation plantings, or any place that dwarf growers can be effectively used. Should be planted in open, sunny locations, which are well drained.

MUGHO PINE—Unusually hardy, and of the low branched, dwarf type. Never reach a height of more than 3 or 4 feet. Free from insects or pests of any kind, and will grow in any location. Ideal for entrance, foundation, and rock garden plantings. Does well under city growing conditions.

PFITZERS JUNIPER—Dwarf growing, and of somewhat irregular form. Will thrive in any part of the country, and under almost any soil and growing conditions. Will stand considerable shade, making it a favorite for landscape plantings. Grows to a height of about 4 or 5 feet, but can be kept sheared to any desired height.

Evergreen prices are all quoted F.O.B. Shenandoah, and the trees will be shipped by express, at your expense. Owing to the expense in balling and packing for shipment, we do not quote a price on single trees. You must order two or more. If you want uneven quantities, figure as follows:

For three trees, the price of two plus one-half of that price; for five trees, the price of four plus one-fourth, and so on for other quantities. If more than ten are wanted, write for special prices. Height given in price list is distance from top of tree to top of ground, measured in the field, before digging.

American Arborvitae

Evergreen Prices

Variety	Height	2	4	6	8	10
Black Hill Spruce	1 to 1 1/2 ft.	\$2.50	\$4.75	\$6.50	\$8.00	\$9.50
Norway Spruce	1 to 1 1/2 ft.	2.50	4.75	6.50	8.00	9.50
Oriental Arborvitae	1 to 1 1/2 ft.	2.50	4.75	6.50	8.00	9.50
Scotch Pine	1 to 1 1/2 ft.	2.50	4.75	6.50	8.00	9.50
Compacta Arborvitae	1 to 1 1/2 ft.	3.00	5.75	8.00	9.75	11.00
Pyramidal Arborvitae	1 to 1 1/2 ft.	3.00	5.75	8.00	9.75	11.00
American Arborvitae	1 1/2 to 2 ft.	3.50	6.50	9.00	11.00	12.50
Juniper, Excelsa Stricta	1 1/2 to 2 ft.	3.50	6.50	9.00	11.00	12.50
Mugho Pine	12 to 15 in.	6.00	11.50	16.50	21.00	25.00
Pfitzers Juniper	15 to 18 in.	7.00	13.50	19.50	25.00	30.00

EVERGREENS will be ready for shipment at digging time in this locality, which is ordinarily as early as March 1st, but this time may vary a few days, depending on weather conditions.

Ornamental SHADE TREES

There is nothing adds to the beauty of the farm or city home grounds as does the planting of a few well chosen shade trees. The following varieties are those which will do well and give the most satisfaction in the Middle West. These trees are mostly all five to six feet in height, too large to go by mail, so we price them F.O.B. Shenandoah. They must be shipped by express, at your expense. Ordering in quantities of four or more will greatly cut down the express costs.

Chinese Elm

The new shade tree which is adaptable to the most adverse growing conditions. Withstands severe drouth and extreme cold, as well as unfavorable soil conditions. Attains a height when full grown of 30 to 40 feet. Grows very rapidly into a well formed and symmetrical-shaped tree, making it ideal for street, as well as specimen plantings. The demand for them the past year or two has been so tremendous that it has been almost impossible to secure a quantity of them.

The illustration at the right is an actual photograph of a Chinese Elm planted just nine years ago. Note the exceptional growth it has made in that time. Notice also what a beautiful, well shaped tree it is.

We have grown an exceptionally fine stock which we can supply in different sizes at the following prices:

Chinese Elm

	Each	2	4	12
6 to 8 Ft. Trees.....	\$1.25	\$2.25	\$4.00	\$10.00 (Not Prepaid)

Willow, Weeping75	1.25	2.00	5.00

NOTE: Above trees are 5 to 6 ft. size unless otherwise specified and are not prepaid.

Forest Tree Seedlings

These are especially recommended for wood lots, hedges, and windbreaks. Some of them are especially good for fence posts, such as the Osage Orange, Catalpa, and Russian Mulberry.

The trees listed below are all one year old seedlings, straight whips, 12 to 18 inches in height when dug, except the Willow and Poplar, which are taller.

Prices quoted are prepaid, either by parcel post or prepaid express, according to the size of the bundle. We will not sell less than 100 of a kind at these low prices.

	100	500		100	500
Ash, Green	\$1.75	\$7.50	Mulberry, Russian	1.75	7.50
Box Elder	1.75	7.50	Olive, Russian	7.00	30.00

Maple, Soft	1.75	7.50	Willow, Laurel Leafed (2 to 3 ft.)	4.50	20.00

Asparagus

Plant Asparagus This Spring

Plant Asparagus in rich loam soil in a southern exposure. If possible, set plants two feet apart in the row, being sure that the roots are kept well spread apart. For best results, the rows should be three to five feet apart.

We have only one variety, the **WASHINGTON RUST PROOF**, which is a great improvement on the old-fashioned varieties, as it is absolutely free from Asparagus Rust. It may be planted either spring or fall. We can furnish either one or two year plants for spring planting.

Asparagus

One-year plants are 25 for 60c; 100 for \$2.00; 300 for \$5.00, postpaid.

Two-year plants are 25 for \$1.00; 100 for \$3.00; 300 for \$7.00, postpaid.

Horseradish

The **MALINER KREN**, or Improved Bavarian variety is the best variety for home use. Easy to grow from either cuttings or crowns. Crowns are top pieces of large roots, and will make hills the first year. We can furnish crowns at 3 for 25c; 12 for 75c; or 100 for \$5.00, postpaid. We can also furnish the cuttings which are pieces of roots, at 12 for 35c or 100 for \$1.50, postpaid.

Sage

MAMMOTH BROADLEAF—This is the old-fashioned Sage used for seasoning. You should have from four to a dozen plants in the garden, for the home grown product is usually of finer quality than that which is packed and sold commercially.

Heavy, field grown plants, 4 for 50c; or 12 for \$1.00, postpaid. May be planted either spring or fall.

Giant Rhubarb

Our special strain of Rhubarb is unexcelled for its extra large, juicy, tender stalks and for its scarcity of seed stalks. It is as near seedless as any Rhubarb can be. It is easily grown from divisions and may be planted successfully either in spring or fall. We can furnish divisions in two sizes. Medium Divisions, 4 for 50c; 12 for \$1.25. Extra Large Divisions, 2 for 40c; 4 for 75c; 12 for \$2.00, all postpaid.

Dwarf Juneberry

An unusually hardy shrub, grown mostly for ornamental purposes. Fruit a reddish purple in color. 35c each; 4 for \$1.25; 12 for \$3.25, postpaid.

Hedge Plants

A Well Trimmed Hedge

not be trimmed until after they have bloomed.

Probably the most important thing to remember is proper planting and spacing for the most effective results. My advice in planting a hedge would be to plant a double row, the rows about a foot apart and the plants about a foot apart in the rows, and staggered to "break joints", so to speak. This will make a very dense, solid hedge right from the start. You can, however, make a very nice hedge by planting only one row. Set the plants deep enough so that the place where the branches start out from the main stem will be several inches below the surface of the ground.

The plants listed below are the regular 12 to 18 inch, two-year old size and are much larger than the size usually planted. They will be cut back for planting when you receive them. Here are the prices, postpaid in small amounts. Lots of 100 or more go by express at your expense.

PRICES OF HEDGE PLANTS

	Prepaid			Not Prepaid	
	12	25	50	100	200
Barberry, Thunbergi	\$2.75	\$5.00	\$7.50	\$12.00	\$20.00

Russian Olive	1.00	2.00	4.00	7.00	12.00
Spirea, Van Houttei	2.00	3.00	5.00	10.00	18.00

Proper Planting of Nursery Stock

The best planting results are always obtained by those who take the greatest care in planting and placing the shrubs and plants. The essential thing, of course, is to see that the plants are placed in the ground properly to start with. We have always advised severely cutting back shrubs and trees when transplanting, and of course we now cut back all our shrubs and trees just as they should be for best results, before we send them out.

Another thing, be sure to make the hole where the shrubs or trees are to be planted plenty large enough so the roots can be well spread out without crowding, and so that the plant will be a few inches deeper than it stood in the Nursery row. A good rule with shrubs is to set them in the ground just above the forks where the branches start.

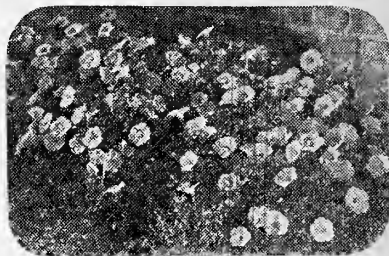

It is a very good idea to mound up dirt five or six inches deep over the crown of the plant and leave there for a week or two, until the buds begin to swell and start growing. The dirt can then be raked down level with the ground again. This gives the roots time to start before they make top growth. This is especially true in the planting of Roses.

Always use plenty of water when setting out new plants of any kind, whether it be shrubs, hardy perennials, fruit trees or Evergreens. Never use fresh manure near the roots or tops of any plants. Old manure may sometimes be mixed with the dirt, but only if it is well rotted and very thoroughly mixed.

If you have put off having a lot of the flowers, shrubs, trees, and plants you want just because you didn't know exactly how to handle them, just write us for cultural directions.

We have a fine stock of plants for the perennial border.

Bedding Plants

A bed of Petunias

We have a wonderful lot of bedding plants growing for you in our Greenhouses here at Shenandoah, and they will be ready for mailing out just as soon as danger of freezing weather is past, or about the first of May. Of course, I suppose most of you have ordered your own seed and have your bedding plants coming on in boxes of dirt in the window, but for those of you who forgot about it or put it off until it was too late, we have grown some mighty fine plants.

PETUNIAS—Last year we didn't raise anywhere near enough Petunia plants to go more than half way around, but this year I think we will have enough to supply everybody, especially of the standard varieties, such as Rosy Morn, Balcony Blue, Balcony Rose, General Dodd and Howard's Star. The price will be 50c per dozen, or three dozen for \$1.25, by mail postpaid. You may take them all of one variety or assort them to suit yourself.

ASTERS—We can supply Aster plants in four colors, red, pink, white, or purple, or assorted colors. The price is the same as the Petunias, 50c per dozen or three dozen for \$1.25, postpaid.

SALVIA OR SCARLET SAGE—We have a limited supply of Salvia plants and while they last the price is the same as the Asters, 50c per dozen or three dozen for \$1.25, postpaid.

GERANIUMS—Hundreds of people each spring want small Geranium plants for bedding purposes, and we have a nice lot of them coming on in two and a half inch pots to be shipped in paper pots with dirt on the roots. They will be in bloom or budded to bloom when you get them, and we can supply red, white, or pink, at 25c for one; 60c for three; \$1.00 for six, or \$1.75 for twelve, by mail postpaid.

About Shipment of Nursery Stock

Lots of people hold off ordering Nursery Stock until the middle of the season. Whenever possible, we advise placing your order early. If you do this, we can reserve the stock for you, and ship it at the proper time for planting in your locality, and you are also sure of getting some of these varieties of plants which are usually sold out near the end of the season.

In shipping early orders, we check very carefully with Government weather reports. Of course, unexpected weather conditions cannot be avoided. If your Nursery Stock arrives in unfavorable weather, untie the package and store in a cool place in the cellar. Do not remove packing from the roots. Plants will keep in good condition in this way for several days.

Should anything happen to the package while in transit, so that stock is received in damaged condition or is not satisfactory, be sure to let us know promptly on receipt of goods. We guarantee that our stock will reach you in good, live, growing condition, and that it will be absolutely true to name. If it isn't, write us promptly so that we may make satisfactory adjustment.

LANDSCAPE DEPARTMENT

We maintain one of the best Landscape Departments in the Middle West. It is under the supervision of a licensed graduate Landscape Architect. Space doesn't permit us to give details concerning this Department, but if you wish to beautify your home and don't quite know how to go about it, we will be glad to have you write us. Our Architect will draw plans for any size place at a reasonable charge, which will be refunded to you when you purchase Nursery Stock.

In Case Price is Wrong or Has Changed:—
Shall we fill exact amount ordered and ad-
just price later?.....Or shall we fill
for the amount of money sent?.....
If out of variety ordered do we have your
permission to substitute equal or better in the
nearest we can supply?.....

PLEASE ANSWER ABOVE INFORMATION
EACH TIME YOU WRITE

Your Money's Worth or Your Money Back—
It is mutually agreed and understood that any
seeds or other goods ordered of us may be
returned at any time within ten days after
receipt, if not satisfactory, and money paid
for them will be refunded, but we do not and
can not in any way warrant the stand or the
crop as they depend on so many conditions
beyond our control. HENRY FIELD CO.

[illegible][illegible]
